Transhumanism The History Of A Dangerous Idea:

Transhumanism David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey, Blade Runner, the Terminator series, and more recently The Matrix, Limitless, Her, and Transcendence. However, as its adherents hint at in their own publications, transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah, which asserts that humanity is evolving intellectually towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself in the form of living machines or artificial intelligence. Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK Ultra, the CIA's mind control program. MK Ultra promoted the mind-expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge. And as revealed in the movie Lucy, through the use of smart drugs and what transhumanists call mind uploading, man will be able to merge with the Internet, which is envisioned as the end point of Kabbalistic evolution: the formation of a collective consciousness or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human knowledge and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the God of occultism or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.

Transhumanism: The Proper Guide to a Posthuman Condition or a Dangerous Idea? Wolfgang Hofkirchner, Hans-Jörg Kreowski, 2020-12-12 This book examines the contributions of the transhumanism approach to technology, in particular the contributed chapters are wary of the implications of this popular idea. The volume is organized into four parts concerning philosophical, military, technological, and sociological aspects of transhumanism, but the reader is free to choose various reading patterns. Topics discussed include gene editing, the singularity, ethical machines, metaphors in AI, mind uploading, and the philosophy of art, and some perspectives taken or discussed examine transhumanism within the context of the philosophy of technology, transhumanism as a derailed anthropology, and critical sociological aspects that consider transhumanism in the context of topical concerns such as whiteness, maleness, and masculinity. The book will be of value to researchers engaged with artificial intelligence and the ethical, societal, and philosophical impacts of science and technology. **Metahumanism, Euro-Transhumanism and Sorgner's Philosophy** Maurizio Balistreri, Aura Elena Schussler, 2024-01-01 This essay collection is a fascinating, thorough, and intellectually stimulating analysis of Stefan Lorenz Sorgner's theoretical frameworks and conceptualizations of Euro-transhumanism, metahumanism, and the philosophy of posthuman art. The contributors address the most challenging philosophical, ethical, and aesthetic issues in the field of transcritical post and metahumanism.

such as debates concerning Nietzsche as a weak proto transhumanist potential risks and benefits of artificial intelligence brain computer interfaces and bio enhancements ecological crises space travel the use of human embryos for artistic purposes robots as artists humans as cyborgs and more This collection provides a critical introduction to Sorgner's philosophy as well as a complex intellectual engagement with the field of posthuman studies It is a rich reflective journey for all those interested in technology ethics art and the posthuman paradigm shift

Confessions of an Illuminati, Volume I Leo Lyon Zagami, 2019-06-01 Leo Lyon Zagami uses the internal documents of the Illuminati to reveal confidential and top secret events His book contends that the presence of numerous Illuminati brotherhoods and secret societies just as those inside the most prestigious U S universities such as Yale or Harvard have always been guides to the occult From the Ordo Templi Orientis OTO's infiltration of Freemasonry to the real Priory of Sion this book exposes not only the hidden structure of the New World Order and the occult practices but also their connections to the intelligence community and the infamous Ur Lodges

On Transhumanism Stefan Lorenz Sorgner, 2020-12-15 Transhumanism is widely misunderstood in part because the media have exaggerated current technologies and branded the movement as dangerous leading many to believe that hybrid humans may soon walk among us and that immortality achieved by means of mind uploading is imminent In this essential and clarifying volume Stefan Lorenz Sorgner debunks widespread myths about transhumanism and tackles the most pressing ethical issues in the debate over technologically assisted human enhancement *On Transhumanism* is a vital primer on the subject written by a world renowned expert In this book Sorgner presents an overview of the movement's history capably summarizing the twelve pillars of transhumanist discourse and explaining the great diversity of transhumanist responses to each individual topic He highlights the urgent ethical challenges related to the latest technological developments inventions and innovations and compares the unique cultural standing of transhumanism to other cultural movements placing it within the broader context of the Enlightenment modernity postmodernity and the philosophical writings of Nietzsche Engagingly written and translated and featuring an introduction for North American readers this comprehensive overview of the cultural and philosophical movement of transhumanism will be required reading for students of posthumanist philosophy and for general audiences interested in learning about the transhumanist movement

Confessions of an Illuminati, VOLUME I (2nd edition) Leo Lyon Zagami, 2019-04-26 SYMBOLS ARE THE LANGUAGE OF THE ILLUMINATI Released in English for the first time by secret society insider and author Leo Lyon Zagami this ground breaking book presents internal documents confidential

rituals secret fraternal rites and a unique perspective on global events that expose a web of deceit and total world control His newly released 2nd edition book contends that the presence of numerous Illuminati brotherhoods and secret societies just like the prestigious Yale University's Skull and Bones have always been guides to the occult From the Ordo Templi Orientis O T O infiltration of Freemasonry to the real Priory of Sion this book exposes the hidden structure of the New World Order and the occult practices of the various groups involved within it including their connections to Aleister Crowley malevolent ETs the intelligence community and the infamous Ur Lodges If the truth is stranger than fiction then the true secret structure of the Illuminati and their invisible network made from various power groups presents a far different perspective than what the public is offered in the media or by their elected officials The first step in defeating the Illuminati and their satanic New World Order is to understand their modus operandi Because once you know their method of operation including how to interpret their symbols and understand what is not being told to you it is then possible to comprehend their control grid and gain the power to oppose it After all knowledge is power

What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement D. John Doyle,2018-09-01 This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the

clinical realm In the book the author critically examines technologies such as genetic engineering neural implants pharmacologic enhancement and cryonic suspension from transhumanist and bioconservative positions focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity The author also introduces the notion that death is a process rather than an event as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement Written by a physician scientist and heavily referenced to the peer reviewed medical and scientific literature the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side reading No prior knowledge of moral philosophy is assumed as the various key approaches to moral philosophy are outlined early in the book

Identity, Institutions and Governance in an AI World

Peter Bloom, 2020-01-10 The 21st century is on the verge of a possible total economic and political revolution Technological advances in robotics computing and digital communications have the potential to completely transform how people live and work Even more radically humans will soon be interacting with artificial intelligence A I as a normal and essential part of their daily existence What is needed now more than ever is to rethink social relations to meet the challenges of this soon to arrive smart world This book proposes an original theory of trans human relations for this coming future Drawing on insights from organisational studies critical theory psychology and futurism it will chart for readers the coming changes to identity institutions and governance in a world populated by intelligent human and non human actors alike It will be characterised by a fresh emphasis on infusing programming with values of social justice protecting the rights and views of all forms of consciousness and creating the structures and practices necessary for encouraging a culture of mutual intelligent design To do so means moving beyond our anthropocentric worldview of today and expanding our assumptions about the state of tomorrow s politics institutions laws and even everyday existence Critically such a profound shift demands transcending humanist paradigms of a world created for and by humans and instead opening ourselves to a new reality where non human intelligence and cyborgs are increasingly central

Reclaiming Information and Communication Technologies for Development Tim Unwin, 2017-05-11 The development of new Information and Communication Technologies ICTs has transformed the world over the last two decades These technologies are often seen as being inherently good with the ability to make the world better and in particular to reduce poverty However their darker side is frequently ignored in such accounts ICTs undoubtedly have the potential to reduce poverty for example by enhancing education health delivery rural development and entrepreneurship across Africa Asia and Latin America However all too often projects designed to do so fail to go to scale and are unsustainable when donor funding ceases Indeed ICTs have actually dramatically increased inequality across the world The central purpose of this book is to account for why this is so and it does so primarily by laying bare the interests that have underlain the dramatic expansion of ICTs in recent years Unless these are fully understood it will not be possible to reclaim the use of these technologies to empower the world's poorest and most marginalised

The "Nonsense" Papers James W. Astrada, 2021-08-02 Over the past two years a pandemic has gripped the planet in fear with lockdowns restrictions and a transition into a unknown future with transhumanism at its helm While the flow of information has been heavily censored and controlled by a new fact checker system humanity seemingly is only getting one side of the story The SARS Cov2 has been manipulated by the mass media keeping people locked in their homes afraid to go out Controversial theories including this virus being imaginary and that the virus was engineered to control the world population are at the helm of the argument Part one of the third installment of the series questions the state of humanity's future and the fate of our very race with our environmental habits vaccines and their supposed purpose what it means to be human and our beliefs Has humanity reached its zenith With the 2030 agenda pushed by the United Nations and their praise for what some are calling the scamdemic plandemic as a means of starting over is humanity to begin what most are calling the Great Reset Is the next stage in our evolution dominated by RFID implanted chips vaccine passports with the promise of returning to a normal life and a biotechnology The horizon in humanity's future seems mysterious and hidden
