Transition and Economics Gérard Roland, 2000 The transition from socialism to capitalism in former socialist economies has transformed the economic structure This book provides an overview of research on the issues raised by the shift from collective to private ownership

Political Economy of Transition and Development Nauro F. Campos, Jan Fidrmuc, 2003-11-30 Political Economy of Transition and Development collects the proceedings of an international conference that brought the leading thinkers in this field to the Center for European Integration Studies of the University of Bonn in May 2002 The contributions analyze the various interactions between institutions policy choices economic developments and political outcomes in transition and developing countries The first five chapters give a relatively broad assessment of the various reform paths and outcomes in the transition and developing countries The remaining eight chapters proceed to analyze important aspects of transition such as voting behavior political regime choice corruption social capital growth and inequality and EU enlargement The resulting volume thus combines a bird's eye perspective with a relatively narrow focus on selected key issues pertaining to the ongoing transition process in Central and Eastern Europe

Labor Markets and Social Policy in Central and Eastern Europe N. A. Barr, 2005-01-01 Labor Markets and Social Policy in Central and Eastern Europe summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants

indicators relationships between transition and institutional resilience and thresholds and tipping points between transition phases

Emerging-market Multinational Enterprises in East Central Europe Ágnes Szunomár, 2020-11-23 The rise of multinational enterprises MNEs from emerging markets is topical important and poses a number of questions and challenges that require considerable attention in the future from academia as well as business management The recent takeovers of high profile companies in developed or developing countries by non European emerging market MNEs EMNEs such as Lenovo Wanhua China Hindalco India CVRD Brazil Cemex Mexico Lukoil Russia etc as well as the greenfield or brownfield investments of emerging companies such as Huawei ZTE Tata Pepco etc show a new trend where new kind of firms become major players globally EMNEs have become important players in several regions around the globe ranging from the least developed countries of Africa through the developing markets in Latin America and Asia to the developed countries of the United States or the European Union including East Central European ECE countries EMNEs presence on the global level has resulted in numerous studies in the international literature but those research results barely cover EMNEs activities in the ECE region in the East Central European EU member countries including the Czech Republic Hungary Poland Slovakia and Slovenia The existing books typically focus on the investment activity of a single country or region such as China or East Asia but a comprehensive analysis is still missing in this regard The novelty of this edited volume is that it aims at exploring EMNEs location determinants strategies activities and challenges in East Central Europe by discussing its anomalies to the traditional theories as well as to other types of MNEs in the ECE region The authors focus on EMNEs not only from China but from other important emerging countries too such as Russia India South Korea Taiwan Turkey Brazil or South Africa

The Labour Market Impact of the EU Enlargement Floro Ernesto Caroleo, Francesco Pastore, 2010-03-18 Floro Ernesto Caroleo and Francesco Pastore This book was conceived to collect selected essays presented at the session on The Labour Market Impact of the European Union Enlargements A New Regional Geography of Europe of the XXII Conference of the Italian Association of Labour Economics AIEL The session aimed to stimulate the debate on the continuity fracture of regional patterns of development and employment in old and new European Union EU regions In particular we asked whether and how different the causes of emergence and the evolution of regional imbalances in the new EU members of Central and Eastern Europe CEE are compared to those in the old EU members Several contributions in this book suggest that a factor common to all backward regions often neglected in the literature is to be found in their higher than average degree of structural change or more precisely in the hardship they experience in coping with the process of structural change typical of all advanced economies In the new EU members of CEE structural change is still a consequence of the continuing process of transition from central planning to a market economy but also of what Fabrizio et al 2009 call the second transition namely that related to the run up to and entry in the EU

Annual World Bank Conference on Development Economics 2000 Boris Pleskovic, Nicholas Stern, 2001 Annotation This 12th Annual World Bank

Conference on Development Economics focuses mainly on four areas new development thinking crises and recovery corporate governance and restructuring and social security including public and private savings Structural Reforms Without Prejudices Tito Boeri, Giorgio Barba Navaretti, 2006-06-15 Our economies face constant challenges from many different directions Structural reforms are implemented every day either to grasp the benefits of globalization and technological change or to avoid foundering on unaffordable welfare systems or the rise of new economies Despite this flurry of reforms many of their effects are insufficiently understood What makes reforms a success or a failure Why do we witness systematically ambivalent attitudes to reforms Can governments implement reforms differently without inflicting prejudice to large fringes of the population This book explores these issues by comparing a number of reforms across a large set of countries and sectors First through an innovative multisectorial input output analysis the authors compare the effects of liberalisation reforms in the telecommunication and electricity sectors across Europe Surprisingly they find that very similar and well intended reforms can generate highly contrasted outcomes It is also shown that governments must consider the effects of each reform on all sectors of the economy Second the authors explore how governments can tailor their reform strategy to alter the redistributive effects of reforms They show that the government's approach to reforms has been very different across time and across countries A government's approach depends on local institutions on the nature of the opposition and on the scope of the reform under way The authors however show that governments do have alternatives Often there are ways to tailor reforms so as to protect specific parts of the population and there are ways to experiment gradually to avoid costly policy mistakes **Services Policy Reform and Economic Growth in Transition Economics** , *World Scientific Reference On Asia-Pacific Trade Policies (In 2 Volumes)* Kym Anderson, 2019-12-19 Protectionism has been placed under the media spotlight with news headlines generated by populist anti globalization movements and Donald Trump's term as US President Such a policy stance is putting at risk unilateral trade reform efforts in the Asia Pacific region and elsewhere This two volume reference work provides a timely update on how far the region has come in opening markets It analyzes the motivations or ostensible objectives of policies adopted in the past the changing extent of the domestic price distortions involved the economic effects of those policies at home and abroad the political economy forces at work that brought about those policies and their subsequent reform their consequences for international trade economic welfare and poverty alleviation and prospects for sustainable improvements in current policies Case studies of major East Asian economies and Australia reveal how government priorities to assist farmers versus manufacturers changed over the past century but especially since the 1980s and how that has affected trade between natural resource poor and resource rich economies This set is highly recommended for those who are interested in the economics and politics of trade policies agricultural economics economic development and food and nutrition security in the Asia Pacific region and beyond Neoliberalism and the Transforming Left in India Ritanjan Das, 2017-10-30 West Bengal has often been perceived as somewhat of an aberration in

the wider context of a rather chaotic Indian democracy as the Left Front spearheaded by the Communist Party of India Marxist CPIM demonstrated a rare instance of political stability decisively winning seven consecutive democratic elections from 1977 to 2006 Its development record has also been substantial with a focus on land reforms the panchayati raj institution and an agriculture centric development agenda This book presents a reappraisal of the political economic history of the CPIM Left Front regime against the backdrop of the Indian reform experience It examines two distinct areas the conditions that necessitated the regime to engineer a transition from an erstwhile agricultural based growth model to a more pro market economic agenda post 1991 and the political strategy employed to manage such a transition attract private capital and at the same time sustain the regime s traditional rhetoric and partisan character In order to develop a more textured understanding of the recent political developments in West Bengal the author applies a historically nuanced and inductive political economic analysis which draws on published materials and primary material such as government documents and interviews with bureaucrats political activists members of the intelligentsia and ministers A valuable contribution to the ongoing debate in the literature on the drifts underway with the Indian Left and India s economic transformation post 1990s this book will be of interest to academics in the field of Political Science Government Political Economy and South Asian Studies *Learning to be Capitalists* Annette Miao Kim, 2008-10-02 Why have some countries been able to escape the usual dead end of international development efforts and build explosively growing capitalist economies Based on years of fieldwork this book provides a detailed account of the first generation of entrepreneurs in Vietnam in comparison to those in other transition countries Focusing on the emergence of private land development firms in Ho Chi Minh City the author shows how within seven years the private sector produced the majority of all new houses in the real estate market This book demonstrates that capitalist entrepreneurialism was not the result of state initiative properly incentivized policies or individual personality traits Rather a society wide reconstruction of cognitive paradigms enabled entrepreneurs to emerge and transformed Vietnam from a poor centrally planned economy to one of the fastest growing market economies in the world *China's Great Economic Transformation* Loren Brandt, Thomas G. Rawski, 2008-04-14 This landmark study provides an integrated analysis of China s unexpected economic boom of the past three decades The authors combine deep China expertise with broad disciplinary knowledge to explain China s remarkable combination of high speed growth and deeply flawed institutions Their work exposes the mechanisms underpinning the origin and expansion of China s great boom Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development The editors probe both achievements and weaknesses across many sectors including China s fiscal legal and financial institutions The book shows how an intricate minuet combining China s political system with sectorial development globalization resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt **Handbook of New Institutional Economics** Claude Menard, Mary M. Shirley, 2005-07-01

New Institutional Economics NIE has skyrocketed in scope and influence over the last three decades This first Handbook of NIE provides a unique and timely overview of recent developments and broad orientations Contributions analyse the domain and perspectives of NIE sections on legal institutions political institutions transaction cost economics governance contracting institutional change and more capture NIE s interdisciplinary nature This Handbook will be of interest to economists political scientists legal scholars management specialists sociologists and others wishing to learn more about this important subject and gain insight into progress made by institutionalists from other disciplines This compendium of analyses by some of the foremost NIE specialists including Ronald Coase Douglass North Elinor Ostrom and Oliver Williamson gives students and new researchers an introduction to the topic and offers established scholars a reference book for their research
