Language Online David Barton, Carmen Lee, 2013-04-17 In *Language Online* David Barton and Carmen Lee investigate the impact of the online world on the study of language. The effects of language use in the digital world can be seen in every aspect of language study and new ways of researching the field are needed. In this book the authors look at language online from a variety of perspectives providing a solid theoretical grounding, an outline of key concepts and practical guidance on doing research. Chapters cover topical issues including the relation between online language and multilingualism, identity, education and multimodality, then conclude by looking at how to carry out research into online language use. Throughout the book many examples are given from a variety of digital platforms and a number of different languages including Chinese and English. Written in a clear and accessible style, this is a vital read for anyone new to studying online language and an essential textbook for undergraduates and postgraduates working in the areas of new media literacy and multimodality within language and linguistics courses.

Multilingualism Online Carmen Lee, 2016-09-13 By the co-author of *Language Online*, this book builds on the earlier work while focusing on multilingualism in the digital world. Drawing on a range of digital media from email to chatrooms and social media such as Facebook, Instagram and YouTube, Lee demonstrates how online multilingualism is closely linked to people's offline literacy practices and identities and examines the ways in which people draw on multilingual resources in their internet participation. Bringing together central concepts in sociolinguistics and internet linguistics, the eight chapters cover key issues such as language choice, code switching, identities, language ideologies, minority languages online, translation. Examples in the book are drawn from both all the major languages and many lesser written ones such as Chinese dialects, Egyptian Arabic, Irish and Welsh. A chapter on methodology provides practical information for students and researchers interested in researching online multilingualism from a mixed methods and practice-based approach. *Multilingualism Online* is key reading for all students and researchers in the area of multilingualism and new media as well as those who want to know more about languages in the digital world.
