Trauma And Rebirth Intergenerational Effects Of The Holocaust:

Trauma and Rebirth John J. Sigal, Morton Weinfeld, 1989-06 This volume examines the long term consequences of the Holocaust on survivors and their children some four decades after the war This book represents the culmination of nine years of collaborative effort consisting primarily of findings drawn from two sample surveys of Jewish residents in Montreal This volume covers new research topics that have been neglected in the survivor literature including personality familial interactions vocational achievements sociopolitical attitudes an excellent source of material from a sociopolitical and psychological perspective The assessment of the impact of a political movement on the attitudes and psychological status of a minority population is informative The study of a large group of Holocaust survivors adds significantly to the scientific literature in this area Contemporary Psychology The first empirical study of the psychological consequences of the Holocaust across three generations this book assesses the long term and intergenerational effects of severe victimization and of other forms of exposure to excessive prolonged stress Although there can be no doubt that there are negative psychological and physical consequences for the survivors of the Holocaust the authors present evidence here that contradicts the dominant thrust of previous studies which emphasized dysfunction in the family life of survivors and psychological impairment in their children In addition to an intensive study of Holocaust survivors and their families this book provides a yardstick against which the long term and cross generational impact of other potentially traumatic situations war earthquakes flood fire assault and so on may be measured The authors research for this volume spans the disciplines of psychology psychiatry sociology history and ethnic studies The book however is written in an accessible style easily understood by the nonprofessional reader The culmination of a nine year collaborative effort *Trauma and Rebirth* consists primarily of findings drawn from two sample surveys of Jewish residents in Montreal One survey focuses on Holocaust survivors the second on children of survivors Both include control groups and draw from unbiased nonclinical and non self selected populations Students and scholars of modern Jewish life and the Holocaust or anyone interested in the study of trauma and victimization will find *Trauma and Rebirth* an invaluable resource

Although India and China have very different experiences of colonialism they respond to that history in a similar way by treating it as a collective trauma As a result they have a strong sense of victimization that affects their foreign policy decisions even today Wronged by Empire breaks new ground by blending this historical phenomenon colonialism with mixed methods including archival research newspaper data mining and a new statistical method of content analysis to explain the foreign policy choices of India and China two countries that are continuously discussed but very rarely rigorously compared By reference to their colonial past Manjari Chatterjee Miller explains their puzzling behavior today More broadly she argues that the transformative historical experience of a large category of actors ex colonies who have previously been neglected in the study of international relations can be used as a method to categorize states in the international system In the process Miller offers a more inclusive way to analyze states than do traditional theories of international relations **Cross-Cultural Assessment of Psychological Trauma and PTSD** John P.
