The Paradox of Trauma and Growth in Pastoral and Spiritual Care Mary Beth Werdel, 2023-10-24 The Paradox of Trauma and Growth in Pastoral and Spiritual Care Night Blooming introduces and bridges the gap between the psychological and spiritual perspectives and responses in trauma work illuminating the complexity of the human phenomenon of growth through suffering that is too easily misunderstood in the context of pastoral and spiritual care Through the hopeful metaphor of night bloomers rare plants that grow because of light but bloom in the darkness it is suggested that while psychological trauma is inherently negative and suffering creates a spiritual inner night moving through it may reveal a new complex reality of the human experience not previously understood We may see ourselves others or the world in a way that is stronger wiser deeper or more brilliant than we had known before The book presents the goal of pastoral and spiritual work is not to extinguish darkness Nor is it to solely focus on the light The work is to learn how to stay awake through the night without glorifying it Such a task is far easier when we believe there might be a rare and uniquely beautiful bloom to stay awake for and that witnessing such a bloom could have great consequences for living a meaningful life

Trauma, Experience and Narrative in Europe after World War II Ville Kivimäki, Peter Leese, 2021-12-03 This book promotes a historically and culturally sensitive understanding of trauma during and after World War II Focusing especially on Eastern and Central Europe its contributors take a fresh look at the experiences of violence and loss in 1939-45 and their long term effects in different cultures and societies The chapters analyze traumatic experiences among soldiers and civilians alike and expand the study of traumatic violence beyond psychiatric discourses and treatments While acknowledging the problems of applying a present day medical concept to the past this book makes a case for a cultural social and historical study of trauma Moving the focus of historical trauma studies from World War I to World War II and from Western Europe to the east it breaks new ground and helps to explain the troublesome politics of memory and trauma in post 1945 Europe all the way to the present day This book is an outcome of a workshop project Historical Trauma

The Experience of Atheism: Phenomenology, Metaphysics and Religion Claude Romano, Robyn Horner, 2021-05-06 Religious and atheistic belief are presented anew in a volume of essays from leading phenomenologists in both France and the UK Atheism often presented as the negation of religious belief is here engaged with from a phenomenologically informed notion of experience The focus on experience sparks new debates in readings of belief faith and atheism as they relate to and complicate each other What unites the contributors is their relationship to phenomenology as it has developed in France in the wake of Heidegger and Husserl Leading French intellectuals from this context Jean Luc Nancy Quentin Meillassoux and Catherine Malabou amongst others contribute arresting ideas on atheistic faith the death of God and anarchic faith opening up new areas of understanding in a field whose parameters and core concepts are ever shifting Revealing the extent to which religious and atheistic belief must be seen to influence and on a fundamental level to co create one another the pluralistic society in which religious belief is counted as one option amongst many is given primacy The fact that religious faith has become not only optional but also in many contexts strangely alienated from society deeply modifies the experience of the believer as much as that of the non believer A focus on experience over and above belief moves us towards a mode of experiential knowledge which refuses to privilege the atheistic believer and deride the reality of religious belief
