The Public Art Museum in Nineteenth Century Britain Christopher Whitehead, 2017-03-02 During the mid nineteenth century a debate arose over the form and functions of the public art museum in Britain Various occurrences caused new debates in Parliament and in the press about the purposes of the public museum which checked the relative complacency with which London's national collections had hitherto been run This book examines these debates and their influence on the development of professionalism within the museum trends in collecting and tendencies in museum architecture and decoration In so doing it accounts for the general development of the London museums between 1850 and 1880 with particular reference to the National Gallery This involves analysis of art display and its relations with art historiography alongside institutional and architectural developments at the British Museum the South Kensington Museum and the National Gallery It is argued that the underpinning factor in all of these developments was a reformulation of the public museum's mission which was in turn related to the electoral reform movement In a potential situation of mass enfranchisement the masses should be well educated the museum was openly identified as a useful institution in this sense This consideration also influenced approaches to collecting and arranging artworks and to configuring their architectural setting within the museum allowing for displays to be instructive in specific ways Dissatisfaction with the British Museum and National Gallery buildings and their locations led to proposals to move the national collections possibly merging and redefining them Again the socio political usefulness of the museum was key in determining where the national collections should be housed and in what form of building This rich debate is analysed with full references to the various forums in and out of Parliament Part one covers these issues in a

thematic structure examining all of the national collections their interrelationships and their gradual development of discrete yet sometimes arbitrary museological territories Part two focuses on the individual case of the National Gallery observing how museological debate was brought to bear on the development of a specific institution Every architectural development and redisplay is closely analysed in order to gauge the extent to which the products of debate were carried through into practice and to comprehend the reasons why no museological grand project emerged in London [Avery Index to Architectural Periodicals](#), 1995 Avery Library,1997-02 **The Culture of Property** Jordanna Bailkin,2004-07-15 What kind of property is art Is it property at all Jordanna Bailkin s The Culture of Property offers a new historical response to these questions examining ownership disputes over art objects and artifacts during the crisis of liberalism in the United Kingdom From the 1870s to the 1920s Britons fought over prized objects from ancient gold ornaments dug up in an Irish field to a portrait of the Duchess of Milan at the National Gallery in London They fought to keep these objects in Britain to repatriate them to their points of origin and even to destroy them altogether Bailkin explores these disputes in order to investigate the vexed status of property within modern British politics as well as the often surprising origins of ongoing institutional practices Bailkin s detailed account of these struggles illuminates the relationship between property and citizenship which has constituted the heart of liberal politics as well as its greatest weakness Drawing on court transcripts gallery archives exhibition reviews private correspondence and a striking series of cartoons and photographs The Culture of Property traverses the history of gender material culture urban life colonialism Irish and Scottish nationalism and British citizenship This fascinating book challenges recent scholarship in museum studies in light of ongoing culture wars It should be required reading for cultural policy makers museum professionals and anyone interested in the history of art and Britain [Directory of Rare Book and Special Collections in the UK and Republic of Ireland](#) Karen Attar,2016-05-31 This directory is a handy on volume discovery tool that will allow readers to locate rare book and special collections in the British Isles Fully updated since the second edition was published in 1997 this comprehensive and up to date guide encompasses collections held in libraries archives museums and private hands The Directory Provides a national overview of rare book and special collections for those interested in seeing quickly and easily what a library holds Directs researchers to the libraries most relevant for their research Assists libraries considering acquiring new special collections to assess the value of such collections beyond the institution showing how they fit into a unique and distinctive model Each entry in the Directory provides background information on the library and its purpose full contact details the quantity of early printed books information about particular subject and language strengths information about unique works and important acquisitions descriptions of named special collections and deposited collections Readership Researchers academic liaison librarians and library managers *Cultural Heritage and Slavery* Stephan Conermann,Claudia Rauhut,Ulrike Schmieder,Michael Zeuske,2023-11-20 In the recent cultural heritage boom community based and national identity projects are intertwined with interest in cultural tourism and

sites of the memory of enslavement Questions of historical guilt and present responsibility have become a source of social conflict particularly in multicultural societies with an enslaving past This became apparent in the context of the Black Lives Matter movement in 2020 when statues of enslavers and colonizers were toppled controversial debates about streets and places named after them re ignited and the European Union apologized for slavery after the racist murder of George Floyd Related debates focus on museums on artworks acquired unjustly in societies under colonial rule the question of whether and how museums should narrate the hidden past of enslavement and colonialism including their own colonial origins with respect to narratives about presumed European supremacy and the need to establish new monuments for the enslaved their resistance and abolitionists of African descent In this volume we address this dissonant cultural heritage in Europe with a strong focus on the tangible remains of enslavement in the Atlantic space in the continent This may concern for instance the residences of royal noble and bourgeois enslavers charitable and cultural institutions universities banks and insurance companies financed by the traders and owners of enslaved Africans merchants who dealt in sugar coffee and cotton and the owners of factories who profited from exports to the African and Caribbean markets related to Atlantic slavery **Time**

The Parthenon Marbles Dispute Alexander Herman, 2023-09-21 Why are we still arguing over the Parthenon Marbles This book offers a fresh take on the history of those famous pieces of ancient sculpture removed from the Acropolis in Athens by Lord Elgin's men in the early 19th century It explains how they became the cause célèbre of the larger debates around cultural heritage and restitution now taking place The subject is one that is currently embroiling museums governments universities and the public at large Herman provides a balanced thorough and critical account of the history of the Marbles while considering the legalities of their initial removal and the ethics of their retention by the British Museum It incorporates the views of curators museum directors lawyers archaeologists politicians and others in both London and Athens It explains why this particular dispute has not been satisfactorily resolved and suggests new ways of seeking resolution for the Parthenon Marbles and for the many other cultural treasures held in museum collections outside their countries of origin The book sets out a way forward for this famously intractable dispute one based on evidence of past practice legal rules around the transfer of cultural objects and the role of museums in negotiating international exchanges

Theatres of Memory Raphael Samuel, 2012-09-11 When *Theatres of Memory* was first published in 1994 it transformed the debate about what is to be considered history and questioned the role of heritage that lies at the heart of every Western nation's obsession with the past Today in the age of *Downton Abbey* and *Mad Men* we are once again conjuring historical fictions to make sense of our everyday lives In this remarkable book Samuel looks at the many different ways we use the unofficial knowledge of the past Considering such varied areas as the fashion for retrofitting the rise of family history the joys of collecting old photographs the allure of reenactment societies and televised adaptations of Dickens Samuel transforms our understanding of the uses of history He shows us that history is a living practice something constantly being reassessed in the world around us
