Sugar Creek Chronicle Cornelia F. Mutel,2016-03-15 In 2010 while editing a report on the effects of climate change in Iowa ecologist Cornelia Mutel came to grips with the magnitude and urgency of the problem She already knew the basics greenhouse gas emissions and global average temperatures are rising on a trajectory that could within decades propel us beyond far reaching irreversible atmospheric changes the results could devastate the environment that enables humans to thrive The more details she learned the more she felt compelled to address this emerging crisis The result is this book an artful weaving together of the science behind rising temperatures tumultuous weather events and a lifetime devoted to the natural world Climate change isn't just about melting Arctic ice and starving polar bears It's weakening the web of life in our own backyards Moving between two timelines Mutel pairs chapters about a single year in her Iowa woodland with chapters about her life as a fledgling and then professional student of nature Stories of her childhood ramblings in Wisconsin and the solace she found in the Colorado mountains during early adulthood are merged with accounts of global environmental dilemmas that have redefined nature during her lifespan Interwoven chapters bring us into her woodland home to watch
