

Ikelite Compact Video Housing

Instruction manual

#5610.03 Flip UltraHD with FlipPort 8GB | 2.1r (2nd Gen)

Congratulations on your purchase of an Ikelite Compact Video Housing. Ikelite has decades of experience in the underwater photographic, video, and lighting market.

Our products are designed and built in the USA by Ikelite for both the professional and amateur.

The clear housing permits instant visual inspection of the video camera and all sealing surfaces as well as complete monitoring of controls and camera LCD screens.

This housing has been water pressure tested to 300' (90m) at the factory. All camera controls are fully functional through the housing.

Opening the Housing

1. Place the housing face down in your lap or on a flat surface.
2. Depress opposing latch buttons simultaneously to open housing. Once the latch is unlocked, rotate the latch handle up and away from the housing until it stops. This motion will also break the housing o-ring seal and open the housing back slightly.

NOTE: Latch must be rotated to the fully open position to assure easy opening of the back. Rotate the hinged back to its open position.

Housing Size and Weight:

- 5.8" wide x 4.3" high x 3.1" deep (includes controls and lens port).
- 14.3cm x 10.9cm x 7.9cm.
- Less than 1lb. (0.45kg) above water.
- Slightly positive buoyancy underwater.

Please Read

We suggest that you read this instruction booklet thoroughly before use. If you are new to underwater videography be sure to read the General and Video Tips sections.

We also suggest that you read the Flip UltraHD Quick Start Guide thoroughly to have a full understanding of where each camera control is located, and what function each control provides.

Initial Camera Setup

1. Make sure your Flip video camera is fully charged.
2. Turn on your camera.
3. Set the Date and Time.
4. To ensure that your camera is operating properly, try recording and playback modes before placing your camera in the Ikelite Compact Video Housing.

Main Housing O-ring

Check to see that there is an o-ring on the housing back and that it is clean, lightly lubed, and in its proper location.

O-ring Maintenance

We recommend that you clean the main housing o-ring and o-ring channel before each day of diving.

1. To remove the o-ring, place your index finger and thumb on the o-ring as shown (Figure A, Page #50).
2. Squeeze the o-ring into a loop by pressing down on the o-ring and squeezing your index finger and thumb together (Figure B, Page #50).
3. Grab the o-ring loop with your other hand and remove the o-ring from the housing back.
4. Wipe the o-ring channel clean with a paper towel, napkin, or lint-free wiping cloth.
5. Clean and lightly lube the o-ring. Use Ikelite lube only (supplied with housing).
6. Very lightly lube the o-ring sealing surface on the housing front.

CAUTION: Never use a screwdriver or metal object to remove the main housing o-ring. This could damage the housing and o-ring, which could result in a leak.
