Groups in Transactional Analysis, Object Relations, and Family Systems N. Michel Landaiche, III, 2020-07-08 Groups are arguably an essential and unavoidable part of our human lives whether we are part of families work teams therapy groups organizational systems social clubs or larger communities In *Groups in Transactional Analysis Object Relations and Family Systems* Studying Ourselves in Collective Life N Michel Landaiche III addresses the intense feelings and unexamined beliefs that exist in relation to groups and explores how to enhance learning development and growth within them Landaiche s multidisciplinary perspective is grounded in the traditions of Eric Berne s transactional analysis Wilfred Bion s group as a

whole model and Murray Bowen's family systems theory. The book presents a practice of studying ourselves in collective life that utilizes a naturalistic method of observation, analysis of experiential data, and hypothesis formation, all of which are subject to further revision as we gather more data from our lived experiences. Drawing from his extensive professional experience of group work in a range of contexts, Landaiche deftly explores topics including group culture, social pain, learning, and language, and presents key principles which enhance and facilitate learning in groups. With a style that is both deeply personal and theoretically grounded in a diverse range of studies, *Groups in Transactional Analysis: Object Relations and Family Systems* presents a contemporary assessment of how we operate collectively and how modern life has changed our outlook. It will be essential reading for transactional analysts in practice and in training, as well as other professionals working with groups. It will also be of value to academics and students of psychology, psychotherapy, and group dynamics, and anyone seeking to understand their role within a group. Claude Steiner, Emotional Activist Keith Tudor, 2020-02-20. This book describes the work and life of Claude Michel Steiner, a close colleague and friend of Eric Berne, the founder of transactional analysis. Steiner was an early and influential transactional analyst, an exponent of radical psychiatry, and the founder of emotional literacy. Steiner also contributed a number of theories and concepts to the psychological literature. The book comprises edited excerpts from his unpublished autobiography, *Confessions of a Psychomechanic*, alongside commentaries and critical essays from colleagues on his major contributions to the fields of psychology, transactional analysis, radical therapy, and emotional literacy. Topics covered include script theory and the theory of strokes, recognition, hunger, radical therapy, and the concept of power and emotional literacy and love. In assessing Steiner's various contributions, the book also identifies central themes in his work and life and considers the autobiographical nature of theory.
