Transboundary Water Resources Management A Multidisciplinary Approach:

Transboundary Water Resources Management Jacques Ganoulis, Alice Aureli, Jean Fried, 2013-09-13 Based on an international symposium addressing a key issue in global development this reference includes both the latest methodologies for and practical examples of effective management of transboundary water resources Its multidisciplinary approach combines hydrology and environmental science with economic and political approaches in line with new UNESCO and EU recommendations which have been formulated and implemented with the active involvement of all three editors By providing a theoretical framework as well as abundant case studies from southern Europe Africa Asia and South America this handbook provides hydrologists geologists engineers and decision makers with all the knowledge they need for their daily work

Management Of Transboundary Water Resources Under Scarcity: A Multidisciplinary Approach Ariel

Dinar, Yacov Tsur, 2017-03-17 Water scarcity due to climate change population growth and economic development is a critical issue in many semi arid and arid regions around the world Water scarcity is especially critical in regions where water is shared by several riparian states and used for competing purposes irrigation domestic industry environment and hydropower There is evidence that water scarcity may give rise to conflicts among the riparian states that share water basins At the same time there is evidence that proper arrangements among riparian states create a basis for cooperation which is a necessary condition for economic development food production environmental sustainability and poverty reduction This book presents a collection of work presented by a group of academics and policy experts dealing with the impact of water scarcity and variability on the ability to jointly manage shared water and the derived welfare of international states and nations sharing international river basins consisting of economics technology law and institutions geography and international relations The book covers theoretical aspects of management of transboundary water as well as case studies from hotspots around the world The unique aspect of this book is the multidisciplinary nature of the chapters reflecting a new field of research that will gain popularity as water scarcity will increase over time and across regions The chapters from the book were presented at the Management of Transboundary Water Resources under Scarcity Perspectives on Agriculture and Food Security workshop held at The Hebrew University of Jerusalem Israel from June 22 to 23 2015

Transboundary Hydro-Governance Jacques Ganoulis, Jean Fried, 2018-06-06 Attending water security is an important challenge and a major systemic risk humanity faces in the years to come This is due to population increase over consumption of water especially in agriculture climate change and various forms of water pollution The issue becomes more complicated in transboundary water catchments that cover almost half of the world's land surface with about 60% of global river flow and 40% of the world's population Also in many parts of the planet like Saharan Africa population depends on groundwater resources located in transboundary aquifer systems These facts illustrate the importance of the book's subject which is the governance of transboundary waters both surface and groundwater The book is written by two distinguished scientists who having worked in various international

institutions like UNESCO GEF UNEP and at the European Commission have both an extended expertise on how to bridge the gap between science and political decision making which is the main factor for an effective governance of water resources. What is new in the book is the integrated analysis of transboundary governance of both surface water and groundwater as it occurs in reality. In current literature groundwater is still often missing for the benefit of surface water or on the contrary it is treated separately from surface water. The most important feature of the book is to distinguish between the real and a good or an effective transboundary water governance and to provide practical tools, methodologies and examples for its implementation in the field. Published timely during 2018, the book will contribute to address successfully practical problems of governance of transboundary waters that represent a very important part of our precious fresh water resources.

Handbook of Water Resources Management: Discourses, Concepts and Examples Janos J. Bogardi, Joyeeta Gupta, K. D. Wasantha Nandalal, Léna Salamé, Ronald R.P. van Nooijen, Navneet Kumar, Tawatchai Tingsanchali, Anik Bhaduri, Alla G. Kolechkina, 2021-06-12. This book provides an overview of facts, theories and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections or as entire chapters. They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes. Based on consolidated state of the art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision making processes. Knowing more about water but also about concepts, methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making.

Global Water R. Quentin Grafton, Paul Wyrwoll, Chris White, David Allendes, 2014-05-28. This book brings together some of the world's leading water researchers with an especially written collection of chapters on water economics, transboundary water, water and development, water and energy and water concepts.

Transboundary Water Resources in the Balkans Jacques Ganoulis, I.L. Murphy, Mitja Brilly, 2012-12-06. A source of up to date information on current water resources, their quality and quantity in every country in the Balkans. Institutional structures, water management issues and water monitoring problems are analyzed with special reference to international waters using characteristic case studies including the Sava River, Lake Ohrid, The Nestos, Mesta River, the Neretva River estuary and coastal waters in Turkey. Contributions written by experts from France, the UK and the USA demonstrate state of the art electronic networking and the management of distributed water databases. The protection of water resources in the Balkans has become a high profile issue since the collapse of communism in the area, the break up of former Yugoslavia and ethnic tensions in Kosovo. Transboundary river pollution and the development of international water basins call demand urgent regional co-operation which will be

facilitated by the International Network of Water Environment Centres for the Balkans the initiation of which is described in the final conclusions of the book

Turkey's Water Diplomacy Aysegül Kibaroglu, 2021-02-15 Turkey's Water Diplomacy delineates the institutional and legal foundations of transboundary water policy making in Turkey paying special attention to the evolution of transboundary water politics in the Euphrates Tigris river basin The book also analyses how Turkey's harmonization with the European Union has impacted the transboundary water policy discourses and practices and how these changes have been reflected in its relations with its Middle Eastern neighbours Turkey was one of the three countries that rejected the UN Watercourses Convention in 1997 Yet since the voting of the convention there have been changes in Turkey's stance vis vis international water law which the book studies Turkey's water diplomacy embodies complex water management problems which can be best understood as a product of competition feedback and interconnection among natural and societal variables in a political context Hence the book adopts the Water Diplomacy Framework with its key elements in making policy relevant recommendations specifically for Turkey's water diplomacy

Integrated Water Resource Management Edson de Oliveira Vieira, Samuel Sandoval-Solis, Valmir de Albuquerque Pedrosa, J. Pablo Ortiz-Partida, 2019-06-12 This book presents case studies that share important experiences regarding Integrated Water Resource Management IWRM in various countries Following an introduction to theoretical concepts responsibilities and challenges the subsequent chapters address among other topics an analysis of policies and regulations for water management in Brazil the drivers that led California to adapt to the IWRM framework and the international regulations for water markets and water banking in Australia and Chile The implications of climate change for water resource systems in Mexico are discussed as well as management strategies from California that could potentially serve as IWRM adaptation schemes in Mexico Critical cases from Guanacaste Costa Rica and from Zayandehrud River Basin and Lake Urmia Iran are reviewed in terms of management practices and solutions The book also provides an overview of the current availability and use of water resources in South Korea and discusses the management of and international water law instruments for transboundary groundwater in Africa

River Basin Organizations in Water Diplomacy Anoulak Kittikhoun, Susanne Schmeier, 2020-11-19 Will tensions and disputes among states sharing international water courses and lakes turn into active conflicts Addressing this question the book shows that these concerns are more prominent due to the locations and underlying political dynamics of some of these large rivers and the strategic interests of major powers Written by a combination of leading practitioners and academics this book shows that states are more prone to cooperate and manage their transboundary issues over the use of their common water resources through peaceful means and the key institutions they employ are international river basin organizations RBOs Far from being mere technical institutions RBOs are key mechanisms of water diplomacy with capacity and effectiveness varying on four key interrelated factors their legal and institutional development and the influence of their technical and strategic resources The basins analyzed span all continents

from both developed and developing basins including the Columbia Great Lakes Colorado Senegal Niger Nile Congo Jordan Helmand Aral Sea Mekong Danube and Rhine Contributing to the academic discourse on transboundary water management and water conflict and cooperation the book provides insights to policy makers on which water diplomacy engagements can be successful the strengths to build on and the pitfalls to avoid so that shared water resources are managed in a cooperative sustainable and stable way

Free flow UNESCO,2013-10-17 Water is an essential resource for mankind and our ecosystems Free Flow is a fully illustrated book with over 100 authors work on water management and cooperation at international regional national municipal and local levels Their commentaries draw upon experiences around the world reflecting how people are changing their interaction with water to improve sustainable development The publication reflects progresses and challenges in these fields highlighting good practices in a wide variety of societies and disciplines The book strives to project experiences into future actions and encourages further institutional commitments to better understanding of and more effective management of water cooperation in order to achieve sustainable development

Handbook of HydroInformatics Saeid Eslamian, Faezeh Eslamian, 2022-11-30 Classic Soft Computing Techniques is the first volume of the three in the Handbook of HydroInformatics series Through this comprehensive 34 chapters work the contributors explore the difference between traditional computing also known as hard computing and soft computing which is based on the importance given to issues like precision certainty and rigor The chapters go on to define fundamentally classic soft computing techniques such as Artificial Neural Network Fuzzy Logic Genetic Algorithm Supporting Vector Machine Ant Colony Based Simulation Bat Algorithm Decision Tree Algorithm Firefly Algorithm Fish Habitat Analysis Game Theory Hybrid Cuckoo Harmony Search Algorithm Honey Bee Mating Optimization Imperialist Competitive Algorithm Relevance Vector Machine etc It is a fully comprehensive handbook providing all the information needed around classic soft computing techniques This volume is a true interdisciplinary work and the audience includes postgraduates and early career researchers interested in Computer Science Mathematical Science Applied Science Earth and Geoscience Geography Civil Engineering Engineering Water Science Atmospheric Science Social Science Environment Science Natural Resources and Chemical Engineering Key insights from global contributors in the fields of data management research climate change and resilience insufficient data problem etc Offers applied examples and case studies in each chapter providing the reader with real world scenarios for comparison

Introduces classic soft computing techniques necessary for a range of disciplines *Encyclopedia of Geography* Barney Warf, 2010-09-21 Simply stated geography studies the locations of things and the explanations that underlie spatial distributions. Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them. With more than 1 200 entries the *Encyclopedia of Geography* reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life. The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century.

Key Features Gives a concise historical sketch of geography's long rich and fascinating history including human geography, physical geography and GIS. Provides succinct summaries of trends such as globalization, environmental destruction, new geospatial technologies and cyberspace. Decomposes geography into the six broad subject areas: physical geography, human geography, nature and society, methods, models and GIS, history of geography and geographer biographies, geographic organizations and important social movements. Provides hundreds of color illustrations and images that lend depth and realism to the text. Includes a special map section.

Key Themes Physical Geography, Human Geography, Nature and Society, Methods, Models and GIS, People, Organizations and Movements, History of Geography. This encyclopedia strategically reflects the enormous diversity of the discipline, the multiple meanings of space itself and the diverse views of geographers. It brings together the diversity of geographical knowledge, making it an invaluable resource for any academic library.

[The Human Right to Water](#) Nandita Singh, 2016-10-06 The discourse on the human right to water presents deliberations on the concept, content and rationale for the right, with little attention to the practical question of translating the right into reality. This book aims to fill this void by focusing on realization of the right by its holders, examining how effective the mechanisms are for implementing the right in enabling its universal realization. In a quest to answer this question, the book draws a conceptual differentiation between implementation and realization of the right, arguing that unlike implementation, which is an objective process of creation and implementation of measures such as legal frameworks, institutional structures or policy and action guidelines, realization of the right is a subjective process that extends much beyond. It takes shape within specific contextual settings which may include varied situations yet remains neglected in the related academic and action forums. This book attempts to address this void by discussing some of the most significant contexts and the underlying problems and concerns that strongly influence realization of the human right to water. It contends that if the right is to be truly realized, these different contexts, which can be further classified as objective and subjective, must be understood, analysed and appropriately addressed before framing and implementing relevant action. The book further situates the human right to water discourse in a broader interdisciplinary perspective, expanding its scope beyond the narrower legal dimensions, linking it to the wider field of water resources management governance. Through the novel ideas it proposes, the book makes an innovative and unique

contribution in the field of human right to water which is of great scientific value

China and Transboundary Water

Politics in Asia Hongzhou Zhang, Mingjiang Li, 2017-12-14 Water related conflicts have a long history and will continue to be a global and regional problem Asia with 1.5 billion of its people living in shared river basins and with very few transboundary rivers governed by treaties is especially prone to such conflicts The key to mitigating transboundary water conflicts and advancing cooperation in Asia is largely in the hands of China the upstream country for most of Asia's major transboundary rivers To avert the looming water crisis apart from spending billions of dollars on domestic water transfer projects such as the South North Water Diversion Megaproject as well as on water conservancy and pollution abatement China has sought to utilize the water resources of the major rivers that run across borders with neighbouring countries On these transboundary rivers China has built or plans to build large dams for hydroelectricity and major water diversion facilities which has triggered anxiety and complaints from downstream countries and criticism from the international society This book aims to systematically examine the complex reality of water contestations between China and its neighbouring countries It provides a discussion on transboundary hydropolitics beyond the state centric geopolitical perspective to dig into various political institutional legal historical geographical and demographic factors that affect China's policies and practices towards transboundary water issues This book also provides a collection of comparative case studies on China's water resources management on the Mekong River with other five riparian states in the Lower Mekong region the Salween River with Myanmar the Brahmaputra River with India the Amur River with Russia and Mongolia the Illy and Irtys Rivers with Kazakhstan and the Yalu and Tumen Rivers with North Korea Furthermore this book sheds light on China's future role in global water governance

Advances in Groundwater Governance Karen G. Villholth, Elena Lopez-Gunn, Kirstin

Conti, Alberto Garrido, Jac Van Der Gun, 2017-12-14 This book addresses groundwater governance a subject internationally recognized as crucial and topical for enhancing and safeguarding the benefits of groundwater and groundwater dependent ecosystems to humanity while ensuring water and food security under global change The multiple and complex dimensions of groundwater governance are captured in 28 chapters written by a team of leading experts from different parts of the world and with a variety of relevant professional backgrounds The book aims to describe the state of the art and latest developments regarding each of the themes addressed paying attention to the wide variation of conditions observed around the globe The book consists of four parts The first part sets the stage by defining groundwater governance exploring its emergence and evolution framing it through a socio ecological lens and describing groundwater policy and planning approaches The second part discusses selected key aspects of groundwater governance The third part zooms in on the increasingly important linkages between groundwater and other resources or sectors and between local groundwater systems and phenomena or actions at the international or even global level The fourth part finally presents a number of interesting case studies that illustrate contemporary practice in groundwater governance In one volume this highly

accessible text not only familiarizes water professionals decision makers and local stakeholders with groundwater governance but also provides them with ideas and inspiration for improving groundwater governance in their own environment
