Transcendental Ontology Markus Gabriel, 2011-06-09 Transcendental Ontology in German Idealism Schelling and Hegel sheds remarkable light on a question central to post Kantian philosophy after the Copernican Revolution in philosophy what can philosophy say about the world or reality as such What remains of ontology's task after Kant This is a question often overlooked in contemporary scholarship on German Idealism Markus Gabriel offers a refreshing reinvigoration of a range of questions concerning scepticism corporeality freedom the question of being the absolute and the modal status of our determinations and judgments all crucial to our understanding of the truly radical nature of post Kantian philosophy Gabriel's assessment of the experiments undertaken in post Kantian ontology reaffirms Schelling's and Hegel's place at the heart of contemporary metaphysics The book shows how far we still have to go in mining the thought of Hegel and Schelling and how exciting as a result we can expect twenty first century philosophy to be

The Economic Philosophy of the Internet of Things James Juniper, 2018-06-27 To properly understand the nature of the digital economy we need to investigate the phenomenon of a ubiquitous computing system UCS As defined by Robin Milner this notion implies the following characteristics i it will continually make decisions hitherto made by us ii it will be vast maybe 100 times today's systems iii it must continually adapt on line to new requirements and iv individual UCSs will interact with one another This book argues that neoclassical approaches to modelling economic behaviour based on optimal control by representative agents are ill suited to a world typified by concurrency decentralized control and interaction To this end it argues for the development of new process based approaches to analysis modelling and simulation The book provides the context both philosophical and mathematical for the construction and application of new rigorous and meaningful analytical tools In terms of social theory it adopts a Post Cognitivist approach the elements of which include the nature philosophy of Schelling Marx's critique of political economy Peircean Pragmatism Whitehead's process philosophy and Merleau Ponty's phenomenology of the flesh along with cognitive scientific notions of embodied cognition and neural Darwinism as well as more questionable notions of artificial intelligence

that are encompassed by the rubric of perception and action without intelligence **Adorno and the Ends of Philosophy** Andrew Bowie, 2013-10-07 Theodor Adorno's reputation as a cultural critic has been well established for some time but his status as a philosopher remains unclear In *Adorno and the Ends of Philosophy* Andrew Bowie seeks to establish what Adorno can contribute to philosophy today Adorno's published texts are notably difficult and have tended to hinder his reception by a broad philosophical audience His main influence as a philosopher when he was alive was though often based on his very lucid public lectures Drawing on these lectures both published and unpublished Bowie argues that important recent interpretations of Hegel and related developments in pragmatism echo key ideas in Adorno's thought At the same time Adorno's insistence that philosophy should make the Holocaust central to the assessment of modern rationality suggests ways in which these approaches should be complemented by his preparedness to confront some of the most disturbing aspects of modern history What emerges is a remarkably clear and engaging re-interpretation of Adorno's thought as well as an illuminating and original review of the state of contemporary philosophy *Adorno and the Ends of Philosophy* will be indispensable to students of Adorno's work at all levels This compelling book is also set to ignite debate surrounding the reception of Adorno's philosophy and bring him into the mainstream of philosophical debate at a time when the divisions between analytical and European philosophy are increasingly breaking down [The Impact of Idealism: Volume 3, Aesthetics and Literature](#) Nicholas Boyle, Liz Disley, Christoph Jamme, Ian Cooper, 2013-11-21 The first study of its kind *The Impact of Idealism* assesses the impact of classical German philosophy on science religion and culture This third volume explores German Idealism's impact on the literature art and aesthetics of the last two centuries Each essay focuses on the legacy of an idea or concept from the high point of German philosophy around 1800 tracing out its influence on the intervening period and its importance for contemporary discussions As well as a broad geographical and historical range including Greek tragedy George Eliot Thomas Mann and Samuel Beckett and key musicians and artists such as Wagner Andy Warhol and Frank Lloyd Wright the volume's thematic focus is broad Engaging closely with the key aesthetic texts of German Idealism this collection uses examples from literature music art architecture and museum studies to demonstrate Idealism's continuing influence [Schelling's Philosophy](#) G. Anthony Bruno, 2020-03-26 The current wave of critical and historical engagement with idealist texts affords an unprecedented opportunity to discover the richness and value of the thought of F W J Schelling In this volume leading scholars offer compelling reasons to regard Schelling as one of Kant's most incisive interpreters a pioneering philosopher of nature a resolute philosopher of human finitude and freedom a nuanced thinker of the bounds of logic and self-consciousness and perhaps Hegel's most effective critic The volume provides a wide-ranging presentation of Schelling's original contribution to and internal critique of the basic insights of German idealism his role in shaping the course of post-Kantian thought and his sensitivity and innovative responses to questions of lasting metaphysical epistemological ethical aesthetic and theological importance [Idealism, Relativism, and Realism](#) Dominik Finkelde, Paul M.

Livingston,2020-05-05 Several debates of the last years within the research field of contemporary realism known under titles such as New Realism Continental Realism or Speculative Materialism have shown that science is not systematically the ultimate measure of truth and reality This does not mean that we should abandon the notions of truth or objectivity all together as has been posited repeatedly within certain currents of twentieth century philosophy However within the research field of contemporary realism the concept of objectivity itself has not been adequately refined What is objective is supposed to be true outside a subject s biases interpretations and opinions having truth conditions that are met by the way the world is The volume combines articles of internationally outstanding authors who have published on either Idealism Epistemic Relativism or Realism and often locate themselves within one of these divergent schools of thought As such the volume focuses on these traditions with the aim of clarifying what the concept objectivity nowadays stands for within contemporary ontology and epistemology beyond the analytic continental divide With articles from Jocelyn Benoist Ray Brassier G Anthony Bruno Dominik Finkelde Markus Gabriel Deborah Goldgaber Iain Hamilton Grant Graham Harman Johannes H bner Andrea Kern Anton F Koch Martin Kusch Paul M Livingston Paul Redding Sebastian R dl Dieter Sturma *Daoist Resonances in Heidegger* David Chai,2022-05-05 East Asian imagery resonates throughout Martin Heidegger s writings In this exploration of the connections between Daoism and his thought an international team of scholars consider why the Daodejing and Zhuangzi were texts he returned to repeatedly and the extent Heidegger adhered to Daoism s core doctrines They discuss how Daoist thought provided him with a new perspective equipping him with images concepts and meanings that enabled him to continue his questioning of the nature of being Exploring the environment language death temporality aesthetics and race from the groundlessness of non being oneness and the Way they illustrate how these themes reverberate with ontological spiritual and epistemological potential A lesson in the art of Daoist and cross cultural ways of thinking this collection marks the first sustained analysis of the influence of classical Daoism on a major 20th century German philosopher

A Reading of Gilles Deleuze's Logic of Sense Mehdi Parsa,2022-11-07 This is a reading of Gilles Deleuze s masterpiece Logic of Sense It provides a thorough and systematic reading of Deleuze s book by focusing on the aspects that are neglected in the existing literature Specifically the claim that Deleuze s Logic of Sense provides a convincing answer for the most important question of the history of philosophy regarding the relation between thought and existence as well as the relation between logic and ontology is defended The answer is that if thought is related to existence logic is supposed to be not the logic of essence but rather the logic of sense This analysis s pursued respectively through Deleuze s readings of Frege the ancient Stoics Lewis Carroll Kant Lautman Leibniz and Melanie Klein **Markus Gabriel's New Realism** Jan Voosholz,2024-12-02 This is the first volume focused on Markus Gabriel s version of New Realism which spans the fields of metaphysics ontology philosophy of mind epistemology philosophy of science and meta philosophy Most of the selected contributions are directly or indirectly concerned with Gabriel s fields of sense ontology his version of a thoroughly realistic

pluralism While some take up criticisms from previous debates surrounding Gabriel's philosophy and New Realism in general others advance completely new and innovative challenges for this highly systematic thinker Overall the contributions provide both a substantive commentary on Gabriel's work and a multifaceted critical assessment of its underlying ideas The book is not only an essential addition to the debate surrounding New Realism but also furthers the discussions about naturalism deflationist ontologies contextualism and mereological arguments to which Gabriel's work has contributed in recent years

Schelling, Freedom, and the Immanent Made Transcendent Daniele Fulvi, 2023-09-28 This book offers a cutting edge interpretation of the philosophy of F W J Schelling by critically reconsidering the interpretations of some of his successors It argues that Schelling's philosophy should be read as an ontology of immanence highlighting its relevance for ongoing debates on ethics and freedom The book builds on a key notion from Schelling's Philosophy of Revelation where he outlines the process through which transcendence must return to immanence in order to be grasped and understood The author identifies Jaspers Heidegger and Deleuze as the main interpreters of Schelling's philosophical activity highlighting their relevance for subsequent Schelling scholarship Heidegger and Jaspers refer to Schelling's philosophy in negative terms namely as an incomplete and unviable philosophical system whereas Deleuze holds the immanent core of Schelling's ontological discourse in high regard The author's analysis demonstrates that reading Schelling's philosophy as an ontology of immanence not only avoids Heidegger's and Jaspers's criticisms but is also more fitting to Schelling's original meaning Accordingly his reading allows us to fully grasp Schelling's thought in all its strength and consistency as a philosophy that avoids metaphysical abstractions and maintains the concreteness of concepts like God nature freedom by binding them to a solid and material account of Being Finally the author uses Schelling to propose an innovative reading of freedom as a matter of resistance and of philosophy as an activity whose main purpose is that of seeking the actual extent and place of human life and freedom within nature The author originally emphasises the relevance of these conclusions on contemporary debates in Postcolonial Critical Theory and Environmental Ethics Schelling Freedom and the Immanent Made Transcendent From Philosophy of Nature to Environmental Ethics will appeal to scholars and advanced students working in 19th century

Schelling's Naturalism Ben Woodard, 2018-12-06 Using Schelling's philosophy Ben Woodard examines how an expanded form of naturalism changes how we conceive of the division between thought and world mathematics and motion sense and dynamics experiment and materiality as well as speculation and pragmatism Nature in Schelling's eyes is not the great outdoors or some authentic pastoral realm but the various powers processes and tendencies which run through biology chemistry physics and the very possibility of thought itself

Hegel's Concept of Life Karen K. Ng, 2020 This book provides a new interpretation of Hegel's philosophy arguing that his theory of reason and thinking revolve around the concept of organic life Through a detailed analysis of Hegel's philosophy and Kant's influence Karen Ng shows that Hegel's unique contribution is that cognitive capacities are indexed to species capacities where embodiment and the relation to the environment are central in processes of mind

Fictions Markus Gabriel, 2024-03-12 From ancient philosophy to contemporary theories of fiction it is a common practice to relegate illusory appearances to the realm of the non-existent like shadows on the wall of Plato's cave Contrary to this traditional mode of drawing a metaphysical distinction between reality and fiction Markus Gabriel argues that the realm of the illusory fictional imaginary and conceptually indeterminate is as real as it gets Being in touch with reality need not and cannot require that we overcome appearances in order to grasp a meaningless reality which exists out there outside and maybe even beyond our minds Human mindedness Geist exists in the mode of fictions through which we achieve self-consciousness This novel

approach provides a fresh perspective on our existence as subjects who lead their lives in the light of self conceptions Fictions also develops a social ontology according to which the social unfolds as a constant renegotiation of dissent of different points of view onto the same reality Thus we cannot ever hope to ground human society in a fiction free realm of objective transactions However this does not mean that truth and reality are somehow outdated concepts On the contrary we need to enlarge our conception of reality so that it fully encompasses ourselves as specifically minded social animals This major new work of philosophy will be of interest to students and scholars throughout the humanities and to anyone interested in contemporary philosophy and social thought

Phenomenology and the Transcendental Sara Heinämaa, Mirja Hartimo, Timo Miettinen, 2014-04-03 The aim of this volume is to offer an updated account of the transcendental character of phenomenology The main question concerns the sense and relevance of transcendental philosophy today What can such philosophy contribute to contemporary inquiries and debates after the many reasoned attacks against its idealistic aprioristic absolutist and universalistic tendencies voiced most vigorously by late 20th century postmodern thinkers as well as attacks against its apparently circular arguments and suspicious metaphysics launched by many analytic philosophers Contributors also aim to clarify the relations of transcendental phenomenology to other post Kantian philosophies most importantly to pragmatism and Wittgenstein's philosophical investigations Finally the volume offers a set of reflections on the meaning of post transcendental phenomenology

A New German Idealism Adrian Johnston, 2018-05-01 In 2012 philosopher and public intellectual Slavoj Žižek published what arguably is his magnum opus the one thousand page tome *Less Than Nothing: Hegel and the Shadow of Dialectical Materialism* A sizable sequel appeared in 2014 *Absolute Recoil: Towards a New Foundation of Dialectical Materialism* In these two books Žižek returns to the German idealist G W F Hegel in order to forge a new materialism for the twenty first century Žižek's reinvention of Hegelian dialectics explores perennial and contemporary concerns humanity's relations with nature the place of human freedom the limits of rationality the roles of spirituality and religion and the prospects for radical sociopolitical change In *A New German Idealism* Adrian Johnston offers a first of its kind sustained critical response to *Less Than Nothing* and *Absolute Recoil* Johnston a leading authority on and interlocutor of Žižek assesses the recent return to Hegel against the backdrop of Kantian and post Kantian German idealism He also presents alternate reconstructions of Hegel's positions that differ in important respects from Žižek's version of dialectical materialism In particular Johnston criticizes Žižek's deviations from the secular naturalism and Enlightenment optimism of his chosen sources of inspiration not only Hegel but Karl Marx and Sigmund Freud too In response Johnston develops what he calls transcendental materialism an antireductive and leftist materialism capable of preserving and advancing the core legacies of the Hegelian Marxian and Freudian traditions central to Žižek
