Transference and Countertransference Today Robert Oelsner,2013-06-26 Why has Heinrich Racker's original work on transference and countertransference proven so valuable With a passionate concern for the field created by the meeting of analyst and patient and an abiding interest in the central importance of transference and countertransference in analytic practice Robert Oelsner has brought together the thought and work of seventeen eminent analysts from Europe the United States and Latin America In new essays commissioned for this volume the writers have set aside the lines that can often divide psychoanalytic groups and schools in order to examine in depth the variety of approaches and responses that characterize the best analytic practice today The result is a collection of fresh contemporary material centred on the two interrelated subjects transference and countertransference that make up the core of psychoanalytic work Both in the clarity of their language and in moving clinical examples the writers reveal in distinctively personal ways how Heinrich Racker's original thought which brought the analyst's unconscious responses into the equation has allowed them to evolve their own perspectives Yet it is particularly interesting to find unexpected parallels among the chapters that point toward a shared vision Clearly whether in work with adults or children transference and countertransference are now seen as encompassing a field that embraces both participants in the consulting room Making Transference and Countertransference Today still more valuable as a resource for teachers and students are several major contributions by authors whose work is not otherwise readily available in English Psychoanalysts and others will find few other books that present such a thoughtful picture of these crucial and fascinating analytic topics **Analyst-Patient Interaction** Michael Fordham,2003-09-02 This volume brings together Michael Fordham's key writings on analytical technique These important contributions have shaped and

Resilience, Suffering and Creativity Aida Alayarian, 2018-04-24 The trauma of refugee status is particularly corrosive It does the usual harm of devastating our own self image and sense of permanence in the world but it does more It is a dislocation from our familiar domestic geography and culture and that must wrench from our grasp all the external markers by which we know ourselves and our worth The threat of persecution torture and death is aimed at a complete destabilization The result is a complex of anxieties that add up to far more than simple suffering If therapy is primarily aimed at the gentle exposure of one's worst fears then what purchase can it have on this most ungentle process of becoming a refugee
