wealth of an order previously confined to the elite with the consequence that ownership of ordinary physical goods is no longer a distinguishing factor. Instead, people are now seeking the extraordinary, with examples being bodies enhanced through surgery, personal fitness trainers, and in the case of leisure and tourism, seeking unique and unusual places to visit and activities to undertake. This trend manifests in the increasing consumption of services and the addition of experiential elements to physical goods by businesses aware of societal changes. The trend is enhanced by rapidly changing technology and economic production methods providing new sectors of the world's population with access to the consumption experiences that are repeatedly featured in the media. This is the experience economy, characterised by a search by consumers for fantasies, feelings, and fun. This book was based on a special issue of *Journal of Hospitality Marketing Management*.

Transformative Intercultural Global Education Barreto, Isabel María Gómez, Roman Etxebarrieta, Gorka, 2024-05-13

In this tumultuous world characterized by unprecedented migratory movements, societal evolution intersects with an increasing diversity that presents profound challenges. The global landscape is marked by 33 armed conflicts in 2022 alone, resulting in forced displacement and an exceeding count of 100 million displaced individuals worldwide. The traditional understanding of migration as a response to individualized prosecution has expanded to encompass survival migration incorporating environmental change and livelihood collapse. This paradigm shift necessitates a reevaluation of human rights and a compelling call for transformative global and intercultural education to address the vulnerabilities, inequities, and discrimination faced by displaced and native youth. Transformative Intercultural Global Education is a project aimed at shedding light on educational inequalities stemming from race, migration, forced displacement, and cultural factors. Through innovative empirical results, theoretical frameworks, and educational practices, this book seeks to contribute to quality education and subsequently a more sustainable society. The objective is to provide educators with proposals that strengthen educational policies and programs aligned with global citizenship, fostering sensitivity, critical thinking, and commitment towards respectful and tolerant coexistence. The research outcomes are designed to encourage actions that promote equity, social justice, and the sustainable development of a global society.
