Trauma Case Studies For The Paramedic:

Trauma Case Studies for the Paramedic Stephen J. Rahm, 2005 This text is intended to reinforce the importance of a systematic patient assessment and management approach to paramedic students by presenting them with 20 case studies on the most important trauma emergencies they are likely to encounter in the field emergencies **Medical Case Studies for**

the Paramedic Stephen J. Rahm, 2004 Paramedics must perform a systematic assessment of the patient determine appropriate treatment and give it While assessment and management principles are learned in initial training they are not practiced until training is completed Now paramedic students can apply these principles with Medical Case Studies for the Paramedic Medical Case Studies for the Paramedic presents 20 case studies on the most important medical emergencies for the ALS level reader A superb supplement to classroom and textbook learning this book allows the reader to practice applying knowledge to cases before actually going on an emergency call The types of emergencies include a range of presentations such as semiconsciousness unconsciousness difficulty breathing weakness nausea headache slurred speech chest pain allergic reaction seizure and anxiety Each case study is presented in full poses questions to the reader and is followed by a summary of the case including answers to the questions posed The objectives for each of the case studies in this book are as follows Describe the appropriate initial management based on initial assessment findings Interpret the patient's cardiac rhythm and determine if a correlation exists between the patient's condition and their cardiac rhythm Formulate a field impression based on the patient's signs and symptoms and findings of the focused history and physical examination Determine if the patient's vital sign values and SAMPLE history findings are consistent with your field impression Identify specific treatment that is required for the patient's condition Determine if further treatment is required following a post treatment reassessment of the patient Based on the patient's condition identify any special considerations for care **Pediatric Case Studies for the Paramedic** Stephen J. Rahm, 2006 Children are not simply adults They commonly present with unique problems that are typically not encountered in older patients These unique problems require the paramedic to alter to some degree his or her approach to the sick or injured child Because a relatively small percentage of EMS calls involve a critically ill or injured child it is common for the paramedic to experience anxiety when such a call is received Pediatric Case Studies for the Paramedic contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field **Paramedic Case Studies** Richard Pilbery, 2021-12-01 A fun and informative approach to learning this book brings together a range of case studies from within prehospital care covering various conditions and situations which you may face working in an ambulance setting Paramedic Case Studies will guide you through a number of detailed and descriptive scenarios putting you at the centre of the action each accompanied by full colour illustrations to help set the scene and aid your understanding Readers are encouraged to think critically through what would you do next questions highlighting appropriate actions for each situation and how to achieve the best outcomes for

your patient Originally published as monthly instalments in Standby CPD each case study has been brought up to date with the latest guidance and research It also features brand new content not published anywhere else before Evidence based throughout each chapter provides up to date discussions on treatment and management as well as in depth information on anatomy physiology and pathophysiology Topics include Airway and breathing Circulation Disability Exposure Medical emergencies Trauma Obstetrics and gynaecology Paediatrics Mental health Older people This unique book is an essential resource for anyone working in the ambulance service who wants to test their knowledge of current and frequently encountered areas of paramedic practice as well as those who are not yet qualified
