Wiring Prometheus History Globalisation And Technology None:

Wiring Prometheus Peter J. Lyth, Helmuth Trischler, 2004 The editors of this volume point out that globalization calls for global history history that treats the planet as a single complex entity Several of the chapters address the origins of globalization s first wave in the 19th century focusing on the interrelationship between economics and the spread of three pioneering inventions the steam engine the telegraph and the telephone Others chronicle the late twentieth century textile and bicycle industries the development of the ATM machine railroad modernization in France major software disasters and the culturally empowering effects of the cassette tape And three authors make fundamental arguments about the nature of globalization s changes how the ties binding Europeans have evolved from patronage to connections to networks how global interconnectedness has eliminated differences in the perception of time and how the key to understanding the dynamics of globalization lies in the local application of standardized technology

Southeast European Studies in a Globalizing World Christian Promitzer, Siegfried Gruber, Harald Heppner, 2014 Since the early 1990s Southeast European studies have undergone profound changes being shaped by the wars of Yugoslav succession and the ramifications of post socialism coupled with democratic deficiencies which characterize most of Southeast Europe The countries which it encompasses rest uneasily on the periphery of the developed variant of Western capitalism but they have nonetheless to contend with the challenges of adjusting to a market economy The imprint of these contexts on academic research has led to a discussion of the role of Southeast European studies It is the task of this volume to summarize and raise awareness of this discussion

Series Studies on South East Europe Vol 16 Subject European Studies Sociology Politics [Alexandre Dumas as a French Symbol since 1870](#) Eric Martone, 2020-03-17 Nineteenth century writer Alexandre Dumas 1802 1870 author of The Three Musketeers and The Count of Monte Cristo has been a controversial part of the French patrimony and faced various forms of racial prejudice in France because of his biracial ancestry and due to being a descendant of a slave During the late nineteenth century the rise of scientific racism and aggressive European imperialism resulted in worldviews supporting European superiority and equated European with being white Such developments complicated perceptions of Dumas as part of the French patrimony French intellectuals and politicians from the late nineteenth century onward created their own imaginative visions of what Dumas had represented in order to employ them ideologically to support or counter prevailing mainstream views of French history and identity This collection traces the evolution of Dumas s legacy as a controversial symbol of France since 1870 as the nation has struggled to deal with colonialism and its aftermath and increased diversity and globalization

[Transformations of Retailing in Europe after 1945](#) Lydia Langer, 2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post war economic boom the emergence of a mass consumer society and the adaptation of innovations which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending But the

implementation of self service and the supermarket the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe This volume presents a series of case studies looking at transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing

Society and Technological Change Rudi Volti, Jennifer Croissant, 2024-03-19 Society and Technological Change continues to be the essential text for exploring the relationship between human societies and the ever evolving landscape of technology The ninth edition follows the historical trajectory of technological development and its profound impact on various aspects of human life from communication and healthcare to economic systems and governance At the same time it shows how these technologies have themselves been shaped by social economic cultural and political forces and that the study of technology is important not just for its own sake but also for what it tells us about the kinds of societies we make for ourselves With its engaging writing style and thought provoking content this new edition continues to be an indispensable resource for students scholars and anyone seeking a deep understanding of the intricate bond between society and technology in our ever evolving world

Water Jeremy J. Schmidt, 2019-04-01 An intellectual history of America s water management philosophy Humans take more than their geological share of water but they do not benefit from it equally This imbalance has created an era of intense water scarcity that affects the security of individuals states and the global economy For many this brazen water grab and the social inequalities it produces reflect the lack of a coherent philosophy connecting people to the planet Challenging this view Jeremy Schmidt shows how water was made a resource that linked geology politics and culture to American institutions Understanding the global spread and evolution of this philosophy is now key to addressing inequalities that exist on a geological scale Water Abundance Scarcity and Security in the Age of Humanity details the remarkable intellectual history of America s water management philosophy It shows how this philosophy shaped early twentieth century conservation in the United States influenced American international development programs and ultimately shaped programs of global governance that today connect water resources to the Earth system Schmidt demonstrates how the ways we think about water reflect specific public and societal values and illuminates the process by which the American approach to water management came to dominate the global conversation about water Debates over how human impacts on the planet are connected to a new geological epoch the Anthropocene tend to focus on either the social causes of environmental crises or scientific assessments of the Earth system Schmidt shows how when it comes to water the two are one and the same The very way we think about managing water resources validates putting ever more water to use for some human purposes at the expense of others

Make / Believe John Hartley, 2025-01-23 This book illustrates that mediated popular culture and

science based knowledge systems entangled and compromised as both have become are still a robust crucible for system change for the future when they combine forces Planetary crises require responses from everyone This means that collective action is not simply a scientific or political problem It is a problem of culture and media But modern politics journalism and science were not designed for global climate action They've divided humans into competitive and often hostile we and they groups Identity news and knowledge are all weaponized Culture makes groups groups make knowledge and knowledge makes enemies What can be done to prevent global conflict and the drift to war Make Believe turns to popular culture and social media to argue for an alternative storyline While the Great Powers are making new enemies emergent classes led by children are using planetary connectivity to make new worlds A digital planet generates new kinds of strategic stories for pan human action based on difference intersectionality and cooperation for a sustainable Earth system Make Believe shows how alternatives to the Great Game of global contestation are gathering strength in unlikely places among women children lifestyle and pop culture Popular digital media literacy is now a prerequisite for the remediation of the planet
