Women And Ageing In British Society Since 1500 Women And Men In History:

Women and Ageing in British Society since 1500 Lynn Botelho, Pat Thane, 2014-07-30 Women have always made up the majority of older people this examination of the lives of elderly women in Britain in the period 1500 to the present reveals attitudes towards the ageing process It sheds light on household structures as well as wider issues including the history of the family the process of industrialisation the poor law and welfare provision and questions many common beliefs about elderly women particularly that female old age was a time of poverty and want An important book for students of history and sociology alike

Female Patients in Early Modern Britain Wendy D. Churchill, 2016-04-15 This investigation contributes to the existing scholarship on women and medicine in early modern Britain by examining the diagnosis and treatment of female patients by male professional medical practitioners from 1590 to 1740 In order to obtain a clearer understanding of female illness and medicine during this period this study examines ailments that were specific and unique to female patients as well as illnesses and conditions that afflicted both female and male patients Through a qualitative and quantitative analysis of practitioners records and patients writings such as casebooks diaries and letters an emphasis is placed on medical practice Despite the prevalence of females amongst many physicians casebooks and the existence of sex based differences in the consultations diagnoses and treatments of patients there is no evidence to indicate that either the health or the medical care of females was distinctly disadvantaged by the actions of male practitioners Instead the diagnoses and treatments of women were premised on a much deeper and more nuanced understanding of the female body than has previously been implied within the historiography In turn their awareness and appreciation of the unique features of female anatomy and physiology meant that male practitioners were sympathetic and accommodating to the needs of individual female patients during this pivotal period in British medicine

Old Age in the Middle Ages and the Renaissance Albrecht Classen, 2012-02-14 After an extensive introduction that takes stock of the relevant research literature on Old Age in the Middle Ages and the early modern age the contributors discuss the phenomenon of old age in many different fields of late antique medieval and early modern literature history and art history Both Beowulf and the Hildebrandslied both Wolfram von Eschenbach's Parzival and Titivillus both the figure of Merlin and the trans European tradition of Perceval Peredur Parzival then the figure of the vetula in a variety of medieval French English and Spanish texts and of the Old Man in The Stricker's Daniel both the treatment of old age in Langland's Piers the Plowman and in Jean Gerson's sermons are dealt with Other aspects involve late antique epistolary literature early modern French farce in light of Disability Studies the social role of old impotent men in sixteenth and seventeenth century Netherlandish paintings and the scientific discourse of old age and health since the 1500s The discourse of Old Age proves to have been of central importance throughout the ages so the critical examination of the issues involved sheds intriguing light on the cultural history from late antiquity to the seventeenth century

Old Age in English History Pat Thane, 2000-05-11 At the end of the twentieth century more people are living into their seventies

eighties nineties and beyond a process expected to continue well into the next millennium The twentieth century has achieved what people in other centuries only dreamed of many can now expect to survive to old age in reasonably good health and can remain active and independent to the end in contrast to the high death rate ill health and destitution which affected all ages in the past Yet this change is generally greeted not with triumph but with alarm It is assumed that the longer people live the longer they are ill and dependent thus burdening a shrinking younger generation with the cost of pensions and health care It is also widely believed that the past saw few survivors into old age and these could be supported by their families without involving the taxpayer In this first survey of old age throughout English history these assumptions are challenged Vivid pictures are given of the ways in which very large numbers of older people lived often vigorous and independent lives over many centuries The book argues that old people have always been highly visible in English communities and concludes that as people live longer due to the benefits of the rise in living standards far from being burdens they can be valuable contributors to their family and friends

Female Economic Strategies in the Modern World Beatrice Moring, 2015-10-06 This collection of essays looks at the various ways in which women have coped financially in a male dominated world Chapters focus on Europe and Latin America and cover the whole of the modern period

The French Invention of Menopause and the Medicalisation of Women's Ageing Alison M. Downham Moore, 2022-09-22 Doctors writing about menopause in France vastly outnumbered those in other cultures throughout the entire nineteenth century The concept of menopause was invented by French male medical students in the aftermath of the French Revolution becoming an important pedagogic topic and a common theme of doctors professional identities in postrevolutionary biomedicine Older women were identified as an important patient cohort for the expanding medicalisation of French society and were advised to entrust themselves to the hygienic care of doctors in managing the whole era of life from around and after the final cessation of menses However menopause owed much of its conceptual weft to earlier themes of women as the sicker sex of vitalist crisis of the vapours and of astrological climacteric years This is the first comprehensive study of the origins of the medical concept of menopause richly contextualising its role in nineteenth century French medicine and revealing the complex threads of meaning that informed its invention It tells a complex story of how women's ageing featured in the demographic revolution in modern science in the denigration of folk medicine in the unique French field of hygiene and in the fixation on women in the emergence of modern psychiatry It reveals the nineteenth century French origins of the still current medical and alternative health approaches to women's ageing as something to be managed through gynaecological surgery hormonal replacement and lifestyle intervention

Publisher *The Book Review Digest* ,2004 Power and Poverty Susannah R. Ottaway, Lynn A. Botelho, Katharine
Kittredge, 2002-10-30 Despite calls since the 1970s for more research into the history of old age there is still a relative dearth
of historical studies on the elderly especially in the pre industrial past This volume remedies much of that deficiency with
essays exploring the lives of old men and old women and the images of old age and aging in early modern Europe and
America Collectively the chapters demonstrate there was a strong association of advanced age with authority in the lived
experience of older men and women This book recognizes poverty and physical limitations were a very real threat but
challenges the tendency of existing literature on historical gerontology to associate old age with dependence and disability
Instead what emerges from this volume is the success of older people in the past in imbuing their old age with dignity despite
the often vicious nature of old age in both popular and elite literature Essays are brought together on old age in early modern
England France Germany Italy Spain and America enabling comparisons that cross geographical boundaries Historians of old
age the family demography social history and cultural history will value this volume as will sociologists and anthropologists
