

Motorcycle Owners Workshop Manuals for Motorcycles are written with the home mechanic in mind who does not have the luxury of a well equipped workshop nor factory service tools. Each manual covers a well defined model range of motorcycles. A second hand example is purchased and is used as the basis for the manual. Before overhaul begins the author undertakes considerable research into the model range and establishes factory talking with the manufacturer, dealer, repair specialists and riders.

Each manual presents the dismantling, overhaul and reassembly in a logical sequence describing the adjustment parts in the minutest detail. The outcome is best described by the following comments of the press.

What the press say...

"...a well illustrated manual written in everyday language..."
Motor Cycle News

"...information is given clearly without assuming you've had a ten year course in engineering..."
Bike

"In each case the author has stripped down and rebuilt an example of each machine learning by practical experience..."
Motorcyclist Illustrated

"...but also to offer very good value for money as well!"
Motorcycle Rider

"They show simple to follow step by step overhauls and are well illustrated"
Motorcycle Mechanics
