Minorities, Scarcity and Conflict Antonio Montañés Jiménez, Camila Ferreira Marinelli, Stavroula Pipyrrou, 2025-07-17 This volume places scarcity as a defining aspect of minorities experience and as a tool to comprehend ongoing and unresolved societal friction and global environmental challenges strategies for survival and reproduction of the status quo and aspirational desires for social mobility The book is an experimental collective intellectual project departing from conventional approaches to scarcity solely as a resource based economic or demographic concept Boldly the book looks at the ways in which disadvantaged social groups navigate their lives through scarcity and how these circumstances are endured interpreted accepted or challenged In a thought provoking turn the book makes a novel contribution to minority studies by engaging with scarcity not only concerning resources but also emotion memory and affect In analysing scarcity as a multidimensional analytical framework and interrogating it from manifold angles the book unpacks uncharted ramifications of debates around scarcity and opens new lines of enquiry The collection will be a valuable resource for academics researchers and policymakers working in the areas of law political anthropology and sociology

The Urban Ecologies of Divided Cities Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers
