Unlocking The Ivory Tower How Management Research Can Transform Your Business:

Unlocking the Ivory Tower Eric R. Ball, Joseph A. LiPuma, 2012 Management is a discipline that can be learned from study. A large and diverse set of academic management research, often accessible only to academics, has practical actionable implications to help in managing an organization today. *Unlocking the Ivory Tower* addresses the major components of academic business literature: strategy, leadership, entrepreneurship, organizational theory, international business, innovation, and finance. Doctors Ball and LiPuma act as field guides and interpreters, bridging the divide between scholarship and practice and distilling each research contribution into a brief outline while preserving the message of that thinker. They also provide context regarding how the particular contribution fits into the rest of the field and how it can be applied in the real world. The result is a rich book that covers a lot of ground and provides a basis for understanding the major schools of thought in primary management fields. Today's managers are faced with responsibilities for functional and staff management as well as developing strategies for growth, leading teams, and staying competitive in evolving industries and markets globally. The range of knowledge and skills required by corporate managers requires the breadth of readily applicable concepts present in this book. Eric and Joe have helped create, develop, and run organizations. They both have executive experience in finance, mergers and acquisitions, and entrepreneurship in international contexts. Each also has invested time publishing in academic journals and teaching business school students in different countries. These authors live in the middle ground as practical academics. *Unlocking the Ivory Tower* is light on anecdotes and heavy on actionable research results, making it an essential reference for both managers and students. This book can serve as an education for those who did not pursue a management degree, a refresher course for those who did, or a way to expand beyond the concepts taught in many MBA programs. In particular, Eric and Joe provide a means for managers to reassess and extend their academic knowledge in the context of their professional experience and for management students to review the major concepts and put them into context with each other. Small Business in a Global Economy Scott L. Newbert, 2015-05-05 This informative set analyzes the dynamics involved with creating, growing, and managing small businesses amid different geographic, institutional, and political environments. This two-volume work explores the behavior and decision making of small companies, their business strategies for launch, growth, and survival, and their contribution to the larger global economy. Utilizing information and data gleaned from proven entrepreneurs and small business operations, this reference provides insight into the political, environmental, and competitive forces that support and impede small business ownership and offers strategies for navigating them. Written by leading researchers from around the world, the set presents a broad view of the small business sector, focusing on conception, ownership, financing, and growth strategies. A look at external factors features the impact of political and environmental influences, extant regulations affecting small firms, and programs for promoting this sector. The first volume takes a micro

view of the small business phenomenon profiling the owner and the skills necessary to be successful The second volume utilizes a macro approach focusing on the operational concerns of and the environment factors bearing upon small businesses

The Model Thinker Scott E. Page, 2018-11-27 Work with data like a pro using this guide that breaks down how to organize apply and most importantly understand what you are analyzing in order to become a true data ninja From the stock market to genomics laboratories census figures to marketing email blasts we are awash with data But as anyone who has ever opened up a spreadsheet packed with seemingly infinite lines of data knows numbers aren't enough we need to know how to make those numbers talk In The Model Thinker social scientist Scott E Page shows us the mathematical statistical and computational models from linear regression to random walks and far beyond that can turn anyone into a genius At the core of the book is Page's many model paradigm which shows the reader how to apply multiple models to organize the data leading to wiser choices more accurate predictions and more robust designs The Model Thinker provides a toolkit for business people students scientists pollsters and bloggers to make them better clearer thinkers able to leverage data and information to their advantage

Building the High-Performance Finance Function de Waal, André, Bilstra, Eelco, Bootsman, Jacques, 2022-02-11 The finance function can be regarded as the spider in the organizational web as it has relations with every part of the organization and is also represented on the executive board Therefore it is of utmost importance that this function takes the lead by quickly transforming itself into a high performance finance function HPFF serving as a role model for other functions in the organization Building the High Performance Finance Function describes the development of the high performance finance function HPFF framework and explores the experiences lessons learned and results achieved by finance functions that have transformed themselves into HPFFs or high performance finance functions using the HPFF framework Covering a range of topics such as excellence in finance and high performance organizations it is ideal for industry professionals teachers researchers academicians practitioners and students

Integral Research and Innovation Dr Alexander Schieffer, Professor Ronnie Lessem, 2012-08-28 The core question underlying Integral Research and Innovation is How can social research be turned into social or indeed integral innovation Complementing their acclaimed Transformation Management this second book in the Transformation and Innovation Series explains how the knowledge creation that underpins transformative processes occurs The authors show how research has to be transformative rather than just informative if it is to contribute usefully to building integrated and sustainable enterprises At a time when business practitioners and others responsible for organizational development are desperate for usable knowledge the authors contend that social science research is failing to support business and management generally Instead academic researchers engage in esoteric arguments about research methodology which do not contribute usefully to the resolution of real world problems Drawing on their experience of environments where researchers and practitioners do engage constructively resulting in research that is active participative and genuinely innovative Professor Lessem and Dr Schieffer are in territory that is far beyond that covered by standard works on research methodology This is a book not just for academics and researchers wanting to make a meaningful contribution but also for reflective practitioners from the corporate organizational and consultancy based worlds who operate in the area of interface between business and management education learning and society and who need to know how research can be used to make a real difference

Business and Management Research Michael John Baker, 2003 **Doing Management Research** Raymond-Alain Thietart, 2001-04-18 This book provides refreshing and powerful insights on the challenges of conducting management research from a European

perspective Particularly for someone embarking on a management research career this book will provide valuable guidelines Ian MacMillan Wharton School of Business University of Pennsylvania This comprehensive volume is distinguished by its balance and pragmatism The authors who present the various research methods are not proponents but researchers who have applied these methods The authors who discuss philosophical and strategic issues are not advocates but researchers who have had to confront these issues in their research Bill Starbuck New York University Doing Management Research is a fabulous contribution to our field Thietart and his colleagues have put together a unique and valuable guide to help management scholars more deeply understand the issues dynamics and contradictions of executing first class managerial research This book will hold an important place on the researcher's desk for years to come Michael Tushman Harvard Business School This is an excellent in depth examination of the conduct of management research It will serve as a valuable resource for management scholars and researchers and is a must read for Ph D students in management Michael Hitt Arizona State University This book will prove to be an excellent guide for those engaged in management research for the first time and an excellent refresher for more experienced scholars Raymond Thietart and his colleagues should be thanked roundly for this comprehensive volume Gordon Walker Southern Methodist University Cox Business School This textbook makes an outstanding contribution to texts on management research For researchers considering management research it offers an extensive guide to the research process Paula Roberts Nurse Researcher Doing Management Research a major new textbook provides answers to questions and problems which researchers invariably encounter when embarking on management research be it quantitative or qualitative This book will carefully guide the reader through the research process from beginning to end An excellent tool for academics and students it enables the reader to acquire and build upon empirical evidence and to decide what tools to use to understand and describe what is being observed and then which methods of analysis to adopt There is an entire section dedicated to writing up and communicating the research findings Written in an accessible and easy to use style this book can be read from cover to cover or dipped into to clarify particular issues during the research process Doing Management Research results from the hands on experience of a large group of researchers who have all had to address the different issues raised when undertaking management research It is anchored in real methodological problems that researchers face in their work This work will also become one of the most useful reference tools for senior researchers who are looking for answers to epistemological or methodological problems R&D
