Studies Human Geography Political Ecology and Asian Politics **Environmental Resources Use and Challenges in Contemporary Southeast Asia** Mario Ivan Lopez, Jafar Suryomenggolo, 2018-05-17 This edited volume introduces dynamic approaches to the study of Southeast Asia's environmental diversity from different disciplinary perspectives at the interface between the natural and social sciences. It brings together research on the region's environmental resource use and shared ecological challenges in the context of present-day globalization to offer insights for possible future directions. The book introduces unique approaches to the study of Southeast Asia's environmental changes and resource management under the influence of intensifying economic change in the region. It also examines the slow erosion of Southeast Asia's rich environment and addresses serious issues such as the decrease in biodiversity and tropical forests and the degradation of peat lands. At the same time, it discusses the social issues that are tied to energy-dependent growth and have intensified over the last two decades. It also analyzes the new roadmaps being created to protect, conserve, and manage the environment. By investigating the many ecological issues surrounding us, the volume brings to light the constant struggles we face while trying to develop a more inclusive and equitable approach to natural resources governance. This volume is relevant for students, academics, and researchers who have an interest in the Southeast Asian environment and the way in which we use and interact with it. *At the intersection of gender and generation* Clendenning, J., Elias, M., Sijapati Basnett, B., 2019-07-15 The purpose of this brief is to identify the critical issues concerning young people in rural areas that hold significance for FTA's ability to achieve impact at this time of rapid rural transformation, the key questions concerning youth that matter for FTA.
