McBrayer, 2020 The world is swimming in misinformation Conflicting messages bombard us every day with news on everything from politics and world events to investments and alternative health The daily paper nightly news websites and social media each compete for our attention and each often insist on a different version of the facts Inevitably we have questions Who is telling the truth How would we know How did we get here What can we do Beyond Fake News answers these and other queries It offers a technological and market based explanation for how our informational environment became so polluted It shows how purveyors of news often have incentives to mislead us and how consumers of information often have incentives to be misled And it chronicles how as technology improves and the regulatory burdens drop our information scape becomes ever more littered with misinformation Beyond Fake News argues that even when we really want the truth our minds are built in such a way so as to be incapable of grasping many facts and blind spots mar our view of the world But we can do better both as individuals and as a society As individuals we can improve the accuracy of our understanding of the world by knowing who to trust and recognizing our limitations And as a society we can take important steps to reduce the quantity and effects of misinformation
