Territorial Policy and Governance Iain Deas, Stephen Hincks, 2017-02-24 In response to both policy and conceptual debates alternative narratives have begun to emerge about territorial governance and policymaking As local and regional policy actors strive to respond to the geographically uneven effects of the economic crises of the early twenty first century a crucial question emerges what are the opportunities and challenges presented by alternative forms of territorially based governance and policy The aim of this edited volume therefore is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts the contributors engage with issues around the politics and governance of territorial development economic development planning and regeneration and the environment Territorial Policy and Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development highlighting the related opportunities constraints and challenges that confront their operationalisation This book will be essential reading for international audiences with an interest in territorial development governance politics human geography and planning and regeneration

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth

Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Towards a Spatial Social Policy Adam Whitworth,2019-11-13 Social policy and human geography are intimately intertwined yet frequently disconnected fields Whilst social policies are always conceived implemented and experienced in and through geography the role of place in social policy scholarship and practice is frequently overlooked Bringing together experts from both fields this collection illuminates the myriad of ways that human geography offers rich insights conceptually empirically and methodologically into the neglected spatialities of policy scholarship practice and experience By building the necessary bridges towards a spatial social policy this book enables the enhanced design performance and understanding of social policies once properly rooted in their multiple spatialities

Clark,2024-05-02 Although neighborhoods are sometimes perceived as just a backdrop to our lives there is considerable evidence that they are central to our sense of wellbeing and in the functioning of the city Rethinking Neighborhoods is about these areas of geography what we know about how neighborhoods function why they matter and how we chose where to live

Time,

Space and Capital Åke E. Andersson, David Emanuel Andersson, 2017-07-28 In this challenging book the authors demonstrate that economists tend to misunderstand capital. Frank Knight was an exception as he argued that because all resources are more or less durable and have uncertain future uses they can consequently be classed as capital. Thus capital rather than labor is the real source of creativity, innovation and accumulation. But capital is also a phenomenon in time and in space. Offering a new and path breaking theory they show how durable capital with large spatial domains, infrastructural capital such as institutions, public knowledge and networks can help explain the long term development of cities and nations.
