Us Cruisers 1883 1904 New Vanguard:

US Cruisers 1883-1904 Lawrence Burr, 2011-12-20 By the end of the Civil War the US Navy was the most advanced in the world but in subsequent years America's naval might dwindled. However in the 1880s a New Navy was born and at the forefront of its fleet were the mighty cruisers. Naval historian Lawrence Burr details how these cruisers allowed America to rebuild their navy exploring the design and development of these ships. Placing these advances in context through vivid accounts of how US cruisers performed in the Spanish American War of 1898 notably at Manila Bay and Santiago he investigates the emergence of the US Navy as a major power. Illustrated with early photographs and full colour artwork this is a concise history of the birth and development of a modern navy that was the precursor to the development of modern steel fleets around the world.

Kriegsmarine Auxiliary Cruisers Gordon Williamson, 2012-06-20 Despite being relatively unknown compared to famous ships like Graf Spee or Bismarke or the more famous U boats the Auxiliary Cruisers were immensely successful not only in the number of enemy ships they sank but in the resources which were tied up trying to track them down. The Royal Navy's auxiliary cruisers tended to be merchant vessels used to protect convoys from attack. The German Auxiliary Cruisers however heavily armed and usually carried torpedo tubes as well as guns and even sometimes their own aircraft. These ships were aggressive predators searching the sea lanes for unsuspecting enemy merchants and were not only capable of destroying enemy merchant ships but also of defending themselves against well armed enemy warships. This book looks at the specifications and designs of the 11 Auxiliary Cruisers as well as their combat histories their eventual fates and the careers of some of the most famous commanders.

Crusader and Covenanter Cruiser Tanks 1939-45 David Fletcher, 2012-05-20 The Covenanter which never saw active service and Crusader Cruiser tanks were developed between 1939 and 1940. The Crusader first saw action in the North African desert in June 1941 its speed and sleek design made it a hard target to hit and the tank was well respected by the Afrikakorps for its velocity in combat. But its hurried development prior to World War II also made it prone to mechanical failure. This book examines the Covenanter and the many variants of the Crusader tank detailing the designs developments and disappointments of these infamous World War II tanks.

German Battlecruisers 1914-18 Gary Staff, 2012-01-20 The task of Germany's new Gro ße Kreuzer at the beginning of the 20th century was to form an independent reconnaissance division that was able to perform special tasks. With a speed superiority of at least 3 knots they should also be capable of fighting in the line and would thus require heavy armour and good defensive qualities. The battlecruisers that were built did indeed have a remarkable ability to withstand battle damage as demonstrated by the Goeben which suffered five mine hits on one occasion. This illustrated book details all the classes of German battlecruiser with particular emphasis on each individual ship's battle experience and deployment in conflict.

Imperial Japanese Navy Light Cruisers 1941-45 Mark Stille, 2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser sized training ships. Of these most were 5 500 ton ships designed to act as destroyer

squadron flagships This made them much different in capabilities and mission from their American counterparts During the war the Japanese built another five light cruisers all but one of which maintained the design premise of being able to serve as destroyer squadron flagships During the war Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties Mark Stille continues Osprey s coverage of the IJN of WWII with this concise and complete study of all 25 ships from their design and development to their ultimate fates Detailed artwork and rare period photographs from the Fukui collection held in Kure Japan illustrate this discussion **Imperial Japanese Navy Heavy**

Cruisers 1941-45 Mark Stille,2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy s heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates **German Light**

Cruisers 1939-45 Gordon Williamson,2012-04-20 The German Navy of World War II was small in number but contained some of the most technologically advanced capital ships in the world This meant that although the Kriegsmarine never felt capable of encountering the might of the British Navy in a fleet action her ships were individually more than a match for the outdated vessels of the Royal Navy Nowhere was this more the case than in Germany s fleet of light cruisers There were only six vessels in this fleet the Emden Leipzig K ln K nigsberg Karlsruhe and Nurnberg This book describes their design development and varied operational history throughout the course of the Second World War **Cromwell Cruiser Tank**

1942-50 David Fletcher,Richard C Harley,2012-05-20 For most of World War II British tank development remained faithful to the design philosophy inaugurated during World War I Experiences in North Africa highlighted flaws in this basic design however and the General Staff identified the need for a new heavy cruiser that could combine speed and manoeuvrability with increased armour and armament The Cromwell Cruiser tank was designed as a result and soon proved itself one of the fastest and most successful tanks deployed by the Allies during World War II This book details the design and development of the Cromwell and its many variants from its introduction at D Day through its many successes in the final year of World War II and beyond A Selected List of Works in the Library Relating to Nautical and Naval Art and Science, Navigation, and

Cruisers 1883-1918 Brian Lane Herder,2023-07-20 Explores the history of the US Navy s 11 new steel warships built

during the late 19th century to advance American naval supremacy After the American Civil War the powerful US Navy was allowed to decay into utter decrepitude and was becoming a security liability In 1883 Congress approved four new steel constructed vessels called the ABCD ships The three protected cruisers Atlanta Boston and Chicago were the first steel warships built for the US Navy whose 1880s 1890s technological and cultural transformation was so total it is now remembered as the New Navy This small fleet was joined by a succession of new and distinctive protected cruisers culminating in the famous and powerful Olympia These 11 protected cruisers formed the backbone of the early US steel navy and were in the frontline of the US victory in the 1898 Spanish American War It was these warships that fought and won the decisive Battle of Manila Bay These cruisers also served faithfully as escorts and auxiliaries in World War I before the last were retired in the 1920s Written by experienced US naval researcher Brian Lane Herder and including rare photographs this book explores the development qualities and service of these important warships and highlights the almost forgotten Columbia class designed as high speed commerce raiders and to mimic specific passenger liners All 11 protected cruisers are depicted in meticulously researched color illustrations with one depicting the Olympia deploying her full sail rig
