Us China Relations Mainstream And Organic Views:

U.S.- China Relations Dr Ifay F Chang, 2015-04-25 The relationship between China and the United States has been tumultuous Sometimes allies often rivals the two powers have a long history of brinksmanship mixed with diplomacy Prof Ifay F Chang PhD has a vested interest in US China relations As a first generation Chinese American he watches with concern as mainstream media delivers an almost nightly narrative of anti China rhetoric US China Relations collects a series of sixty essays written by Chang for Mainstream and Organic a newspaper column also published online In his writing Chang offers honest and candid reflections on the issues and conflicts threatening the US China relationship He delves into history discusses media portrayals of China and offers advice from the perspective of a US citizen with a Chinese background With China s emergence as the world s second largest economy hard questions must be asked about the country s relationship with America With the United States shifting the focus of its foreign policy to East Asia is China or America preparing for an unavoidable war Or can the two countries work toward mutual benefits and world peace Chang s opinions are both enlightening and guardedly optimistic as we head into a new era of US China relations *Exceptionalism & Competition in U.S.-China Relations* Ifay F. Chang, Hegemony & Anti-hegemony in U.S.-China Relations Ifay F. Chang, 2021

Isolationism and Globalism in U. S. - China Relations Ifay Chang, 2020-04-11 This is the sixth book about current events happening between the U S and China The U S and China both have made significant changes in their foreign policies towards each other and towards the rest of the world China was forced into isolation in most part of 20th century until the U S adopted the Nixon Kissinger doctrine Then China was embraced back into the world by the U S This change of policy by the U S was motivated by the goal confining the Soviet Union and the spread of communism but it has given China which had long parted her way with the Soviet Union the opportunity to develop and grow her economy in her own way in an amazing pace to become the number two economy in the world with just a little over three decades of time The U S touted isolationism in her founding era but essentially interpreted and practiced isolationism in her foreign policy to her advantage The U S eventually emerged as a super power surpassing the European nations by balancing their power In relative sense the U S economy once peaked at 40% of the world economy has been reduced to less than half of the current world economy owing to the faster pace of economic growth in Asian countries especially that of China Hence the U S felt the stress from maintaining her global leader position up keeping her military and economic presence all over the world China s rapid rise and her successful engagement in the global affairs are perceived as a threat by the U S The above background can explain why the U S has initiated a trade war against China and has stirred up several confrontational issues such as navigation right in South China Sea Taiwan status North Korea nuclear threat trade imbalance technology competition etc etc China on the other hand has been focusing on lifting her citizens above poverty and eagerly pursuing globalism by proposing an ambitious global economic development program named Belt and Road Initiative BRI which calls for collaborative economic

development along a land road and a sea belt from Asia to Europe via central Asia and Africa and Pacific to Atlantic through Indian Ocean This is a very different kind of globalism from the one led by the U S This book presents essays on various topics and different issues confronting the U S and China with the hope that rational thinking will take place to guide the U S China relations back to collaboration and engagement from isolation or confrontation for their mutual benefits and world prosperity

Presidential Transition & U.S.-China Relations Ifay F Chang, 2022-04-16 This is Dr Chang's 8th book entitled Presidential Transition and U S China Relations The previous seven books are US China Relations 2015 Understanding the U S and China 2016 The Changing Giants The U S and China 2017 New World Order The Bipolar View 2018 The U S China Issues Trade 2019 Isolationism and Globalism in U S China Relations 2020 and Calculated Rivalry between the U S and China 2021 Since Pompeo trashed Nixon's legacy at the Nixon library in 2019 and created the Uighur Genocide story to attack China the US China relations have been spiraling down on multiple fronts from trade issues to technology sanctions and diplomatic confrontations Biden's victory over Trump did not alter the blame China and anti China strategy except making the attack tactics from me alone to we wish in formulating the U S anti China policy Biden Administration still targets China as the most serious competitor short of calling China enemy Biden devotes a lot of energy to fulfill a we wish alliance to confront China The formation of QUAD or AUKUS to start a NATO like Indo Pacific alliance surrounding China seems to be more a wishful thinking than a practical strategy Many of the South East Asia countries are openly opposing to be pressured to take sides between the U S China competition The formation of Regional Comprehensive Economic Partnership RCEP a free trade agreement among 15 members including China not U S covers about 30% of world GDP is a clear evidence Competition between two giant nations are expected but taking an all out competition trade technology military diplomacy even applying diplomatic boycott on the 2022 Beijing Winter Olympics and creating separate supply chain or incompatible communication systems are bizarre A true world leader must accept competition as challenges and must have confidence to seek mutually beneficial solutions The current all out competition between the U S and China with no constructive dialogue and genuine cooperation is destructive There are plenty of areas the two great nations can cooperate and reap benefits Fruitful cooperation can be found in agriculture world healthcare infrastructure construction climate change and space exploration just to name a few This book is entitled Presidential Transition and U S China Relations that is because the author would like the readers to read this book with the presidential transition as the backdrop The author will illustrate the importance of leadership of governance to the national destiny from a historical perspective History is important for leaders and citizens to draw lessons from and to avoid repeating deadly mistakes Leaders are produced by political systems adopted by nations Good or bad leaders do have a correlation with the political system and citizens awareness of the efficacy of the political system Change of leaders thus transition is unavoidable in all political systems even in an authoritative royal family system since human life is generally limited to a century long In the U S a democratic system

has been evolved over 250 years to a bipartisan system The presidency was limited to two four year term by an amendment passed by the Congress in 1947 Hence the U S presidency has a mandated transition either at eight years or four in the event the president did not seek or lost the second term This 4 or 8 year periodic transition naturally has a significant impact to the governance of the country The positive aspect is that an incompetent president can be smoothly removed after four years but the negative aspect is that a competent president has to be replaced by a new one who may not be as competent or cause discontinuity in national policies This book will discuss some of the issues and specifically will focus on the four year Biden Trump transition with 60 essays included

Trump X.0 Will History Make with New US-China Relations Ifay F Chang, 2025-01-30 This book is the author's 11th book published in 12th year since he seriously took interest in international affairs in 2013 the year China initiated the One Belt and One Road Initiative OBOR later known as the Belt and Road Initiative BRI The series of eleven books are collections of his observations and comments on current international events with a focus more on US China relations since it has been the most important foreign relations in the world arena The titles of the previous books and their table of contents are included in the appendix of this book for readers reference It gives a chronological account of the U S China relations in a timely order a causality trace of international events in a timely order as well as the author's learning experience The title of this book Trump X 0 Will History Make with new U S China Relations contains 33 chapters organized in four parts A U S politics and presidential election B U S foreign policy Indo Pacific focus and Taiwan C U S China policy and China threat and competition and D MAGA movement under MAWGA drive Success is more predictable and long lasting beyond one presidential term The introductory chapter explains the four parts in more detail to connect the chapters for the readers and the conclusion chapter summarizes that MAGA will be more efficient and successful with China in a new relationship and with the world as partners not as adversaries Make all world great again MAWGA will be a noble and effective drive to make MAGA succeed faster and lasting beyond the 47th U S presidency

Contemporary China in Anglo-American and Chinese Perspectives Emre Demir, 2022-12-29 This book identifies differing approaches to the issues of conceptualising hegemony hegemony building processes and the relationship between a hegemonic state and a rising power It focuses on transformations of the Chinese state society and political economy China's rapidly ascending status in the world order and changing relations with the outside world in particular with the US Bringing together mainstream and critical approaches from Anglo America and China which occupy different positions in the core periphery structure of social sciences knowledge production and provide diverging standpoints to understanding the phenomenon of a rising China the book questions the existing division of labour in IR and in general social sciences knowledge production Through the lenses of multiple Anglo American and Chinese scholars it offers a nuanced and

multifaceted view on the issue and focuses on a direct comparison of different localized perspectives. The author scrutinizes the heterogeneity of knowledge, the relationship between power and knowledge production, and the region centrality in particular the Western centrality of knowledge production by analysing the discourse on the re rising status of China in the world. The book problematizes the close link between power and knowledge production and presents a more critical view on the conclusions drawn by each approach. Offering an understanding of the nexus between knowledge production and power structures, the heterogeneity and multiplicity of knowledge and the influence of locality on the knowledge produced in social sciences, the book will be of interest to academics working in the fields of International Relations theories, critical approaches, non Western theories, Euro or Western centrism, and social sciences in China Area Studies, in particularly China and East Asia.

US-China Issues - Trade +++ Ifay F Chang, 2019-03-28. The relationship between the two great nations, the U S and China, took an almost about face turn in recent years from engaging China into the world to targeting China as an enemy. The Trump Administration with his handpicked team of staff has made the U S China Policy even more uncertain than the Obama Administration. This is partly due to the new style of Presidency Mr Donald Trump has brought to the White House and partly due to the rapid rise in economic power China has exhibited with her net buying power reaching the number one position in the world. China maintains a trade surplus with nearly all her trading partners in the world except a handful of countries. The U S has a trade deficit in goods with China over 300 Billion annually since 2012. The US China relation was somewhat warm in 2017 with a Trump Xi summit at Mar a Lago Florida in March and Trump's State visit to China in November plus China's agreeing to buy more US goods. But in 2018 the Trump Administration initiated a tariff war starting with a global safeguard tariff in February placing 30% tariff on solar panels and 20% on washing machines, then 25% tariff on all steel imports and 10% on all aluminum imports in March. From then on to 2019 China reciprocated and the U S escalated threatening to apply tariffs to thousands of items up to US 200 Billion in value, making trade negotiations lingering on. The US China conflict is not limited in trade as evidenced by other events such as U S applying sanctions to Chinese technology corporations, examples like Huawei and ZTE, and accusing China unfairly acquiring technologies to upgrade her manufacturing capability which China touted as China Manufacturer 2025. The author has been studying the US China relations from a historical perspective and closely monitoring current events concerning the two countries through the mainstream media as well as the organic views expressed in Internet blogs and news circulations. This book is his fifth publication in the book series of Mainstream and Organic Views focusing on US China issues from trade to other conflicts.

Calculated Rivalry Between U.S. and China Ifay F Chang, 2021-03-14. The U S has characterized China as a competitor. The Trump Administration had launched trade war and technology sanction against China, escalating the tension between the two nations to the highest level since they formally recognized each other. Biden won the 2020 U S presidential election, denying Trump's Make America Great Again and wanted to bring the U S to normal diplomacy. Since Biden's inauguration, he is indeed releasing a message America

is back to the world by appointing many of his cabinet officials who served during the Obama era and by reversing 22 executive orders that Trump had signed With COVID 19 corona virus still rampant causing over 450 000 deaths in the U S making her the number one nation on the COVID death toll list compiled by the WHO The U S economy is under stress with unemployment over ten million people The new U S Administration could not help but place domestic issues on higher priority to be dealt with However the damage on foreign relations especially the U S China relation has been done and worse there is an anti China sentiment not necessarily justified in the business world but never the less existed in the U S Congress influenced by the sensation seeking media This anti China sentiment can be heard and seen from the confirmation process for Blinken Secretary of State Sullivan National Security Advisor and others their answers to harsh questions regarding US China relation despite of Biden s message that the China policy shall be dealt with patience But China is the only country that has managed to control the COVID pandemic after taking a strict lock down measure to stop the spread of virus in Wuhan Despite of the rhetoric and blame game the U S Administration had hurled at China her rapid development and efficient production of vaccines have been contributing significantly to the solution of stopping the pandemic if not more so than the American or European efforts It appears that the recovery of the world economy including that of the U S may be dependent on China whose economic recovery is projected to be 6 8% by the IMF Therefore it is a serious matter for the U S to quickly readdress her China policy Did the U S have a calculated strategy to face the competition from China since the Obama era Did Trump Pompeo carry out such a strategy or their own strategy if there is one with unorthodox diplomacy leading the two nations to rivalry unnecessarily Should the U S consider a new approach call it Co Competition to cooperate and compete with China for a realistic win win outcome This book collects 50 essays on current events related to the U S and China and discuss the question whether the U S and China are calculated rivals

India Ashok Kapur,2006 This book provides an in depth account of India s role in world politics at the beginning of the twenty first century The author shows how the approach laid down by Nehru and followed by his successors an approach that included nuclear self restraint the search for friendly relations with Pakistan and China seeking the high ground in moral and diplomatic spheres and giving a lead to the non aligned Third World has been replaced The new more self confident and assertive approach of this book is based on India s growing economic strength and has a more strategic and pro Western orientation Meticulous in approach this book discusses this change shows how it has come about and explores how India s role in world politics might develop going forward This book will be of interest to students and scholars of South Asian studies Asian politics international relations and security studies

Chang,2017-04 The U S and China are the world s two largest countries undergoing rapid changes If you follow the media you will find that the US China relation yoyos from worse to better and better to worse in the past few years while each is changing politically and economically The recent change in US China relation for the worse is worrisome to the entire world The already complex relationship between the two giants is further compounded by the fierce Presidential election in 2016 resulting in a new US administration which prefers to play Trump cards in a no trump game bridge jargon The US new Administration seems to disregard old game rules conventional suits and existing contracts creating a great uncertainty in her China policy which is troubling and challenging China and bewildering the US allies China on the other hand is gearing up more efforts interjecting her into global affairs while trying to maintain her healthy economic growth and keeping the U S at arm s length Will the two giants change for the better or worse is the author s quest for answer in his writings Changing Giants The U S and China is Dr Chang s third book following Understanding the US and China 2015 and US China Relations 2014 to track the development of the U S and China and monitor their changing relationship In this book Dr Chang makes close examination on the current events happening between the two nations and interprets their consequences all in light of the unique historical background of each nation Through the pages of this book the author hopes that better understanding of the past can lead people to influence the future The author hopes that the two changing giants will develop a collaborative relationship for the sake of the world peace and prosperity
