- 1 After World War II, American researchers pioneered a public health approach
2 that had the important feature of reducing the variability of individual
3 characteristics. Evidence for this idea is provided by the following:
4 1. The first American health policy (Public Health Service Act of 1946) was based on
5 individual and community health care. The first government health care
6 was "free, private, voluntary."
7 After World War II, American researchers and leaders used community health
8 care. I suggest, in agreement with others, that the public health approach
9 to medicine has succeeded in its purpose to reduce individual
10 individual health. This is the case for America.
11 Second, the effectiveness of the program of government health care is
12 strikingly evident when, since 1946,
13 the health of the American people has been of government (public) health care
14 systems, etc.
