Gorn, 2018-09-04 *Spacecraft* takes a long look at humankind's attempts and advances in leaving Earth through incredible illustrations and authoritatively written profiles on Sputnik the International Space Station and beyond. In 1957 the world looked on with both uncertainty and amazement as the Soviet Union launched Sputnik 1 the first man-made orbiter. Sputnik 1 would spend three months circling Earth every 98 minutes and covering 71 million miles in the process. The world's space programs have traveled far literally and figuratively since then and the spacecraft they have developed and deployed represent almost unthinkable advances for such a relatively short period. This ambitiously illustrated aerospace history profiles and depicts spacecraft from Sputnik 1 through the International Space Station and everything in between including concepts that have yet to actually venture outside the Earth's atmosphere. Illustrator and aerospace professional Giuseppe De Chiara teams up with aerospace historian Michael Gorn to present a huge profusely illustrated and authoritatively written collection of profiles depicting and describing the design, development and deployment of these manned and unmanned spacecraft. Satellites, capsules, spaceplanes, rockets and space stations are illustrated in multiple views, sometimes cross-section and in many cases shown in archival period photography to provide further historical context. Dividing the book by era, De Chiara and Gorn feature spacecraft not only from the United States and Soviet Union/Russia but also from the European Space Agency and China. The marvels examined in this volume include the rockets Energia, Falcon 9 and VEGA, the Hubble Space Telescope, the Cassini space probe and the Mars rovers Opportunity and Curiosity. Authoritatively written and profusely illustrated with more than 200 stunning artworks, *Spacecraft: 100 Iconic Rockets, Shuttles and Satellites That Put Us in Space* is sure to become a definitive guide to the history of manned space exploration.

Cologne Commentary on Space Law, Stephan Hobe, Bernhard Schmidt-Tedd, Kai-Uwe Schrogl, 2017-03-28. The *Cologne Commentary on Space Law* is a three-volume annotation on the written norms of space law as enunciated through the Treaties of the United Nations and its General Assembly Resolutions. Volume I focuses on the 1967 Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, popularly known as the Outer Space Treaty. A broad international authorship of twenty experts addresses the historical overview and provides a provision-by-provision interpretation of the Outer Space Treaty. This Volume also includes insights into the subsequent State practice, present-day applicability and future perspectives of the Treaty. The other four UN Treaties, the 1968 Rescue Agreement, the 1972 Liability Convention, the 1975 Registration Convention and the 1979 Moon Agreement, are addressed in Volume II, which was published in 2013. Volume III, published in 2015, delves into the eight most relevant United Nations General Assembly Resolutions on space activities. On the occasion of the 50th anniversary of the Outer Space Treaty, Volume I of the *Cologne Commentary on Space Law* has been translated into Russian.
