In their examination of the tremendous cultural influence of digital games, Daniel Reardon and David Wright analyze three companies that have shaped the industry: Bethesda located in Rockville, Maryland, USA; BioWare in Edmonton, Alberta, Canada; and CD Projekt Red in Warsaw, Poland. Each company has used social media and technical content in the games to promote players' belief that players control the companies' game narratives. The result has been at times explosive as empowered players often attempted to co-opt the creative processes of games through discussion.

board forum demands fund raising campaigns to persuade companies to change or add game content and modifications modding of the games through fan created downloads The result has changed the way we understand the interactive nature of digital games and the power of fan culture to shape those games
