Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its component parts and determining the causes of the problem. Once the causes are identified, the next step is to develop a plan of action. This involves determining the steps that need to be taken to solve the problem. Once the plan is developed, the next step is to implement it. This involves putting the plan into action and monitoring the progress. Finally, the last step is to evaluate the results. This involves determining whether the problem has been solved and whether the plan was effective.
