What Patients Teach The Everyday Ethics Of Health Care:

What Patients Teach Larry R. Churchill, Joseph B. Fanning, David Schenck, 2013-10-03 Healthcare ethics has been dominated by the voices of professionals This book listens to the voices of patients and argues that patients perceptions should form the core ethical obligations and insights for good care This is the ethical meaning of patient centered care

What Patients Teach Larry R. Churchill, Joseph B. Fanning, David Schenck, 2013-08-22 Being a patient is a unique interpersonal experience but it is also a universal human experience The relationships formed when we are patients can also teach some of life s most important lessons and these relationships provide a special window into ethics especially the ethics of healthcare professionals This book answers two basic questions As patients see it what things allow relationships with healthcare providers to become therapeutic What can this teach us about healthcare ethics This volume presents detailed descriptions and analyses of 50 interviews with 58 patients representing a wide spectrum of illnesses and clinician specialties The authors argue that the structure rhythm and horizon of routine patient care are ultimately grounded in patient vulnerability and clinician responsiveness From the short interview segments the longer vignettes and the full patient stories presented here emerge the neglected dimensions of healthcare and healthcare ethics What becomes visible is an ethics of everyday interdependence with mutual responsibilities that follow from this moral symbiosis Both professional expressions of healthcare ethics and the field of bioethics need to be informed and reformed by this distinctive more patient centered turn in how we understand both patient care as a whole and the ethics of care more specifically The final chapters present revised codes of ethics for health professionals as well as the implications for medical and health professions education *Pastoral Aesthetics* Nathan Carlin, 2019-03-06 Nathan Carlin revisits the role of religion in bioethics an increasingly secular enterprise and argues that pastoral theologians can enrich moral imagination in bioethics by cultivating an aesthetic sensibility that is theologically informed psychologically sophisticated therapeutically oriented and experientially grounded To achieve these ends Carlin employs Paul Tillich s method of correlation by positioning four principles of bioethics with four images of pastoral care *Peer Review, Peer Education, and Modeling in the Practice of Clinical Ethics Consultation: The Zadeh Project* Stuart G. Finder, Mark J. Bliton, 2018-09-11 This open access book about the Zadeh Project demonstrates and explores a core question in clinical ethics how can ethics consultants be accountable in the face of a robust plurality of ethical standpoints especially those that underwrite practices and methods for doing ethics consultation as well as those viewpoints and values encountered in daily clinical ethics practice Underscoring this question is the recognition that the field of clinical ethics consultation has arrived at a crucial point in its maturation Many efforts are underway to more formally professionalize the field with most aimed toward stabilizing a specific set of institutional considerations Stretched between these institutional and practical initiatives resides a crucial set of of ethical considerations chief among them the meaning and scope of responsibility for clinical ethics consultants Developed around a long form case scenario the Zadeh Project

provides a multi layered series of peer reviews critique of the actions of the case scenario s ethics consultant reflection on clinical ethics method examination of the many ways that commitments to method and practice can and do intersect overlap and alter one another The design and format of this book thus models a key element for clinical ethics practice the need and ability to provide careful and thoughtful explanation of core moral considerations that emerge among diverse standpoints Specifically designed for those studying to become and those who are ethics consultants this book with its innovative and multi layered approach allows readers to share a peer review like experience that shows accountability to be what it is an ethical not merely procedural or administrative undertaking

Silent Partners Rebecca Dresser,2017 The research ethics system was created without the help of people who know what it is like to be a research subject This is a serious omission Experts have overlooked ethical issues that matter to subjects Silent Partners moves subjects to the forefront giving them a voice in research ethics

Ethical Smart Care Christine Hine,2025-09-08 This book explores the emerging ethics of smart care identifies key moments in the design implementation and use of smart healthcare tools with ethical connotations and considers how we can steer smart innovations to maximize the work they can do for good and minimize the risks of inadvertently causing harm

Into the Field of Suffering David Schenck,Scott Neely,2023 This book is written for people who spend the bulk of their days working with others who are suffering What I want to offer here is an invitation to conversation a conversation with me a conversation within yourself and a conversation with the people with whom you work A conversation about what it means to spend your days with people whose lives are disrupted by illness or overwhelmed by brokenness That can be brokenness in bodies It can be anything from flu to cancer from sprains to AIDS It can be traumatic brain injury severe mental illness or debilitating chronic conditions Or it could be families in neonatal units dealing with children with debilitating genetic defects struggling to make decisions about if when and how to end lives Or violence on the street or the devastation of a flood ravaged community What is it that we can learn from these situations I put an emphasis on learning because I do believe that if we don t learn every day if we don t learn every hour this work will destroy us It s important to use a word as strong as destroy There are reasons not everyone does this work and there are limits to how much of this work anyone can do What we must keep asking ourselves is Why do we do this work Why are we drawn to those who suffer What is it that s good about this And what not so good What is it that is admirable and something that we should show enormous compassion and respect to ourselves for And what is there in it that is self destructive that we should be constantly questioning and challenging To answer these questions we must get past the assumption that attending to the suffering is entirely saintly and noble or that it is a symptom of a deep perverse drive Much attention is rightly being focused on people who serve on healthcare s front lines The framework for these discussions tends most often to be the terms burnout and moral distress These terms certainly point to very real experiences very painful experiences Unfortunately they also often carry with them judgmental messages You are failing You must do better What I want to say to you here is that while these

terms point to realities for those of us who have worked with suffering day in and day out they may not help us move and grow into the deeper ranges of compassion and recognition and attention that are possible unless we supplement them with other constructs and insights When I say that I want to encourage a conversation within you part of what I have in mind is this We are all multiple selves And one of the things that happens when we work with people and communities that are suffering and in pain physical pain psychological pain spiritual pain is that distinct pieces of ourselves often respond quite differently to what is going on in front of us Many different feelings are stirred We may be terrified and at the same time move with great compassion while being also completely exhausted and madly energized

power to move the rocks and trees and to quiet the animals Elizabeth Sewell's *The Orphic Voice* transforms our understanding of the relationship between mind and nature Myth Sewell argues is not mere fable but an ancient and vital form of reflection that unites poetry philosophy and natural science Shakespeare with Francis Bacon and Giambattista Vico Wordsworth and Rilke with Michael Polanyi All these members of the Orphic company share a common perception that discovery in science and poetry is a mythological situation in which the mind unites with a figure of its own devising as a means toward understanding the world Sewell's visionary book first published in 1960 presents brilliantly illuminating readings of *A Midsummer Night's Dream* and Rilke's *Sonnets to Orpheus* among other masterpieces while deepening our understanding not only of poetry and the history of ideas but of the biological reach of the mind [Healing and Medicine](#) Paul Dieppe, 2023-12-29 Healing is on many people's minds today In the wake of the COVID 19 pandemic and a host of other disruptions and disasters many of us feel that we need healing in our personal lives for the environment and for our planet But healing is rarely defined and is not an accepted part of medicine in the West This book examines the relationship between healing and medicine through the eyes of an academic physician who changed his interests from biomedical research to healing late in his career in medicine It is based on his experiences and stories of his encounters with patients practitioners and others for whom healing has had a particular significance as well as his rigorous research into the subject A central theme of the book is that modern medicine needs to be more pluralistic in its approach to health and accept that spirituality and healing techniques have roles to play alongside scientific medicine which currently has its base in materialism alone [Disability, Health, Law, and Bioethics](#) I. Glenn Cohen, Carmel Shachar, Anita Silvers, Michael Ashley Stein, 2020-04-23 Examines how the framing of disability has serious implications for legal medical and policy treatments of disability *Embodied Injustice* Mary Crossley, 2022-08-25 This book demonstrates similarities in health inequities afflicting Black and disabled people in America to support collaborative intersectional health justice advocacy [The History and Bioethics of Medical Education](#) Madeleine Mant, Chris Mounsey, 2021-04-20 *The History and Bioethics of Medical Education* You've Got to Be Carefully Taught continues the Routledge Advances in the History of Bioethics series by exploring approaches to the teaching of bioethics from disparate disciplines geographies and contexts Van Rensselaer Potter coined the phrase Global Bioethics to define human relationships with their contexts This and subsequent volumes return to Potter's founding vision from historical perspectives and asks how did we get here from then The patient practitioner relationship has come to the fore in bioethics this volume asks is there an ideal bioethical curriculum Are the students being carefully taught and in turn are they carefully learning This volume will appeal to those working in both clinical medicine and the medical humanities as vibrant connections are drawn between various ways of knowing [Respecting Disability](#) Adam Cureton, 2025-11-04 Proper treatment of people with disabilities should not incur any head scratching Yet for many it requires a multifaceted and thoroughly considered approach Respecting people with disabilities can involve a plethora of

considerations and approaches to social relations and care how we interact with them in interpersonal contexts what kinds of attitudes we have toward them how we relate with them and how people with disabilities regard and treat ourselves Drawing on the author's own perspective and experiences as a disabled person Adam Cureton emphasizes the importance of relationships ideals virtues and attitudes in how we approach ethical issues that concern disability and explores the nature and moral importance of respect for people with disabilities and of respect for ourselves The book explores ways to understand and evaluate one's own disability and how to maintain one's self respect in the face of disparaging social pressures It also addresses unique moral challenges that disabled people face and characterizes some guiding moral ideals of self respect for navigating these complex situations Cureton emphasizes the importance of expressing respect for disabled people By distinguishing several different kinds of respect for people with disabilities he shows how many of the common attitudes that even well meaning people have towards those with disabilities are complicated and morally problematic Through these intricacies he charts a nuanced path forward This book speaks to disabled people and others with experience of disability to help people understand and evaluate the many ways we can properly respect disability

Contemporary European Perspectives on the Ethics of End of Life Care Nathan Emmerich, Pierre Mallia, Bert Gordijn, Francesca Pistoia, 2020-05-12 This book examines the ethics of end of life care focusing on the kinds of decisions that are commonly made in clinical practice Specific attention is paid to the intensification of treatment for terminal symptoms particularly pain relief and the withdrawal and withholding of care particularly life saving or life prolonging medical care The book is structured into three sections The first section contains essays examining end of life care from the perspective of moral theory and theology The second sets out various conceptual terms and distinctions relevant to decision making at the end of life The third section contains chapters that focus on substantive ethical issues This format not only provides for a comprehensive analysis of the ethical issues that arise in the context of end of life care but allows readers to effectively trace the philosophical theological and conceptual underpinnings that inform their specific interests This work will be of interest to scholars working in the area as well as clinicians specialists and healthcare professionals who encounter these issues in the course of their practice
