When Champagne Became French Kolleen M. Guy, 2007-09 This work explains how nationhood emerges by viewing countries as cultural artifacts a product of invented traditions In the case of France scholars disagree not only over the nature of French national identity but also over the extent to which diverse and sometimes hostile provincial communities became integrated into the nation The author offers a new perspective by looking at one of the central elements in French national culture luxury wine and the rural communities that profited from its production When Champagne Became French Kolleen M. Guy, 2007-09 This work explains how nationhood emerges by viewing countries as cultural artifacts a product of invented traditions In the case of France scholars disagree not only over the nature of French national identity but also over the extent to which diverse and sometimes hostile provincial communities became integrated into the nation The author offers a new perspective by looking at one of the central elements in French national culture luxury wine and the rural communities that profited from its production **The Politics of Historical Memory and Commemoration in Africa** Cassandra Mark-Thiesen, Moritz Mihatsch, Michelle Sikes, 2021-12-06 Essays in Memory of Jan Georg Deutsch The volume observes some of the principles that drove Prof Jan Georg Deutsch s research highlighting present day politics for the way they shape historical remembrance learning from people on the ground through fieldwork and oral history and bringing various parts of the African continent into discussion with one another From Cape Town to Charlottesville many societies are grappling with historical consciousness and the production of public memory In particular how and why societies remember and forget what should serve as symbols of collective memory and whether there exists space for multiple memory cultures are questions being vigorously debated once again These discussions present particular challenges not only to official memory bound to ideological constructions of nationhood but also to the teaching of history and its links to social justice movements The volume re centres Africa and African history in memory studies with each chapter drawing parallels to comparable cases in Africa and the world An underlying assumption is that what can be learned from the politics of historical memory in Africa will have relevance for contemporary politics globally and for understanding how memories can be mobilised for political ends *Terroir and Other Myths of Winegrowing* Mark A. Matthews, 2016-03-15 A must read for any wine grape grower or winemaker who has ever wrestled with the most important myths of winegrowing or debated them with colleagues and that would be all of us It is also a great read for any wine consumer interested in looking at the man behind the curtain so to speak the myths promoted by wine writers tasting room staff sommeliers and other wine gatekeepers *Wines Vines* A meticulously researched volume that every serious sommelier should read if only to disagree The *Somm Journal Wine* is a traditional product with traditional explanations Oft romanticized Old World notions of how to create fine wine have been passed down through generations and continue to dominate popular discussions of wine quality However many of these beliefs predate science and remain isolated from advances in the understanding of how crops grow and fruit

ripens Allegiance to them has frequently impeded open minded investigation into how grapevines interact with the environment thus limiting innovation in winegrowing In *Terroir and Other Myths of Winegrowing* Mark A Matthews applies a scientist s skepticism and scrutiny to examine widely held beliefs about viticulture Is terroir primarily a marketing ploy that obscures understanding of which environments really produce the best wine Is reducing yield an imperative for high quality grapes and wine What does it mean to have vines that are balanced or grapes that are physiologically mature Matthews explores and dissects these and other questions to debunk the myths of winegrowing that may be holding us back from achieving a higher wine quality Wine Drinking Culture in France Marion Demossier,2010-07-15 This book provides a new

interpretation of the relationship between consumption drinking culture memory and cultural identity in an age of rapid political and economic change Using France as a case study it explores the construction of a national drinking culture the myths symbols and practices surrounding it and then through a multisited ethnography of wine consumption demonstrates how that culture is in the process of being transformed Wine drinking culture in France has traditionally been a source of pride for the French and in an age of concerns about the dangers of binge drinking a major cause of jealousy for the British Wine drinking and the culture associated with it are for many an essential part of what it means to be French but they are also part of a national construction Described by some as a national product or as a totem drink wine and its attendant cultures supposedly characterise Frenchness in much the same way as being born in France fighting for liberty or speaking French Yet this traditional picture is now being challenged by economic social and political forces that have transformed consumption patterns and led to the fragmentation of wine drinking culture The aim of this book is to provide an original account of the various causes of the long term decline in alcohol consumption and of the emergence of a new wine drinking culture since the 1970s and to analyse its relationship to national and regional identity **Sparkling Wine Anytime**

Leah Tether,Patrick Moran,Anne Salamon,2025-03-17 When Keith Busby published his field shaping *Codex and Context* in 2002 the work was referred to as groundbreaking and monumental It prompted scholars of medieval literature to return to manuscripts in their droves However Busby s *Codex and Context* would also enact another more gradual movement His formulation of the term medieval Francophonia to describe the presence power and effect of French outside France

would filter steadily into academic enquiry The term and concept are now widely recognised and applied in global scholarship including in multiple major projects dedicated to the topic This volume brings together a series of cutting edge studies of medieval Francophonia covering in one place and for the first time the fullest scope of the concept's remit with contributions on history historiography language literature culture society and authority At the same time as offering a timely contribution to the field this volume pays tribute to Busby's life work not only to pioneer medieval Francophonia but also and moreover to encourage the study of the medieval through material philology Each of the studies here written by Busby's friends and colleagues thus roots its approach in a material context

Eating Our Way Toward Civilization Nataly Sielicki, 2012-05-25 In the series of short essays the author overviews works of anthropologists archeologists cultural sociologists historians and gastronomists who argue that the cooking played a significant role in human evolution and history and sometimes even whole Empires were built not by the sword but by the spoon The ancient and modern cuisines bear a deep imprint of the civilizations they appeared and were developing in One can get a real insight on the cultures often long gone by trying recipes created then and there This maxim did not cease to be true nowadays Contemporary cultures as well could be judged by their cuisines Verdict issued by this criteria when applied to the American diet may appear shocking The American culture is the childish young adolescent one As a special treat an essay about the everyday life in the Soviet Union *People Waiting in Line* is included

The Taste of Water Christy Spackman, 2023-12-19 The Taste of Water explores the increasing erasure of tastes from drinking water over the twentieth century It asks how dramatic changes in municipal water treatment have altered consumers awareness of the environment their water comes from Through examination of the development of sensory expertise in the United States and France over the twentieth century this unique history uncovers the foundational role palatability has played in shaping Western water treatment processes By focusing on the relationship between taste and the environment Christy Spackman shows how efforts to erase unwanted tastes and smells have transformed water into a highly industrialized food product divorced from the natural environment The Taste of Water invites readers to question their own assumptions about what water does and should naturally taste like while exposing them to the invisible but substantial sensory labor involved in creating tap water

Divided Spirits Sarah Bowen, 2015-10-01 Divided Spirits tells the stories of tequila and mezcal two of Mexico's most iconic products In doing so the book illustrates how neoliberalism influences the production branding and regulation of local foods and drinks It also challenges the strategy of relying on alternative markets to protect food cultures and rural livelihoods In recent years as consumers increasingly demand to connect with the people and places that produce their food the concept of terroir the taste of place has become more and more prominent Tequila and mezcal are both protected by denominations of origin DOs legal designations that aim to guarantee a product's authenticity based on its link to terroir Advocates argue that the DOs expand market opportunities protect cultural heritage and ensure the reputation of Mexico's national spirits Yet this book shows how the institutions that

are supposed to guard the legacy of all Mexicans often fail those who are most in need of protection the small producers agave farmers and other workers who have been making tequila and mezcal for generations The consequences for the quality and taste of tequila and mezcal and for communities throughout Mexico are stark Divided Spirits suggests that we must move beyond market based models if we want to safeguard local products and the people who make them Instead we need systems of production consumption and oversight that are more democratic more inclusive and more participatory Lasting change is unlikely without the involvement of the state and a sustained commitment to addressing inequality and supporting rural development

Empire David Todd, 2023-09-26 How France's elites used soft power to pursue their imperial ambitions in the nineteenth century After Napoleon's downfall in 1815 France embraced a mostly informal style of empire one that emphasized economic and cultural influence rather than military conquest *A Velvet Empire* is a global history of French imperialism in the nineteenth century providing new insights into the mechanisms of imperial collaboration that extended France's power from the Middle East to Latin America and ushered in the modern age of globalization David Todd shows how French elites pursued a cunning strategy of imperial expansion in which conspicuous commodities such as champagne and silk textiles together with loans to client states contributed to a global campaign of seduction French imperialism was no less brutal than that of the British But while Britain widened its imperial reach through settler colonialism and the acquisition of far flung territories France built a velvet empire backed by frequent military interventions and a broadening extraterritorial jurisdiction Todd demonstrates how France drew vast benefits from these asymmetric imperial like relations until a succession of setbacks around the world brought about their unravelling in the 1870s *A Velvet Empire* sheds light on France's neglected contribution to the conservative reinvention of modernity and offers a new interpretation of the resurgence of French colonialism on a global scale after 1880 This panoramic book also highlights the crucial role of collaboration among European empires during this period including archrivals Britain and France and cooperation with indigenous elites in facilitating imperial expansion and the globalization of capitalism **Transnational French Studies** Charles

Forsdick, Claire Launchbury, 2023-10-01 The contributors to *Transnational French Studies* situate this disciplinary subfield of Modern Languages in actively transnational frameworks The key objective of the volume is to define the core set of skills and methodologies that constitute the study of French culture as a transnational transcultural and translingual phenomenon Written by leading scholars within the field chapters demonstrate the type of inquiry that can be pursued into the transnational realities both material and non material that are integral to what is referred to as French culture The book considers the transnational dimensions of being human in the world by focussing on four key practices which constitute the object of study for students of French language and multilingualism the construction of transcultural places and the corresponding sense of space the experience of time and transnational subjectivities The underlying premise of the volume is that the transnational is present and has long been present throughout what we define as French history and culture Chapters address instances and phenomena associated with the transnational from prehistory to the present opening up the geopolitical map of French studies beyond France and including sites where communities identified as French have formed
