When Diversity Drops Race Religion And Affirmative Action In Higher Education:

When Diversity Drops Julie J. Park, 2013 Julie J. Park examines how losing racial diversity in a university affects the everyday lives of its students. She uses a student organization, the InterVarsity Christian Fellowship (IVCF) at California University, as a case study to show how reductions in racial diversity impact the ability of students to sustain multiethnic communities.

When Diversity Drops Julie J. Park, 2013-07-16 Julie J. Park examines how losing racial diversity in a university affects the everyday lives of its students. She uses a student organization, the InterVarsity Christian Fellowship (IVCF) at California University, as a case study to show how reductions in racial diversity impact the ability of students to sustain multiethnic communities. The story documents IVCF's evolution from a predominantly white group that rarely addressed race to the most racially diverse campus fellowship at the university. However, its ability to maintain its multiethnic membership was severely hampered by the drop in black enrollment at California University following the passage of Proposition 209, a statewide affirmative action ban. Park demonstrates how the friendships that students have or do not have across racial lines are not just a matter of personal preference or choice; they take place in the contexts that are inevitably shaped by the demographic conditions of the university. She contends that a strong organizational commitment to diversity while essential cannot sustain racially diverse student subcultures. Her work makes a critical contribution to our understanding of race and inequality in collegiate life and is a valuable resource for educators and researchers interested in the influence of racial politics on students' lives.

Multiculturalism on Campus Michael J. Cuyjet, Diane L. Cooper, Mary F. Howard-Hamilton, 2023-07-03 The first edition of this book constituted a comprehensive resource for students of higher education, faculty, higher education administrators, and student affairs leaders engaging with multiculturalism and diverse populations on college campuses. It was one of the first texts to gather in a single volume the related theories, assessment methods, and environmental and application issues pertinent to the study and practice of multiculturalism while also offering approaches to enhancing multicultural programming and culturally diverse campus environments. This second edition retains the structure and vision of the first, introducing readers to the key theories and models for understanding the complexity of the students they serve and for reflecting on their own values and motivations. It provides an array of case studies, discussion questions, examples of best practice, and recommendations about resources for use in the classroom. This edition includes a new chapter on intersectionality, updates several chapters, presents a number of new cultural frameworks, and updated best practices for creating an inclusive environment for marginalized groups and expands the third section of the book on cultural competent practice.

Poison in the Ivy W. Carson Byrd, 2017-11-24 The world of elite campuses is one of rarified social circles as well as prestigious educational opportunities W Carson Byrd studied twenty eight of the most selective colleges and universities in the United States to see whether elite students social interactions with each other might influence their racial beliefs in a positive way since many of these graduates will eventually hold leadership positions in society He found that students at these universities believed in the success of the best and the brightest leading them to situate differences in race and status around issues of merit and individual effort Poison in the Ivy challenges popular beliefs about the importance of cross racial interactions as an antidote to racism in the increasingly diverse United States He shows that it is the context and framing of such interactions on college campuses that plays an important role in shaping students beliefs about race and inequality in everyday life for the future political and professional leaders of the nation Poison in the Ivy is an eye opening look at race on elite college campuses and offers lessons for anyone involved in modern American higher education

Higher Education Erica K. Yamamura, Kent Koth, 2023-07-03 While an increasing number of universities have or are committed to engaging their campuses in their surrounding communities many recognize they lack the strategic focus and resources to maximize and sustain their impact on those communities Place based community engagement provides a powerful way to creatively connect campus and community to foster positive social transformation In developing community engagement strategies most universities and community organizations face significant challenges in deciding who to partner with and why Frequently this leads universities and community organizations to say yes to too many opportunities which significantly limit their ability to pursue long term impact Focusing on an established geographic area can make it much easier to decide where to deploy resources and which partnerships to prioritize and thus increase their ability to form strong

and sustainable partnerships that are of greater value to all stakeholders This book presents the emerging model of place based community engagement as a powerful process for attaining more positive and enduring results in their local communities as well as stimulating wider engagement by campus constituencies Drawing upon the concept of collective impact and using data driven decision making place based initiatives build long term partnerships based upon a shared vision Done thoughtfully these place based initiatives have attained impressive results Drawing upon the case studies of five institutions that have implemented place based community engagement initiatives the authors provide guidance on the opportunities challenges and considerations involved in putting a place based approach into effect By sharing the experiences of these five institutions they describe in detail the routes each took to turn their place based initiatives from concept to reality and the results they achieved

The Diversity Bargain Natasha Warikoo, 2019-02-22 We've heard plenty from politicians and experts on affirmative action and higher education about how universities should intervene if at all to ensure a diverse but deserving student population But what about those for whom these issues matter the most In this book Natasha K Warikoo deeply explores how students themselves think about merit and race at a uniquely pivotal moment after they have just won the most competitive game of their lives and gained admittance to one of the world's top universities What Warikoo uncovers talking with both white students and students of color at Harvard Brown and Oxford is absolutely illuminating and some of it is positively shocking As she shows many elite white students understand the value of diversity abstractly but they ignore the real problems that racial inequality causes and that diversity programs are meant to solve They stand in fear of being labeled a racist but they are quick to call foul should a diversity program appear at all to hamper their own chances for advancement The most troubling result of this ambivalence is what she calls the diversity

bargain in which white students reluctantly agree with affirmative action as long as it benefits them by providing a diverse learning environment racial diversity in this way is a commodity a selling point on a brochure And as Warikoo shows universities play a big part in creating these situations The way they talk about race on campus and the kinds of diversity programs they offer have a huge impact on student attitudes shaping them either toward ambivalence or in better cases toward more productive and considerate understandings of racial difference Ultimately this book demonstrates just how slippery the notions of race merit and privilege can be In doing so it asks important questions not just about college admissions but what the elite students who have succeeded at it who will be the world's future leaders will do with the social inequalities of the wider world
