In Collaboration with British Literary Biography Jane McVeigh,2017-10-13 This book is about one person s reading and what has been learnt about how the lives of other people particularly authors have been written in British literary biographies over the last fifty years It is less interested in what happened in the lives of the people described in these biographies and more concerned with how these stories have been told It aims to have a conversation with British biographers particularly Michael Holroyd Richard Holmes Hermione Lee and Claire Tomalin to make their voices heard to set them talking It understands biography as an ongoing collaboration not only between biographers and their subjects but between biographers and their readers This is also a study of haunting in which we haunt the lives of others to help us come to a better understanding of our own

Adams,2013-12-11 In the last fifty years the investigation of maritime archaeological sites in the sea in the coastal zone and in their interconnecting locales has emerged as one of archaeology s most dynamic and fast developing fields No longer a niche interest maritime archaeology is recognised as having central relevance in the integrated study of the human past Within maritime archaeology the study of watercraft has been understandably prominent and yet their potential is far from exhausted In this book Jon Adams evaluates key episodes of technical change in the ways that ships were conceived designed built used and disposed of As technological puzzles they have long confounded explanation but when viewed in the context of the societies in which they were created mysteries begin to dissolve Shipbuilding is social practice and as one of the most complex artefacts made changes in their technology provide a lens through which to view the ideologies strategies and agency of social change Adams argues that the harnessing of shipbuilding was one of the ways in which medieval society became modern and while the primary case studies are historical he also demonstrates that the relationships between ships and society have key implications for our

understanding of prehistory in which seafaring and communication had similarly profound effects on the tide of human affairs
