Popkova,2018-03-06 This book features contributions from various spheres of socio humanitarian sciences presented at the scientific and practical conference on Humans as an Object of Study by Modern Science which took place in Nizhny Novgorod Russian Federation on November 23 24 2017 The conference was organized by Kozma Minin Nizhny Novgorod State Pedagogical University and the non profit organization Institute of Scientific Communications Presenting the results of multidisciplinary studies as well as new approaches the target audience of the book includes postgraduates lecturers at higher educational establishments and researchers studying socio humanitarian sciences The complex study of humans by representatives of various socio humanitarian sciences philosophy pedagogics jurisprudence

social sciences and economics allows a comprehensive concept of the field to be developed. Selecting humans as an object of research opens wide possibilities for studying various issues related to their activities while considering humans within multiple sciences means that the methods of induction and deduction can be combined to achieve precise results. This book includes the results of leading scientific studies on the following key issues: establishment of an information economy under the influence of scientific and technical progress; new challenges and opportunities; information and communication technologies as a new vector of development of the modern world economy; specifics and experience of using new information and communication technologies in developed and developing countries; problems of implementing new information and communication technologies in the modern economy and priorities of using new information and communication technologies in the modern economy.

Innovation Management and Growth in Emerging Economies Webb, Heather C., Wu, Wendy, Al Numairy, Hussain, 2020-10-23. Despite its economic impact, understanding what shaped emerging economies' success seems to be a mystery. These complexities are compounded by fast-moving technologies such as the increased usage of artificial intelligence (AI) and the Internet of Things (IoT). These new technologies have a social impact, but it is how these impacts are developed and managed by people and companies that is significant. Similarly, it is important to investigate how the uncertainties and intangible factors are dealt with and how businesses can utilize innovative approaches to become adaptive in emerging market economies. Research is needed to determine how actors or businesses interact to shape and define either new institutions, new industries, or new innovation to meet the need of potential customers in emerging economies. *Innovation Management and Growth in Emerging Economies* explores how innovation from emerging economies is being developed through strategic choices and presents the benefits and the drawbacks, the processes, and the characteristics and management practices of both private and/or public organizations. The chapters identify the trends and approaches to innovation development as well as the strategies of adapting and converting threats and challenges into opportunities. The target audience of this book is composed of practitioners, policy influencers, course instructors, professionals, academicians, students, and researchers in the fields of business, administrative sciences, management, and economics.

Popular Mechanics, 1977. Thomas Register of American Manufacturers, 2002. This basic source for identification of U.S. manufacturers is arranged by product in a large multi-volume set. Includes Products, Services, Company profiles, and Catalog file.
