University Of Pretoria One Year Study Programme:

The SAGE Handbook of Social Work Mel Gray, James Midgley, Stephen A Webb, 2012-06-22 This Handbook is the world's first generic major reference work to provide an authoritative guide to the theory, method and values of social work in one volume. Drawn from an international field of excellence, the contributors each offer a critical analysis of their individual area of expertise. The result is this invaluable resource collection that not only reflects upon the condition of social work today but also looks to future developments. Split into seven parts, the Handbook investigates Policy, dimensions, Practice, Perspectives, Values and ethics, The context of social work, Research, Future challenges. It is essential reading for all students, practitioners, researchers and academics engaged in social work. **Assessing English Proficiency for University Study** J. Read, 2015-01-27 This book focuses on strategies and procedures for assessing the academic language ability of students entering an English medium university so that those with significant needs can have access to opportunities to enhance their language skills. **The Grants Register 1999** Ruth Austin, 1998-08-12 The most authoritative and comprehensive guide available on postgraduate grants and professional funding worldwide. For over twenty years, The Grants Register has been the leading source for up-to-date information on the availability of and eligibility for postgraduate and professional awards. With details of over 3 000 awards, The Grants Register is more extensive than any comparable publication. Each entry has been verified by the awarding bodies concerned, ensuring that every piece of information is accurate. As an annual publication, each edition also provides the most current details available today. The Grants Register provides an ideal reference source for those who need accurate information on postgraduate funding, careers advisors, university libraries, student organisations and public libraries. Also available on CD-ROM. **The Octopus** Başak Şenova, 2024-03-18 Diversity in artistic research. This book presents the results of the Octopus Programme, an innovative fellowship in the field of artistic research. This international network of eleven institutions included selected participants from Europe, the Mediterranean and Africa and generated numerous events, workshops and exhibitions. By promoting international collaboration, new critical perspectives were developed to investigate the diversity of artistic research and practice in different contexts, academic as well as non-academic, inside and outside institutions or in relation to resources. This brings into focus not only different curatorial models but also different modes of knowledge production. Artistic research and collaboration between academics, art institutions, students and experts. Curatorial forms of presentation, research and documentation, progressive educational methodology. Contributions by Ruth Anderwald, Leonhard Grönd, Jonatan Habib Engqvist, Maria Lantz, Barbara Putz, Plecko, Johan Thom and others. *The Renaissance Engineer of Tomorrow* European Society for Engineering Education. Conference, 2002. On the threshold of the 3rd Millennium, there can be no doubt about the fact that advances in progress of modern society are technology-driven. There is still an ever-increasing demand for Engineers at many different levels. Nonetheless, the skills and attitudes required of them are constantly changing, given that they must match developments which take place at an ever-increasing rate. Hence

Engineering educators and to greater extent all stake holders in the world of scientific and technological training are looking forward to the model of a more flexible inter disciplinary shaped and innovation oriented kind of Engineers perhaps an Artist Engineer Is the ideal model what we refer to as The Renaissance Engineer of Tomorrow a suitable one for the today times Does such a model exist at all and if yes does it really satisfy the needs of our society The 30th SEFI Annual Conference is a forum which is open for the development of such a discussion amongst scientists educators professionals industrialists students and all those involved and or interested in the debate Primarily its purpose is to better identify and re shape our concept of the ideal Engineer as envisaged for the future no matter how we call such model Such a concept involves the ability to manage interaction between the many different branches of scientific and technical knowledge as well as the skills associated with the adaptability and flexibility to handle tasks in a truly innovative manner coupled with the positive attitude of life long learning ethical awareness and respect in our approach to a sustainable and socially committed development etc All the above issues clearly define the profile of a graduate far beyond the limited interpretation of the Anglo Saxon word Engineer i e challenging himself to change his her perception of his her role in the design process as one moves beyond the simple act of making decisions based on codes and calculations All this requires a multi cultural education enriched through mobility during one s period of study a marked team work attitude in an international environment the acceptance of challenging competitiveness in terms of ideas and improved efficiency of both processes and products how does one go about developing all these graduate skills through a simple Engineering degree And how to solve the evident contradiction between the aspiration to educate an Artist Engineer necessarily an elitary group and the need of delivering a suitable technical education to the many young people who are requested in engineering such to allow them to work and correctly and safely produce for the society More than 120 contributions responded to SEFIrenze 2002 call for papers from 30 different countries almost all over the world Their presence highlights the interest that the evocative issue of the Renaissance Engineer of Tomorrow has drawn everyone is dreaming something figuring out his her own idea of the task and handbut perhaps no single individual can really define what it is exactly Let us therefore dream of our future Engineers as people who will work with respect and awareness of different traditions and heritage Let us envisage them as human bridges across different cultures and regions linking people all over the world by means of science and technology In this way we can draw inspiration from our glorious Roman past which teaches us that the Highest Authority the Pontiff took his privileged title from Pontifex Maximus the ancient latin Pontesfacere i e the Bridge maker Claudio Borri 1996 *IEEE AFRICON, 4th AFRICON Conference in Africa, 25-27 September 1996, Tutorials on 24 September 1996*, 1996 Proceedings, 1996
