Unmaking The Bomb A Fissile Material Approach To Nuclear Disarmament And Nonproliferation:

Unmaking the Bomb Harold A. Feiveson, Alexander Glaser, Zia Mian, Frank N. Von Hippel, 2016-09-02 A new approach to nuclear disarmament nonproliferation and the prevention of nuclear terrorism that focuses on controlling the production and stockpiling of nuclear materials Achieving nuclear disarmament stopping nuclear proliferation and preventing nuclear terrorism are among the most critical challenges facing the world today Unmaking the Bomb proposes a new approach to reaching these long held goals Rather than considering them as separate issues the authors physicists and experts on nuclear security argue that all three of these goals can be understood and realized together if we focus on the production stockpiling and disposal of plutonium and highly enriched uranium the fissile materials that are the key ingredients used to make nuclear weapons The authors describe the history production national stockpiles and current military and civilian uses of plutonium and highly enriched uranium and propose policies aimed at reducing and eventually eliminating these fissile materials worldwide These include an end to the production of highly enriched uranium and plutonium for weapons an end to their use as reactor fuels and the verified elimination of all national stockpiles **Unmaking the Bomb**, 2014 **Nuclear Disarmament** Bård Steen, Olav Njølstad, 2019-03-14 This volume Nuclear Disarmament provides a comprehensive overview of nuclear disarmament and a critical assessment of the way forward Comprising essays by leading scholars on nuclear disarmament the book highlights arguments in favour and against a world without nuclear weapons global zero In doing so it proposes a new baseline from which an everchanging nuclear arms control and disarmament agenda can be assessed Numerous paths to nuclear disarmament have been proposed and scrutinized and with an increasing number of countries signing off on the Treaty on the Prohibition of Nuclear Weapons it is vital to ask which path is the most likely and realistic to succeed The chapters here also address the rapid pace of technological political and climatic developments in relation to nuclear disarmament and how they add to the complexity of the issue Taking care to unite the different tribes in the debate this book provides a community of dissent at a time when academic tribalism all too often prevents genuine debates from taking place This book will be of interest to students of nuclear proliferation arms control security studies and International Relations **The 2017 Nuclear Ban Treaty** Joseph A. Camilleri, Michael Hamel-Green, Fumihiko Yoshida, 2020-05-21 Rising concern over the increasing threat of nuclear war impelled the 2017 United Nations UN negotiations and adoption by 122 UN member states of a Treaty on the Prohibition of Nuclear Weapons The Treaty seeks to ban nuclear weapons globally in the same way chemical and biological weapons have already been prohibited This book provides the first in depth comprehensive analysis of the implications and possibilities of the new treaty drawing on the insights of international relations international laws and disarmament experts and specialists from Europe America the Asia Pacific and the UN In a context where existing nuclear weapon states have so far declined to be party to the new treaty the book examines not only its emergence and significance but also the prospects and possibilities for its implementation the challenges associated with

verifying the new agreement the role of both civil society and governments and the treaty's wider implications in addressing regional and global nuclear threats This book was originally published as a special issue of Global Change Peace Security but additionally includes the special section articles on the treaty in the Journal for Peace and Nuclear Disarmament

International Cooperation for Enhancing Nuclear Safety, Security, Safeguards and Non-proliferation Luciano Maiani, Said Abousahl, Wolfango Plastino, 2015-10-15 This book comprising contributions presented at the XIX Edoardo Amaldi Conference examines important aspects of international cooperation aimed at enhancing nuclear safety security safeguards the 3S and non proliferation thereby assisting in the development and maintenance of the verification regime and progress toward a nuclear weapon free world The Conference served as a forum where eminent scientists diplomats and policymakers could compare national perspectives and update international collaborations The book opens by addressing the political institutional and legal dimensions of the 3S and non proliferation current challenges are discussed and attempts made to identify possible solutions and future improvements Subsequent sections consider scientific developments that can contribute to increased effectiveness in the implementation of international regimes particularly in critical areas technology foresight and the ongoing evaluation of current capabilities The closing sections discuss scientific and technical challenges to the effective implementation of the 3S approach and the role of international cooperation and scientific community actions in leading the world toward peace and security Parameters, 2014

Nuclear Non-Proliferation in International Law Jonathan L. Black-Branch, Dieter Fleck, 2015-09-24 This second Volume in the book Series on Nuclear Non Proliferation in International Law discusses the legal interpretation and implementation of verification and compliance with the Treaty of the Non Proliferation of Nuclear Weapons 1968 the Comprehensive Nuclear Test Ban Treaty 1996 and the Treaty establishing the European Atomic Energy Community EURATOM 1957 It specifically examines the question contested in recent academic writings whether the International Atomic Energy Agency IAEA is competent to verify not only the correctness but also the completeness of national declarations Topical legal issues of verification and its technical and political limits as well as peaceful settlement of disputes and countermeasures are discussed in depth The Series on Nuclear Non Proliferation in International Law provides scholarly research articles with critical commentaries on relevant treaty law best practice and legal developments thus offering an academic analysis and information on practical legal and diplomatic developments both globally and regionally It sets a basis for a further constructive discourse on the topic at both national and international levels A Third Volume to be published in Autumn 2016 will focus on legal issues of safety and security of the use of nuclear energy for peaceful purposes Jonathan L Black Branch is Professor of International Law Royal Holloway University of London a Member of Wolfson College Oxford Chairman of the International Law Association ILA Committee on Nuclear Weapons Non Proliferation and Contemporary International Law Dieter Fleck is Former Director International Agreements Member of the Advisory Board of the Amsterdam Center for International Law ACIL Honorary President International Society for

nuclear technology and the controversies that surround it Are you for nuclear power or against it What s the basis of your opinion Did you know a CT scan gives you some 2 millisieverts of radiation Do you know how much a millisievert is Does irradiation make foods safer or less safe What is the point of a bilateral Russia US nuclear weapons treaty in a multipolar world These are nuclear questions that call for nuclear choices and this book equips citizens to make these choices informed ones It explains clearly and accessibly the basics of nuclear technology and describes the controversies surrounding its use

Nuclear Risks and Arms Control - Problems and Progresses in the Time of Pandemics and War Paolo Cotta-Ramusino, Micah Lowenthal, Luciano Maiani, Enza Pellecchia, 2023-08-24 This open access book is based on the conference organised by Accademia dei Lincei and the US National Academy of Sciences and supported by the Italian Ministero degli Affari Esteri It was attended by about 60 scientists and researchers from 13 countries including besides Europe Iran Israel Iraq Pakistan India Japan Russian Federation and the USA In an international scenario shaken by the uncertainties of the pandemic and the war between Russia and Ukraine dialogue and scientific collaboration are confirmed to be precious tools to enhance nuclear safety security and non proliferation The urgency to open peace discussions in Ukraine was emphasised by all participants and the belief that science can make an essential contribution to peace construction was reaffirmed Current challenges some new such as autonomous weapons and the use of artificial intelligence for war purposes are discussed and attempts made to identify possible solutions and future improvements including in the field of sustainable energy development

China and International Nuclear Weapons Proliferation Henrik Stålhane Hiim, 2018-07-24 This book explores China s approach to the nuclear programs in Pakistan Iran and North Korea A major power with access to nuclear technology China has a significant impact on international nuclear weapons proliferation but its attitude towards the spread of the bomb has been inconsistent China s mixed record raises a broader question why when and how do states support potential nuclear proliferators This book develops a framework for analyzing such questions by putting forth three factors that are likely to determine a state s policy 1 the risk of changes in the nuclear status or military doctrines of competitors 2 the recipient s status and strategic value and 3 the extent of pressure from third parties to halt nuclear assistance It then demonstrates how these factors help explain China s policies towards Pakistan Iran and North Korea Overall the book finds that China has been a selective and strategic supporter of nuclear proliferators While nuclear proliferation is a security challenge to China in some settings in others it wants to help its friends build the bomb This book will be of much interest to students of international security nuclear proliferation Chinese foreign policy and International Relations in general

Reducing the Use of Highly Enriched Uranium in Civilian Research Reactors National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on the Current Status of and Progress Toward Eliminating Highly Enriched Uranium Use in Fuel for Civilian Research and Test Reactors, 2016-02-12 The continued presence of highly enriched uranium HEU in civilian

installations such as research reactors poses a threat to national and international security Minimization and ultimately elimination of HEU in civilian research reactors worldwide has been a goal of U S policy and programs since 1978 Today 74 civilian research reactors around the world including 8 in the United States use or are planning to use HEU fuel Since the last National Academies of Sciences Engineering and Medicine report on this topic in 2009 28 reactors have been either shut down or converted from HEU to low enriched uranium fuel Despite this progress the large number of remaining HEU fueled reactors demonstrates that an HEU minimization program continues to be needed on a worldwide scale Reducing the Use of Highly Enriched Uranium in Civilian Research Reactors assesses the status of and progress toward eliminating the worldwide use of HEU fuel in civilian research and test reactors

Disarmament and Decommissioning in the Nuclear Domain Jean-Claude Amiard,2021-08-19 Following the acquisition of the atomic bomb by five states the United Nations

began drafting several treaties to limit nuclear proliferation These efforts failed as four more states also acquired nuclear weapons In a similar vein an attempt to limit atomic weapons primarily within the two superpowers was initiated While the number of weapons has decreased the new bombs now being manufactured are more powerful and more precise negating any reduction in numbers In the field of civil nuclear use all nuclear facilities reactors factories etc have a limited lifespan Once a plant is permanently shut down these facilities must be decommissioned and dismantled These operations are difficult time consuming and costly In addition decommissioning generates large volumes of radioactive waste of various categories including long lived and high activity waste Risks to the environment and to health are not negligible during decommissioning The International Atomic Energy Agency IAEA and the Nuclear Energy Agency NEA of the Organisation for Economic Co operation and Development OECD have produced numerous publications with recommendations Each state has its own decommissioning strategy immediate or delayed and final plan for the site whether it be returning it to greenfield status or obtaining a nuclear site license with centuries long monitoring

World Politics Jeffrey Haynes,Peter Hough,Shahin Malik,Lloyd Pettiford,2017-03-20 Praised for achieving significant breadth and depth of coverage of all the key themes of IR this introduction is also full of a range of features and techniques including a wide range of contemporary case studies and reflection boxes to help students become adept at the subject quickly and easily

Nuclear Decisions Lisa Langdon Koch,2023 For decades countries have pursued nuclear weapons by taking many different paths toward or away from the bomb Those paths have been difficult to predict because they are defined not by security or wealth but by the decisions leaders make to accelerate or reverse their nuclear weapons programs Nuclear decisions are made within a complex political information environment that affects how security concerns and the value of a nuclear weapons program are understood By examining nine fascinating country case histories this book elucidates the key factors that shape the decision making environment

Radical Transformation Imants Barušs,2021-01-28 In Radical Transformation Imants Baru s leads the reader out of the receding materialist paradigm into an emerging post materialist landscape in which new

questions present themselves If consciousness has nonlocal properties then how are boundaries between events established If consciousness directly modulates physical manifestation then what is the scope of such modulation If consciousness continues after physical death then how much interference is there from non physical entities As we face the threat of extinction on this planet is there anything in recent consciousness research that can help us Are there effective means of self transformation that can be used to enter persistent transcendent states of consciousness that could resolve existential and global crises The author leads the reader through discussions of meaning radical transformation and subtle activism revealing the unexpected interplay of consciousness and reality along the way **Defense 101** Michael E.
