Unraveling Ties From Social Cohesion To New Practices Of Connectedness:

Unraveling Ties Yehuda Elkana, Shalini Randeria, 2002 *Unraveling Ties* is a unique addition to current debates in sociology a compilation of essays mapping the creation of community life in a modern world that often appears alienating cold and even threatening Topics range from family life and friendship to the integral role of the deviant in society The result is a thoughtful meticulously researched volume that will be useful to sociologists economists and anyone interested in the creation of community in a decentralized and rapidly globalizing world *Competing Sovereignties* Richard Joyce, 2012-08-21 *Competing Sovereignties* provides a critique of the concept of sovereignty in modernity in light of claims to determine the content of law at the international national and local levels In an argument that is illustrated through an analysis of debates over the control of intellectual property law in India Richard Joyce considers how economic globalization and the claims of indigenous communities do not just challenge national sovereignty as if national sovereignty is the only kind of sovereignty but in fact invite us to challenge our conception of what sovereignty is Combining theoretical research and reflection with an analysis of the legal institutional and political context in which sovereignties compete the book offers a reconception of modern sovereignty and with it a new appreciation of the complex issues surrounding the relationship between international organisations nation states and local and indigenous communities *Competing Sovereignties* Richard John Joyce, 2013 *Competing Sovereignties* provides a critique of the concept of sovereignty in modernity in light of claims to determine the content of law at the international national and local levels In an argument that is illustrated through an analysis of debates over the control of intellectual property law in India Richard Joyce considers how economic globalization and the claims of indigenous communities do not just challenge national sovereignty as if national sovereignty is the only kind of sovereignty but in fact invite us to challenge our conception of what sovereignty is Combining theoretical research and reflection with an analysis of the legal institutional and political context in which sovereignties compete the book offers a reconception of modern sovereignty and with it a new appreciation of the complex issues surrounding the relationship between international organisations nation states and local and indigenous communities *Transnationalizing Inequalities in Europe* Anna Amelina, 2016-09-13 Unequal life chances became a key feature of cross border migration to and within the enlarged Europe Combining transnational intersectional and cultural sociological perspectives this book develops a conceptual tool to analyse patterns contexts and mechanisms of these cross border inequalities This book synthesizes the theories of social boundaries and of intersectionality approaching cross border relations as socially generated and as an inherent element of contemporary social inequalities It analyses the mechanisms of cross border inequalities as regimes of intersection relating spatialized cross border inequalities to other types of unequal social relations in terms of gender ethnicity race class etc The conceptual arguments are supported by empirical research on cross border migration in Europe migration of scientists and care workers between Ukraine and Germany This book integrates the analysis of space including

cross border categories of global and transnational into intersectionally informed studies of social inequalities Broadly it will appeal to scholars and students in the areas of sociology political sciences social anthropology and social geography In particular it will interest researchers concerned with transnational and global social inequalities the interplay of the categories gender ethnicity and class on the one hand and global and transnational relations on the other theories of space and society and migration and mobility in Europe

New Perspectives on the Transnational Right M.

Durham,2016-06-08 The links the conservative Right has sought to forge beyond the national over the last century have been too often neglected and this volume sheds new light on transnationalism the Right and the ways the two interact

The Pushing-Hands of Translation and its Theory Douglas Robinson,2016-05-12 This book presents an East West dialogue of leading translation scholars responding to and developing Martha Cheung s pushing hands method of translation studies Pushing hands was an idea Martha began exploring in the last four years of her life and only had time to publish at article length in 2012 The concept of pushing hands suggests a promising line of inquiry into the problem of conflict in translation Pushing hands opens a new vista for translation scholars to understand and explain how to develop an awareness of non confrontational alternative ways to handle translation problems or problems related to translation activities that are likely to give rise to tension and conflict The book is a timely contribution to celebrate Martha s work and also to move the conversation forward Despite being somewhat tentative and experimental it probes into how to enable and develop dynamic interaction between and reciprocal determinism of different hands involved in the process of translation

The Communicative Construction of Reality Hubert Knoblauch,2019-12-06 This volume advocates a shift from the social constructivism found in the work of Thomas Luckmann and Peter Berger to a communicative constructivism that acknowledges communication as an embodied form of action in its own right according to which social actors in engaging in communicative action construct a material social reality that guides delimits and enables actions A study of the importance of understanding the role of communication in an age in which digitization and mediatization have extended the reach of communication to a global level and brought about the emergence of the communication society The Communicative Construction of Reality shows how communication society does not merely replace modern society and its hierarchical institutions but complements it in a manner that continually results in conflicts leading to the refiguration of society As such it will appeal to scholars of sociology with interests in the sociology of knowledge communication and social theory

A New Virtual Ethics René Reinhold Schalleger,2024-10-07 We are witnessing the collapse of the postwar consensus the implosion of the caring society In times of social economic and political insecurity egotism spreads Many popular videogames follow a logic of consumerist self gratification and self empowerment Deeply political videogames contribute to the transformation of players causing a need for change in what game designers do and how and why they do it Awareness of the socio political and cultural contexts can be promoted by the mainstream videogame market for critical active participation

This book focuses on the need for individual self realization in Western societies and how it manifests in the various dimensions of videogames Videogames remind us that we can never be isolated in a world defined by complexity and interlaced systems Connecting videogames and new Neo Kantian virtual ethics builds upon notions of agency mutual respect and obligation This addresses humans in their entirety as thinking acting and feeling agents through engagement immersion and involvement *How to Write the Global History of Knowledge-Making* Johannes Feichtinger, Anil Bhatti, Cornelia Hülmbauer, 2020-03-02 This multidisciplinary collection of essays provides a critical and comprehensive understanding of how knowledge has been made moved and used by whom and for what purpose To explain how new knowledge emerges this volume offers a two fold conceptual move challenging both the premise of insurmountable differences between confined autarkic cultures and the linear nation centered approach to the spread of immutable stocks of knowledge Rather the conceptual focus of the book is on the circulation amalgamation and reconfiguration of locally shaped bodies of knowledge on a broader global scale The authors emphasize that the histories of interaction have been made less transparent through the study of cultural representations thus distorting the view of how knowledge is actually produced Leading scholars from a range of fields including history philosophy social anthropology and comparative culture research have contributed chapters which cover the period from the early modern age to the present day and investigate settings in Africa Asia and Europe Their particular focus is on areas that have largely been neglected until now In this work readers from many disciplines will find new approaches to writing the global history of knowledge making especially historians scholars of the history and philosophy of science and those in culture studies *Crimes Against Humanity* Nergis Canefe, 2021-04-15 This book brings together jurisprudential debates on international criminal law international law scholarship on the limits of state sovereignty and applied political philosophy concerning responsibility and accountability in the context of mass political crimes and state criminality It offers a compelling view of legal reasoning concerning accountability regimes in the Global South No other study addresses questions of ethical dimensions of mass crimes and accountability for state criminality *Reshaping Globalization* Violetta Zentai, Andrea Krizsán, 2003 If the importance of globalization were judged by the volume of discussion it has generated it would surely be a concept of fundamental importance in the contemporary world And yet as a concept globalization is often indigestible meaning different things to different people and remaining obscure in its connotations A virtue of this volume of essays is that the phenomena of globalization are made more approachable by being divided into five discrete themes each of which forms part of the overall concept and each of which has important implications for policy decisions at the international regional and national levels By differentiating the concept in this way into the production of global knowledge the provision of global public goods the global trade system global foreign aid and global governance the analysis is sharpened in an illuminating and stimulating manner At the same time the editors Drs Violetta Zentai and Andrea Krizsan provide a masterly introductory essay that shows how the various parts make up the whole The fact that the book is a

product of an international conference held at the Central European University shortly after September 11 in 2001 adds a layer to its significance The Center for Policy Studies at the Central European University and its collaborators deserve praise for such a thorough and timely analysis of these various strands of globalization Book jacket **Negotiating**

Modernization Through U.S. Foreign Assistance Burcak Keskin Kozat, 2006 Hybridising East and West Dominique Schirmer, Gernot Saalmann, Christl Kessler, 2006 Up to now debates on hybridisation are rather theoretical This book takes an empirical look at both everyday cultures and lifestyles religion medicine and scientific cultures and the directions of influences The findings suggest that hybridity and hybridising have to be conceptualised as processes of mixture relevant for constructing identities being increasingly positively denoted and displaying the multidirectionality and multidimensionality of hybridising processes In our globalised world such a mixture is very frequent highly present and rather inescapable

Shifting Obsessions Ivan Krastev, 2004-06-10 Annotation Rather than being a study of anti corruption policies this work looks at the politics of anti corruption and their institutional motivations Krastev argues that anti corruption sentiments are not driven by the actual level of corruption but by general disappointment with liberal reforms that cause rising social inequality In this collection of essays the author makes the provocative argument that the current corruption focused policies are doomed **Portuguese Literary & Cultural Studies**, 2003 **New Europe College Yearbook**, 2005 **God**

Needs No Passport Peggy Levitt, 2007 A provocative examination of how new realities of religion and migration are subtly challenging the very definition of what it means to be an American Sociology professor Levitt argues that immigrants no longer trade one membership card for another but stay close to their home countries indelibly altering American religion and values with experiences and beliefs imported from Asia Latin America and Africa The book is a pointed response to Samuel Huntington's famous clash of civilisations thesis and looks at global religions organisation for the first time *Die*

Wirklichkeit der Städte Helmuth Berking, Martina Löw, 2005 Die Stadt ist ein Begriff der eine ganze Welt im Schlepptau halt eine semantische Verdichtung mittels derer sich nicht nur Wahrnehmungen Bilder und Erfahrungen sondern auch kulturelle Wissensbestände produzieren und organisieren lassen Obwohl Städte seit 10 000 Jahren physisch präsent sind ist der Streit um den ontologischen Status der Stadt längst nicht entschieden die Frage nach einem vorgängigen Gegenstand Stadt heute umstrittener denn je Dabei lässt sich kaum ein Problem identifizieren dass nicht an und in den Städten imaginiert worden wäre In den Städten verweilt das Gedächtnis der Menschheit Städte sind Weltanschauungen Lebensformen Philosophien Räume des Begehrens Arenen der Macht und ihres Verfalls *Local Knowledge and Gender in Ghana* Christine Müller, 2005

The emergence of global knowledge societies is recently questioning the meaning and relevance of local knowledge in the context of Southern countries Women have proved to be the central actors in the multiple channels of local global networking using these new social ties for the negotiation of old and new elements of knowledge scientific knowledge and development discourses The inherent politicisation of knowledge and the direct objective of transforming societal institutions are not only

signs of resistance against global hegemony but serve for a new definition and for a defence of local culture and of local knowledge *Bulletin* ,2007
