Untangling the Web Aleks Krotoski, 2013-05-20 The World Wide Web is the most revolutionary innovation of our time In the last decade it has utterly transformed our lives But what real effects is it having on our social world What does it mean to be a modern family when dinner table conversations take place over smartphones What happens to privacy when we readily share our personal lives with friends and corporations Are our Facebook updates and Twitterings inspiring revolution or are they just a symptom of our global narcissism What counts as celebrity when everyone can have a following or be a paparazzo And what happens to relationships when love sex and hate can be mediated by a computer Social psychologist Aleks Krotoski has spent a decade untangling the effects of the Web on how we work live and play In this groundbreaking book she uncovers how much humanity has and hasn t changed because of our increasingly co dependent relationship with the computer In Untangling the Web she tells the story of how the network became woven in our lives and what it means to be alive in the age of the Internet

Hate Crimes David L. Hudson, 2009 Hate crimes are crimes that are motivated by hate or prejudice whether it is based on race ethnicity sexual orientation or gender Many people argue that these crimes should carry extra penalties because in the words of former Supreme Court Chief Justice William H Rehnquist this conduct is thought to inflict greater individual and societal harm bias motivated crimes are more likely to provoke retaliatory crimes inflict distinct emotional harms on their victims and incite community unrest Opponents of hate crime laws argue that extra penalties amount to prosecuting people for thought crimes Hate Crimes examines both sides of this debate
