Urban Environment and Infrastructure Anthony G. Bigio, Bharat Dahiya, 2004

The World Bank Research Program 2004 World Bank, 2005 The World Bank's research is intended to address critical issues and problems facing member governments in developing and transition economies How can the governments of the poorest countries generate enough revenue to provide the education and health services

essential to reducing poverty and promoting growth and development How can poor countries attract investors to build the infrastructure their economies need How can they develop systems to bring clean water to the 2 billion people without it today How can they train teachers and bring to class the 115 million children who have not yet received any education And how can rich countries be persuaded to lower market barriers helping to reverse the decline in export prices for poor countries that has left them earning less from trade today than in the 1970s These are the types of questions that are addressed in this edition of The World Bank Research Program Abstracts from Current Studies This volume reports on research projects initiated under way or completed from July 2003 through June 2004 It covers 151 research projects on several broad development related issues including agriculture health education environment infrastructure investment climate and more The abstract for each project describes the questions addressed the analytic methods used the findings to date and policy implications

Architecture Martin van der Linden, 2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic
