Harmon, Sophie E. Baker, Eric V. McDonald, 2014-08-22 Eighteen chapters address the complex yet critical aspects of the role of geosciences in military undertakings The chapters cover a wide range of expertise drawn from the broad area of geology geomorphology geography geophysics engineering geology hydrogeology cartography environmental science remote sensing soil science geoinformatics and related disciplines that reflect the multidisciplinary nature of military geology *Armor*, 2010 **Library Journal**, 2009 *Barriers to Bioweapons* Sonia Ben Ouagrham-Gormley, 2014-12-15 In both the popular imagination and among lawmakers and national security experts there exists the belief that with sufficient motivation and material resources states or terrorist groups can produce bioweapons easily cheaply and successfully In *Barriers to Bioweapons* Sonia Ben Ouagrham Gormley challenges this perception by showing that bioweapons development is a difficult protracted and expensive endeavor rarely achieving the expected results whatever the magnitude of investment Her findings are based on extensive interviews she conducted with former U S and Soviet era bioweapons scientists and on careful analysis of archival data and other historical documents related to various state and terrorist bioweapons programs Bioweapons development relies on living organisms that are sensitive to their environment and handling conditions and therefore behave unpredictably These features place a greater premium on specialized knowledge Ben Ouagrham Gormley posits that lack of access to such intellectual capital constitutes the greatest barrier to the making of bioweapons She integrates theories drawn from economics the sociology of science organization and management with her empirical research The resulting theoretical framework rests on the idea that the pace and success of a bioweapons development program can be measured by its ability to ensure the creation and transfer of scientific and technical knowledge The specific organizational managerial social political and economic conditions necessary for success are difficult to achieve particularly in covert programs where the need to prevent detection imposes managerial and organizational conditions that conflict with knowledge production Canadian Forces in Afghanistan 3-Book Bundle Bernd Horn, Emily Spencer, 2016-02-27 Canadian Forces including Special Operations Forces have played an outsize role in the conflict in Afghanistan often under a cloak of secrecy For the first time Col Bernd Horn reveals the stories of the troops and operations behind Canada's pivotal involvement in the Afghanistan conflict *No Ordinary Men* Peels back the cloak of

secrecy and reveals four untold special operations that Joint Task Force 2 an elite counterterrorist unit conducted in 2005 06 in which their courage tenacity and impressive capabilities meant the difference between life and death No Lack of Courage The story of the North Atlantic Treaty Organization s Operation Medusa the largely Canadian action in Afghanistan from 1 to 17 September 2006 to dislodge a heavily entrenched Taliban force in the Pashmul district of Afghanistans Kandahar Province No Easy Task Afghanistan has long been considered the graveyard of empires Those who have ventured into Afghanistan with notions of controlling its people have soon discovered that fighting in that rugged hostile land is no easy task This collection of essays examines this legacy of conflict particularly from a Canadian perspective *Adopting Mission Command* Donald Vandergriff,2019-09-15 In September 2010 James G Pierce a retired U S Army colonel with the Strategic Studies Institute at the U S Army War College in Carlisle Barracks Pennsylvania published a study on Army organizational culture Pierce postulated that the ability of a professional organization to develop future leaders in a manner that perpetuates readiness to cope with future environmental and internal uncertainty depends on organizational culture He found that today s U S Army leadership may be inadequately prepared to lead the profession toward future success The need to prepare for future success dovetails with the use of the concepts of mission command This book offers up a set of recommendations based on those mission command concepts for adopting a superior command culture through education and training Donald E Vandergriff believes by implementing these recommendations across the Army that other necessary and long awaited reforms will take place **Ciottone's Disaster Medicine - E-Book** Gregory R. Michel,2012 France is the only European ally except for the United Kingdom UK that regards its military capabilities operational performance and defense industry as vital levers to exert global influence While the French believe strongly in their need to preserve strategic independence they see new challenges in the evolving international security environment that will oblige them to accept greater cooperation with others even in areas once considered too sensitive to discuss Although some French strategists remain uncomfortable with the notion of closer defense ties with the United States others ask whether there might be a greater danger ahead specifically if Europe s strength dissipates as America rebalances toward the Asia Pacific region where does France turn to find capable and willing partners to protect its security interests The Libyan conflict in 2011 brought to light many of the cross currents that are shaping French defense policy French leaders are proud of their military s performance in Libya which many view as having validated President Nicolas Sarkozy s decision in early 2009 on France s return to full

participation in North Atlantic Treaty Organization NATO military structures But the conflict also exposed Europe's continuing dependence on U S military capabilities reinforced France's lack of confidence in Germany and the European Union as serious military partners and increased its determination to improve defense cooperation with the United Kingdom Despite some downsizing France has resisted the dramatic cuts in defense spending and capabilities under way elsewhere in Europe If Sarkozy wins the presidential election on May 6 2012 he can be expected to continue many elements of the transformation strategy launched by his government's June 2008 White Book on Defense and National Security If the Socialist Party challenger Francois Hollande wins he will reassure leaders at the NATO Summit in Chicago May 20 21 2012 that France will maintain its nuclear deterrent and participation in NATO military structures But reductions in the defense budget are likely whether Sarkozy or Hollande wins There will be opportunities for expanded U S French and perhaps U S UK French defense cooperation under a Sarkozy or Hollande administration But Paris and Washington will need to manage tensions related to their respective defense industries For the United States more is at stake than the health of the French defense establishment France's policies capabilities and operational commitments can play an important role in shaping those of many other Europeans By working even more closely with its oldest ally the United States can help ensure the credibility and effectiveness of the Alliance as a whole P 1 2
