East and West in Comparative Education Soong Hee Han, Peter Jarvis, 2017-10-02 Sparked by global capitalism s demand for new knowledge and new commodities as well as new logistical systems to deliver them the nature of education has changed significantly Universities in striving to become a part of this knowledge society have focused on responding to these demands at the expense of the humanities and social sciences The dominance of this way of thinking primarily a product of Western educational thought has clearly affected approaches to education in the East The originalities authenticities and unique perspectives of the East have failed to get enough attention subsumed by the focus on science and technology However many education systems are still endeavouring to capture some of the indigenous and authentic culture of their home countries incorporating national cultural ideals even in subjects with a primarily vocational focus Although the drive for scientific knowledge has led to a degree of standardisation and convergence cultural differences still play a role in the education theory and policy of different countries This book examines these cultural differences between different East Asian and South Asian countries with chapters ranging from historical educational analysis to contemporary re interpretations of the construction of society and education in the East This book was originally published as a special issue of Comparative Education **Rewriting Psychology** David Y. F. Ho , 2019-06-15 Of what use is psychology if it does not help to solve the pressing problems of the day at the individual and collective levels This is no less a pointed question to the reader as it is to the author that sets the stage for an adventurous sharing of ideas The author shies away from providing ready made answers but spares no effort in stirring the reader to ponder questions about human nature and behavior Soon the reader will react

with the exclamation Ah this book is about me useful to my life In this way the book serves to bridge the gap between academia and the general public As the reader may well expect bold assertions may be found throughout this volume For instance Piaget s stage of formal operations does not represent the final or highest level of cognitive development rather dialectical thinking is the apex of human cognition Viewpoints may be controversial such as cautioning against importing Confucian education into America the possibility that madness may enrich your life raising the question if Trump is immoral mentally deranged or both The present offering is at once audacious and provocative Having raised the question about the abysmal status of psychology the author feels compelled to take on the challenge of rewriting an academic discipline The reader is invited to consider new visions for psychology s future development both scientific and practical Fresh materials or distinctive features seldom found elsewhere are presented the author s secret thoughts and self revelations a discussion on the birth of evil and reinterpretation of the fall of humankind All these expand the traditional boundaries of psychology and bring it closer to be a science relevant to the human condition Contending Visions of the Middle East Zachary Lockman,2010 This second edition considers how the global war on terror has changed the way the West views the Islamic world **East Central European Art Histories and Austria** Karolina Majewska-Güde,Monika Leisch-Kiesl,2024-05-06 The specific role of the Austro Hungarian Empire and the later nation of Austria within the formation of regional art histories in East Central Europe has received little attention in art historical research so far Taking into account the era of the Dual Monarchy as well as the period after 1989 the contributions analyze and critically scrutinize the imperial legacies transnational transfer processes and cultural hierarchies in art historiographies artistic practices and institutional histories Consisting of 17 texts with new commissions and one reprint case studies monographic essays and interviews grouped thematically into two sections the anthology proposes a pluriversal narrative on regional cultural and political contexts The Helsinki Forum and East-West Scientific Exchange United States. Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology,1980 *Eastern Orthodoxy Through Western Eyes* Donald Fairbairn,2002-01-01 In the last decade Eastern Orthodoxy has moved from being virtually unknown to Western Christians to being a significant presence on the religious scene in North America and Great Britain In light of Orthodoxy s growing presence this book will introduce Western Christians to the Eastern Orthodox vision of the Christian life by examining Orthodox theology and worship and will also alert readers to the cultural and historical factors that shape any interpretation of the Christian faith Education and Learning Jane Mellanby,Katy Theobald,2014-03-31 Education and Learning offers an accessible introduction to the most recent evidence based research into teaching learning and our education system Presents a wide range references for both seminal and contemporary research into learning and teaching Examines the evidence around topical issues such as the impact of Academies and Free Schools on student attainment and the strong international performance of other countries Looks at evidence based differences in the attainment of students

from different socioeconomic and ethnic backgrounds and explores the strong international performance of Finnish and East Asian students Provides accessible explanations of key studies that are supplemented with real life case examples

AgExporter,1992 **A Spiritual Discovery of the Christians in the Middle East** Gabriel Quicke,2020-06-22 This book presents the various Churches and ecclesial communities in the Middle East focusing on the Assyrian Church of the East the Oriental Orthodox and the Oriental Catholic Churches the spiritual heritage of the Coptic Syriac and Armenian traditions The Christians in the Middle East can be called a Church of martyrs Listening to witnesses of faith in the first centuries as well as to the martyrs of our time this book reveals the cruel reality of the forgotten genocides at the beginning of the twentieth century The author discusses the role of Christians in the Middle East as bridge builders and emphasizes the importance of a historical perspective in order to understand better the crisis in the Middle East the search for the underlying cause of terrorist attacks a plea for a spirituality of encounter a growth in openness and a deepening of Christian identity Finally he reflects on the responsibility of the West and expresses the firm hope and expectation that there is still a future for the Christians in the Middle East a new dawn **Poverty and Wealth in East Africa** Rhiannon

Stephens,2022-10-24 Rhiannon Stephens offers a conceptual history of how people living in eastern Uganda have sustained and changed their ways of thinking about wealth and poverty over the past two thousand years *East-West Trade* United States. Congress. Senate. Committee on Banking and Currency. Subcommittee on International Finance,1968 **Jungian**

Psychology in the East and West Konoyu Nakamura,Stefano Carta,2021-07-29 It is well known that Jung s investigation of Eastern religions and cultures supplied him with an abundance of cross cultural comparative material useful to support his hypotheses of the existence of archetypes the collective unconscious and other manifestations of psychic reality However the specific literature dealing with this aspect has previously been quite scarce This unique edited collection brings together contributors writing on a range of topics that represent an introduction to the differences between Eastern and Western approaches to Jungian psychology Readers will discover that one interesting feature of this book is the realization of how much Western Jungians are implicitly or explicitly inspired by Eastern traditions including Japanese and at the same time how Jungian psychology the product of a Western author has been widely accepted and developed by Japanese scholars and clinicians Scholars and students of Jungian studies will find many new ideas theories and practices gravitating around Jungian psychology generated by the encounter between East and West Another feature that will be appealing to many readers is that this book may represent an introduction to Japanese philosophy and clinical techniques related to Jungian psychology Middle East: Tricontinental Hub United States. Department of the Army,1965
