Where The World Ended Re Unification And Identity In The German Borderland:

Where the World Ended Daphne Berdahl, 1999-04-10 Focusing on the re unification of Germany this text asks what happens when a political and economic system collapses overnight It concentrates especially on how these changes have affected certain border zones of daily life including social organization gender and religion

Consuming Germany in the Cold War David F. Crew, 2003-09-01 Sitting in the ruins of the Third Reich most Germans wanted to know which of the two post war German states would erase the material traces of their wartime suffering most quickly and most thoroughly Consumption and the quality of everyday life quickly became important battlefields upon which the East West conflict would be fought This book focuses on the competing types of consumer societies that developed over time in the two Germanies and the legacy each left Consuming Germany in the Cold War assesses why East Germany increasingly fell behind in this competition and how the failure to create a viable socialist consumer society in the East helped lead to the fall of the Berlin Wall in 1989 By the 1970s East Germans were well aware that the regime s bombastic promises that the GDR would soon overtake the West had become increasingly hollow For most East German citizens West German consumer society set the standards that East Germany repeatedly failed to meet By exploring the ways in which East and West Germany have functioned as each other s other since 1949 this book suggests some of the possibilities for a new narrative of post war German history While taking into account the very different paths pursued by East and West Germany since 1949 the contributors demonstrate the importance of competition and highlight the connections between the two German successor states as well as the ways in which these relationships changed throughout the period By understanding the legacy that forty plus years of rivalry established we can gain a better understanding of the current tensions between the eastern and western regions of a united Germany

On the Social Life of Postsocialism Daphne Berdahl, 2010 Anthropologist Daphne Berdahl was one of the leading scholars of the transition from state socialism to capitalism in central and eastern Europe From her pathbreaking ethnography of a former East German border village in the aftermath of German reunification to her insightful analyses of consumption nostalgia and citizenship in the early 21st century Berdahl s writings probe the contradictions paradoxes and ambiguities of postsocialism as few observers have done This volume brings together her essays from an early study of memory at the Vietnam War memorial in Washington D C to research on consumption and citizenship undertaken in Leipzig in the years before her untimely death It serves as a superb introduction to the development of the field of postsocialist cultural studies

Immigration, Assimilation, and the Cultural Construction of American National Identity Shannon Latkin Anderson, 2015-11-19 Over the course of the 20th century there have been three primary narratives of American national identity the melting pot Anglo Protestantism and cultural pluralism multi culturalism This book offers a social and historical perspective on what shaped each of these imaginings when each came to the fore and which appear especially relevant early in the 21st century These issues are addressed by looking at the United States and elite notions of

the meaning of America across the 20th century centering on the work of Horace Kallen Nathan Glazer and Daniel Patrick Moynihan and Samuel P Huntington Four structural areas are examined in each period the economy involvement in foreign affairs social movements and immigration What emerges is a narrative arc whereby immigration plays a clear and crucial role in shaping cultural stories of national identity as written by elite scholars These stories are represented in writings throughout all three periods and in such work we see the intellectual development and specification of the dominant narratives along with challenges to each Important conclusions include a keen reminder that identities are often formed along borders both external and internal that structure and culture operate dialectically and that national identity is hardly a monolithic static formation

The Ethnographic Self as Resource Peter Jeffrey Collins, Anselma Gallinat, 2010 An excellent collection of anthropological autobiographical essays focusing on the positionality and resource of the self in ethnography The essays are engaging and well written and remind me of some of those classic anthropological ethnographic collections interesting in their own right to read but also serving as a good teaching resource Amanda Coffey Cardiff University

Don't Need No Thought Control Gerd Horten, 2020-06-05 The fall of the Berlin Wall is typically understood as the culmination of political economic trends that fatally weakened the East German state Meanwhile comparatively little attention has been paid to the cultural dimension of these dramatic events particularly the role played by Western mass media and consumer culture With a focus on the 1970s and 1980s Don't Need No Thought Control explores the dynamic interplay of popular unrest intensifying economic crises and cultural policies under Erich Honecker It shows how the

widespread influence of and public demands for Western cultural products forced GDR leaders into a series of grudging accommodations that undermined state power to a hitherto underappreciated extent

Playing Politics with History Andrew Beattie, 2008-09-01 After Germany's reunification in 1989-90 the country faced not only the history and consequences of the nation's division during the Cold War but also the continuing burdensome legacy of the Nazi past and the Holocaust This book explains why concerns that the Nazi past would be marginalized by the more recent Communist past proved to be misplaced It examines the delicate East West dynamics and the notion that the West sought to impose victor's justice or history on the East More specifically it examines for the first time the history and significance of two parliamentary commissions of inquiry created in the 1990s to investigate the divided past after 1945 and its effects on the reunified country Not unlike truth commissions elsewhere these inquiries provided an important forum for renegotiating contemporary Germany's relationship with multiple German pasts including the Nazi period and the Holocaust The ensuing debates and disagreements over the recent past examined by the author open up a window into the wider development of German memory identity and politics after the end of the Cold War
