Hannan, Giacomo Negro, 2022-02-01 The world of wine encompasses endless variety Consumers want to understand what makes one bottle of wine different from another vintners need to know how to communicate what makes their product distinctive Drawing on a decade of fieldwork in Italy and France as well as interviews with critics and analysis of market data Giacomo Negro Michael T Hannan and Susan Olzak provide an unprecedented sociological account of the dynamics of wine markets They demonstrate how the

concepts of genre and collective identity illuminate producers choices whether they are selling traditional or nonconventional wines Winemakers face a fundamental choice produce an existing style and develop an identity as a proponent of tradition or embrace foreign new or emerging categories and be seen as an innovator To explain this dilemma Negro Hannan and Olzak develop the notion of wine genres or shared understandings among producers and the public Genres emerge through the social structure of production including factors such as group solidarity social cohesion and collective action and become key reference points for critics and consumers Wine Markets features case studies of the creation of a modern wine genre and a countermovement against modernism in Piedmont the failure of producers of Brunello di Montalcino in Tuscany to define a clear collective identity and the emergence of the biodynamic wine movement in Alsace This book not only offers keen sociological insight into the wine world but also sheds new light on the logic of markets and organizations more broadly

vinification generate a significant amount of waste and several by products generally only a very small portion of these materials are used. The book gives you a detailed overview of the typology of different by products and describes several technological aspects of by product utilization. It details regulatory legislative and sustainability issues before exploring marketing potential and future perspectives. The book highlights wine by products as potential sources of bioactive phytochemicals which could be used for various purposes in the pharmaceutical, cosmetic and food industries. Efficient utilization of food processing by products represents challenges for the profitability of the food industry. In addition, during the next few years, the area of food processing waste management where wine industry plays a leading role will expand rapidly. This has resulted in the need for a detailed book on valorization of wine making by products. In response, this book provides you with a number of value adding technologies for the valorization of those products.

Making Sense of Place
 Ian Convery, Gerard Corsane, Peter Davis, 2012. The term sense of place is an important multidisciplinary concept used to understand the complex processes through which individuals and groups define themselves and their relationship to their natural and cultural environments and which over the last twenty years or so has been increasingly defined, theorized and used across diverse disciplines in different ways. Sense of place mediates our relationship with the world and with each other; it provides a profoundly important foundation for individual and community identity. It can be an intimate, deeply personal experience yet also something which we share with others. It is at once recognizable but never constant; rather, it is embodied in the flux between familiarity and difference. Research in this area requires culturally and geographically nuanced analyses, approaches that are sensitive to difference and specificity, event and locale. The essays collected here, drawn from a variety of disciplines including but not limited to sociology, history, geography, outdoor education, museum and heritage studies, health and English literature, offer an international perspective on the relationship between people and place via five interlinked sections: Histories, Landscapes and Identities, Rural Sense of Place, Urban Sense of Place, Cultural Landscapes, Conservation, Biodiversity and Tourism. Ian Convery is Reader in Conservation and Forestry, National School of Forestry, University of Cumbria. Gerard Corsane is Senior Lecturer in Heritage Museum and Gallery Studies, International Centre for Cultural and Heritage Studies, Newcastle University. Peter Davis is Professor of Museology, International Centre for Cultural and Heritage Studies, Newcastle University.
