

Medios de transporte y Transporte Intermodal, Unimodal y Segmentado: Principales Diferencias

Marítimo: las empresas de logística recurren a esta vía cuando deben transportar volúmenes grandes a largas distancias.

Terrestre: suele usarse en casos en los que los volúmenes y las distancias son medias.

Aéreo: se recomienda para enviar cantidades pequeñas o cuando hay tiempos de entrega muy justos.

Transporte multimodal

De acuerdo con el Convenio de las Naciones Unidas sobre el Transporte Internacional de Mercancías, el multimodal es el transporte que se realiza por (mínimo) dos modos diferentes de transporte, desde un lugar situado en un país hasta su entrega en un país diferente. La particularidad del multimodal es que requiere un único contrato de transporte.

Transporte unimodal:

La tipología unimodal se refiere a la gestión de un único medio de transporte (tren, camión, avión o barco). Este es realizado por uno o más transportadores con un solo contrato, el cual debe incluir los documentos propios del medio elegido: Conocimiento de Embarque Marítimo, Carta de Porte Terrestre o Guía Aérea.

Transporte segmentado:

Para llevar a cabo el envío y transporte de mercancías se usan varios medios de transporte. Las principales diferencias con el transporte multimodal radican en los documentos y los contratos. En el transporte segmentado se usan tantos documentos de transporte como medios.

Transporte Aereo En Turismo Air Transportaion In Tourism Temas De Turismo:

Air Transport and Tourism M.R. Dileep,Ajesh Kurien,2021-09-30 Air Transport and Tourism Interrelationship Operations and Strategies is a comprehensive textbook covering all major aspects of air transport from operational and managerial perspectives as well as exploring the intricate relationship that exists between the air transport and tourism industries The book introduces and provides in depth coverage of the complexities of the airline industry and the tourism industry and the ways in which they are connected and impact on each other for example the destination airport airline nexus and the roles of air transport and airlines in tourism and vice versa Emphasis is placed on current and future trends the impact of COVID 19 sustainability and environmental challenges throughout Comprehensive coverage of airline operations strategic management and planning airport operations and air transport information technology is also provided offering a practical viewpoint on these vital aspects of the subject This will be the ideal introductory textbook for students of tourism and hospitality studying courses in aviation and air travel **Air Transport - A Tourism Perspective** Anne Graham,Frederic Dobruszkes,2019-02-11 Air Transport A Tourism Perspective provides rigorous insights into the current complexities synergies and conflicts within air transportation and tourism presenting a balanced comprehensive contemporary and global analysis that thoroughly examines the links between theory and practice The book offers readers a multi sector global perspective on the practical implications of the link between air transport and tourism By using a novel approach it systematically explores the successive stages of a tourist s trip investigating reasons for flying the airport experience airline industry structures competition and regulation and air transportation and destination interrelationships In addition the book explores current and salient debates on such issues as the influence of traveling to visit friends and family the role of charters versus low cost carriers public subsidies to support airport development and much more Presents insights from an international team of expert contributors with proven research and publication experience in their specialty area Includes cutting edge analyses based on original research that identifies emerging research directions and policy and managerial implications Utilizes a multidisciplinary approach to fully explore theoretical and policy concepts and their effect on air transportation and tourism development Provides case studies from around the globe in each chapter **Aviation and Tourism** Anne Graham,Andreas Papatheodorou,Peter Forsyth,2010 Transport is an essential element of tourism providing the vital link between the tourist generating areas and destinations Good accessibility which is determined by the transport services provided is a fundamental condition for the development of any tourist destination Moreover the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated Aviation is an increasingly important mode of transport for tourism markets Whilst geography has meant that in modern times air travel has always been the dominant mode for long distance travel and much international tourism moves towards deregulation and in particular the emergence of the low cost carrier sector have also increased aviation s significance for short and medium

haul tourism trips Thus developments in aviation can have very major implications for many leisure and business tourism markets However the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained In spite of the obvious closeness between the aviation and tourism industries there are very few specialist texts on this subject Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed whereas aviation specialist texts rarely concentrate on just leisure travel In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies Therefore it is the aim of this book to fill this important gap which exists with a comprehensive in depth study of the relationship between aviation and leisure travel The book deals exclusively with issues related to the relationship between aviation and leisure travel It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined *Air Transport in a Changing World* International Air Transport Association,1992 Transporte aéreo y

transporte terrestre turístico Rafael Valdez Becerra,1986 **Air transport - tourism nexus: A destination management perspective** Maya Georgieva Ivanova,2017-06-18 The aim of current research monograph is to provide a deeper view of the complex relationship between the air transport and tourism industries The adopted point of view a destination perspective enables one to go into a more detailed exploration of the topic and to consider issues that usually remain invisible at the strategic managers level The elaborated destination analysis framework and the identification of common points between aviation and tourism set the groundwork for further examination of the air transport tourism nexus Therefore the book would be useful both for students and researchers in the field of tourism hospitality and destination management and for practitioners and destination management representatives who may find interesting insights and ideas for improvement The monograph would be suitable also for managers and representatives from the air transport industry by providing them with the other point of view that of the local tourist destination to consider in their strategic growth and negotiation process

The Economic Regulation of International Air Transport Ramon De Murias,1989 *Tourism and Air Transportation Planning Guide* ,1975 *Orientación al mercado en los sistemas de gestión de las empresas de transporte aéreo* David Martín-Consuegra Navarro,Águeda Esteban Talaya,2009-12-04 El Comité Técnico Científico de la sexta convocatoria de la Tribuna FITUR Jorge Vila Fradera reunido el día 27 de enero en FITUR 2005 seleccionó como mejor trabajo in dito de investigación en el sector turístico en España e Iberoamérica la obra de la presente edición El objetivo de este trabajo es conocer la orientación de las compañías aéreas de transportes de pasajeros y si esta perspectiva coincide con la opinión de la demanda que existe por parte de los pasajeros en viaje de negocios y turistas **Transporte aéreo e turismo** Guilherme
