Diode Lasers, and Optical Frequency Measur Leo Hollberg,2000 A selected set of reprints from the Optical Frequency

Measurement Group of the Time and Frequency Div of the Nat Inst of Standards and Technology and consists of work published between 1987 and 1997 The 2 programs represented are 1 development of tunable diode laser technology for scientific applications and precision measurements and 2 research toward the goal of realizing optical frequency measurements and synthesis The papers are organized in 5 categories diode laser technology tunable laser systems laser spectroscopy optical synthesis and extended wavelength coverage and multi photon interactions and optical coherence

Grating-tuned External Cavity Diode Lasers Beate Stephan Falconer, 1994 Diode lasers have many advantages such as small size high efficiency and small angular dispersion of the collimated beam However they also have some problems like lack of frequency stability They can not be tuned in wavelength An external cavity can solve these problems and decrease the laser linewidth To obtain a tunable narrow linewidth light source antireflection coatings were applied to commercial diode lasers which were then tested in an external cavity Laser characteristics such as threshold current spectral behavior I V curves tuning range and bandwidth were measured for the original diode laser and then compared to the measurements in an external cavity with and without antireflection AR coatings The tuning range approximately doubled after AR coating The modal stability was found to be better by a factor of 7 in the external cavity The power amplification through the external cavity was as high as 50 It was also attempted to process laser diodes from material fabricated at OSU however the resulting diodes showed a high series resistance and were not usable for this project Additional work needs to be done in this area The result of this work is a stable external cavity diode laser tunable over an 18 nm bandwidth which can be used as a tunable source in many applications
