Travelling Passions Stefansson The Arctic Explorer:

Travelling Passions Gísli Pálsson, 2005 Vilhjalmur Stefansson is widely known for his groundbreaking Canadian Arctic explorations of the early 1900s. He acquired a reputation almost larger than life with his discovery of the Copper Inuit, a hitherto unknown people; his insistence on living as the local people did; and with Natkusiak, his Inuit co-explorer, his adventurous forays onto barren ice for months at a time. He was a fixture in the New York Greenwich Village scene and later in his life taught at Dartmouth College. However, despite his detailed field diaries and the frenzy of publicity that followed his every move, his private life has remained largely unknown. Then in 1987, an accidental discovery in a flea market of hundreds of private letters and documents proved to be those belonging to Stefansson, and they told a story of private relationships, in particular with two southern women: Orpha Cecil Smith, to whom Stefansson was engaged, and the novelist Fannie Hurst, with whom Stefansson was involved for many years. Moreover, letters between some of Stefansson's friends, as well as his own field diaries, alluded to an important relationship Stefansson had with an Inupiat woman in the Arctic, Pannigabluk, and to their son, Alex. Gísli Pálsson has followed the trail of these sources and conducted many interviews with Stefansson's northern descendants, uncovering a complex and perhaps torn personality. In *Travelling Passions*, we have a much more complete picture of the man who figured so largely in the imagination of the early twentieth century.

BOOK JACKET [Travelling Passions](#) Gísli Pálsson, 2005-09-07 Vilhjalmur Stefansson has long been known for his groundbreaking work as an anthropologist and expert on Arctic peoples. His three expeditions to the Canadian Arctic in the early 1900s, as well as his expertise in northern anthropology, helped create his public image as a heroic Hemingwayesque figure in the annals of twentieth-century exploration. But the emotional and private life of Stefansson, the man, have remained hidden until now. New evidence of this other life has recently been discovered: a collection of love letters between Stefansson and his fiancée, Orpha Cecil Smith, were found in a New Hampshire flea market. Stefansson's field diaries have revealed elegant essays and insightful commentary on Inupiat society; baptismal records have revealed that Stefansson had a son, Alex, with his informant and guide, Fanny Pannigabluk; and through web searches, a private detective, Pálsson, has found and conducted interviews with the descendants of both Cecil Smith and Alex Stefansson. *Travelling Passions* sheds new light on Stefansson's life and work, focusing on the tension between his private life and the theories that brought his name to the halls of fame. Pálsson draws a clear, vivid, and in many ways unexpected picture of the mythical figure of Stefansson.

At Home in the Cold Katherine Crooks, 2025-12-18 In the late nineteenth and early twentieth centuries, the idea of home came into focus as a place of warmth and comfort associated with interior spaces and feminine touches. In the same period, writing about the Arctic as a frigid and inhospitable landscape proliferated. American readers were fascinated by stories of Arctic exploration and supposedly heroic feats of survival by rugged white men. Moving across these opposing pictures were a handful of white and northern Indigenous women who travelled between the eastern Arctic and America from 1890 to 1940 in connection with

exploratory expeditions Their journeys and recollections challenged prevailing ideas about home the North and the rightful place of women At Home in the Cold brings to light the histories of five women involved in Arctic exploration The stories of three white women explorers Mina Hubbard Josephine Peary and her daughter Marie Peary reveal the importance of middle class domestic ideology to understanding the history of Arctic exploration as they sought to transform the Arctic into a more familiar environment Their journeys are considered alongside the stories of two northern women Eqariusaq from Greenland and Elizabeth Ford born in Labrador who travelled to the United States in connection with Arctic expeditions They too made comparisons of eastern Arctic and American environments that were rooted in their experiences of the Arctic as a natural home Representations of the Arctic as a difficult place to live continue to dominate outsider perceptions of the North as an inferior region with significant implications for northern residents today At Home in the Cold considers the colonial implications of home and domestic ideology in the Arctic context **Gender and Climate Change** Joane Nagel, 2025-08-05

Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women s rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance **Stefansson, Dr. Anderson and the Canadian Arctic Expedition, 1913-1918**

Stuart E. Jenness, 2011-01-01 The first comprehensive account of one of the great sagas of Arctic exploration and discovery the Canadian Arctic Expedition of 1913 1918 led by the ethnologist explorer Vilhjalmur Stefansson and the zoologist Dr Rudolph M Anderson There are details of the Expedition s successes and tragedies including the discovery of all but one large island north of the Canadian mainland the accumulation of considerable scientific information and valuable collections and the personal feud of the Expedition s two leaders Four appendices list Expedition personnel fifty three geographical sites in the Arctic named after them locations of their diaries and collected specimens and the thirteen government volumes

arising from the Expedition Published in English *New Spaces of Exploration* Simon Naylor, James R. Ryan, 2009-12-18 For many the dawn of the twentieth century ushered in an era where the world map had few if any blank spaces left to discover The age of exploration was supposedly dead *New Spaces of Exploration* challenges this assumption Focusing specifically on exploration in the twentieth century the authors demonstrate how new technologies and changing geopolitical configurations have ensured that exploration has remained a key feature of our rapidly globalizing world Ranging widely in their geographical focus from the Europe and Asia to Australia and from the polar regions to outer space they demonstrate the increasing diversity of modern exploration and reveal the continuing political military industrial and cultural motivations at play The result is a major contribution to our understanding of the significance of exploration in the twentieth century Contributors include E Baigent C Collis K Dodds F Driver M Godwin J Hill F Korsmo F MacDonald S Naylor J Ryan N Thomas and K Yusoff **Polar Imperative** Shelagh Dawn Grant, 2010 Winner of the 2011 Lionel Gelber Prize Winner of the 2011 J W Dafoe Book Prize Nominated for the 2010 Shaughnessy Cohen Prize Nominated for the 2011 Sir John A Macdonald Prize Nominated for the Lela Common Book Prize for Canadian History Based on Shelagh Grant's groundbreaking archival research and drawing on her reputation as a leading historian in the field *Polar Imperative* is a compelling overview of the historical claims of sovereignty over this continent's polar regions This engaging timely history examines the unfolding implications of major climate changes the impact of resource exploitation on the indigenous peoples the current high stakes game for control over the adjacent waters of Alaska Arctic Canada and Greenland the events issues and strategies that have influenced claims to authority over the lands and waters of the North American Arctic from the arrival of the first inhabitants around 3 000 BCE to the present and sovereignty from a comparative point of view within North America and parallel situations in the European and Asian Arctic *Polar Imperative* is a definitive reference on Arctic history and will redefine North Americans understanding of the sovereign rights and responsibilities of this northernmost region *The Polar Regions* Adrian Howkins, 2015-11-20 The environmental histories of the Arctic and Antarctica are characterised by contrast and contradiction These are places that have witnessed some of the worst environmental degradation in recent history But they are also the locations of some of the most farsighted measures of environmental protection They are places where people have sought to conquer nature through exploration and economic development but in many ways they remain wild and untamed They are the coldest places on Earth yet have come to occupy an important role in the science and politics of global warming Despite being located at opposite ends of the planet and being significantly different in many ways Adrian Howkins argues that the environmental histories of the Arctic and Antarctica share much in common and have often been closely connected This book also argues that the Polar Regions are strongly linked to the rest of the world both through physical processes and through intellectual and political themes As places of inherent contradiction the Polar Regions have much to contribute to the way we think about environmental history and the environment more generally **A Cold**

Colonialism Tina Adcock, 2025-06-01 Exploration has long been pivotal to southern engagements with northern Canada but it is most often associated with the nineteenth century or earlier. A Cold Colonialism offers the first extended examination of twentieth century exploration in the Canadian North. Modern exploration helped southerners establish and maintain distinctive kinds of colonial and settler colonial power over northern Indigenous homelands. Who explored the North between 1918 and 1965? What forms did exploration take? What did it mean to explorers and others affected by it? Tina Adcock focuses on four representative explorers with richly documented careers: mining engineer George Douglas, surveyor Guy Blanchet, ethnologist Vilhjalmur Stefansson, and filmmaker Richard Finnie. Despite limited experience in and knowledge of the Canadian North, these explorers helped southern militaries, industries, and governments exert control over northern peoples and their lands. Each also claimed belonging in and authority over the North in ways that still resonate among southern settlers in Canada today.

Emotion, Place and Culture Mick Smith, Liz Bondi, 2016-05-06 Recent years have witnessed a rapid rise in engagement with emotion and affect across a broad range of disciplines in the humanities and social sciences, with geographers among others making a significant contribution by examining the emotional intersections between people and places. Building on the achievements of *Emotional Geographies* (2005), the editors have brought together leading scholars such as Nigel Thrift, Alphonso Lingis, and Frances Dyson, as well as young up and coming academics from a diverse range of disciplines, to investigate feelings and affect in various spatial and social contexts, environments, and landscapes. The book is divided into five sections covering the themes of remembering, understanding, mourning, belonging, and enchanting.
