Disruptive Technology and Digital Transformation for Business and Government Sandhu, Kamaljeet, 2021-05-07 With the far reaching global impact of the COVID 19 pandemic the demand and the necessity for digital enterprise transformation have accelerated exponentially Management and strategies for the adoption and wider usage of newer digital technologies for the transformation of an enterprise through digital tools such as real time video communications have shown that people no longer need to be required to be physically present in the same place rather they can be geographically dispersed Technologies such as artificial intelligence cloud computing digital banking and cloud data have taken over tasks that were initially done by human hands and have increased both the automation and efficiency of tasks and the accessibility of information and services

Inclusion of all these newer technologies has shown the fast pace at which the digital enterprise transformation is rapidly evolving and how new ecosystems are reshaping the digital enterprise model. Disruptive Technology and Digital Transformation for Business and Government presents interesting research on digital enterprise transformation at different stages and across different settings within government and industry along with key issues and deeper insights on the core problems and developing solutions and recommendations for digital enterprise transformation. The chapters examine the three core leaders of transformation: the people such as managers, employees, and customers; the digital technology such as artificial intelligence and robotics; and the digital enterprise including the products and services being transformed. They unravel the underlying process for management and strategies to fully incorporate new digital tools and technologies across all aspects of an enterprise undergoing transformation. This book is ideally intended for managers, executives, IT consultants, business professionals, government officials, researchers, students, practitioners, stakeholders, academicians, and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective.

The Industrial Processes of Large Economies Xiaojiang Zhang, 2022-01-20. This book tries to build a broad view on industrial processes of large economies and their integration in the world. It provides insight into the industrialization progresses of the quartet of USA, China, Germany, and Japan, all attaining individual industrialization success by distinct trade, fiscal, and industrial policy paths, the underlying principles of which can be traced back to respective nations' roots in civilization. The combination of their industrial output led to the integrated formation of international industrial distribution. While being highly productive, the current distributed pattern yields benefits that are unevenly dispersed among different regions, industries, and societal groups within each participating nation and among engaging economies. To address the uneven benefits distribution at both domestic and international levels, large industrial economies took a plethora of policy actions that will impact industrial ecosystem and portfolio results. The book aims to help readers to build better investment strategies and robust risk management practice under the context of uncertainty and successfully navigate through choppy waters in the years ahead.
