Transformations of Musical Modernism Erling E. Guldbrandsen, Julian Johnson, 2015-10-26 This collection brings fresh perspectives to bear upon key questions surrounding the composition performance and reception of musical modernism

Transformations of Musical Modernism Erling E. Guldbrandsen, Julian Johnson, 2015-10-29 Profound transformations in the composition performance and reception of modernist music have taken place in recent decades This collection brings fresh perspectives to bear upon key questions surrounding the forms that musical modernism takes today how modern music is performed and heard and its relationship to earlier music In sixteen chapters leading figures in the field and emerging scholars examine modernist music from the inside in terms of changing practices of composition musical materials and overarching aesthetic principles and from the outside in terms of the changing contextual frameworks in which musical modernism has taken place and been understood Shaped by a rehearing of modernist music the picture that emerges redraws the map of musical modernism as a whole and presents a full scale re evaluation of what the modernist movement has all been about

The Routledge Research Companion to Modernism in Music Björn Heile, Charles Wilson, 2018-10-29 Modernism in music still arouses passions and is riven by controversies Taking root in the early decades of the twentieth century it achieved ideological dominance for almost three decades following the Second World War before becoming the object of widespread critique in the last two decades of the century both from critics and composers of a postmodern persuasion and from prominent scholars associated with the new musicology Yet these critiques have failed to dampen its ongoing resilience The picture of modernism has considerably broadened and diversified and has remained a pivotal focus of debate well into the twenty first century This Research Companion does not seek to limit what musical modernism might be At the same time it resists any dilution of the term that would see its indiscriminate application to practically any and all music of a certain period In addition to addressing issues already well established in modernist studies such as aesthetics history institutions place diaspora cosmopolitanism production and performance communication technologies and the interface with postmodernism this volume also explores topics that are less established among them modernism and affect modernism and comedy modernism versus the contemporary and the crucial distinction between modernism in popular culture and a popular modernism a modernism of the people In doing so this text seeks to define modernism in music by probing its margins as much as by restating its supposed essence

Musical Modernism in Global Perspective Björn Heile, 2024-05-30 In the first study of the global dimensions of musical modernism Björn Heile proposes a novel theory according to which musical modernism is constituted by a global diasporic network of composers musicians and institutions In a series of historical and analytical case studies from different parts of the world this book overcomes the respective limitations of both Eurocentric and postcolonial revisionist accounts focusing instead on the transnational entanglements between the West and other world regions Key topics include migration the transnational reception and transfer of musical

works and ideas institutions such as the International Society for Contemporary Music ISCM and composers who are rarely discussed in Western academia such as the Nigerian born Akin Euba and the Korean German Younghi Pagh Paan Influenced by the interdisciplinary notion of entangled histories Heile critiques established dichotomies all the while highlighting the unequal power relations on which the existing global order is founded *New Music and the Crises of Materiality* Samuel Wilson,2021-07-04 This book explores the transformation of ideas of the material in late twentieth and early twenty first century musical composition New music of this era is argued to reflect a historical moment when the idea of materiality itself is in flux Engaging with thinkers such as Theodor Adorno Sara Ahmed Zygmunt Bauman Rosi Braidotti and Timothy Morton the author considers music s relationship with changing material conditions from the rise of neo liberalism and information technologies to new concepts of the natural world Drawing on musicology cultural theory and philosophy the author develops a critical understanding of musical bodies objects and the environments of their interaction Music is grasped as something that both registers material changes in society whilst also enabling us to practice materiality differently *Music and Postwar Transitions in the 19th and 20th Centuries* Anaïs Fléchet,Martin Guerpín,Philippe Gumpłowicz,Barbara L. Kelly,2023-06-09 From the Napoleonic Wars to the genocide of the Tutsis in Rwanda via the great world conflicts of the 20th century *Music and Postwar Transitions in the 19th and 20th Centuries* is the first book to highlight the significance of postwar transitions in the field of music and to demonstrate the influence that musicians composers critics institutions and publics have had on the period that follows conflict Leading historians political scientists psychologists and musicologists explore the roles of music and culture in demobilization reconstruction memory reconciliation revenge and nationalist backlash Moving beyond the popular conception of music as an agent of peace this study reveals music s more complex and ambivalent role in the process of transition from war to peace **Decentering Musical Modernity** Tobias Janz,Chien-Chang Yang,2019-06-13 This collection investigates the concept of modernity in music and its multiple interpretations in Europe and East Asia Through contributions by both European and East Asian musicologists it discusses how a decentered understanding of musical modernity could be matched on multiple historiographical perspectives while being attentive to the specificities of local music and their narratives in East Asia and Europe The essays connect local global and transnational history with sociological theories of modernity and modernization making the volume an important contribution to overcoming the Eurocentric dichotomy between western music and world music within the field of historical musicology **The Oxford Handbook of Sound and Imagination, Volume 2** Mark Grimshaw-Aagaard,Mads Walther-Hansen,Martin Knakkergaard,2019-07-26 Whether social cultural or individual the act of imagination always derives from a pre existing context For example we can conjure an alien s scream from previously heard wildlife recordings or mentally rehearse a piece of music while waiting for a train This process is no less true for the role of imagination in sonic events and artifacts Many existing works on sonic imagination tend to discuss musical imagination through terms like

compositional creativity or performance technique In this two volume Handbook contributors shift the focus of imagination away from the visual by addressing the topic of sonic imagination and expanding the field beyond musical compositional creativity and performance technique into other aural arenas where the imagination holds similar power Topics covered include auditory imagery and the neurology of sonic imagination aural hallucination and illusion use of metaphor in the recording studio the projection of acoustic imagination in architectural design and the design of sound artifacts for cinema and computer games Sounds of Modern History Daniel Morat,2014-09-01 Long ignored by scholars in the humanities sound has just begun to take its place as an important object of study in the last few years Since the late 19th century there has been a paradigmatic shift in auditory cultures and practices in European societies This change was brought about by modern phenomena such as urbanization industrialization and mechanization the rise of modern sciences and of course the emergence of new sound recording and transmission media This book contributes to our understanding of modern European history through the lens of sound by examining diverse subjects such as performed and recorded music auditory technologies like the telephone and stethoscope and the ambient noise of the city Teaching Music Musically Prof Keith Swanwick,Keith Swanwick,2002-01-31 Through practical examples Swanwick illustrates layers of musical experience and outlines key principles for music educators on musical teaching Chapter deal with the value culture assessment and the future of music education
