Transgenics And The Poor Biotechnology In Development Studies:

Transgenics and the Poor Ronald J. Herring, 2013-09-13 Genetic engineering is changing the terrain of development studies Technologies with unprecedented potential the capacity to move genes across species have created widely politicized phenomena Frankenfoods GMOs and The Terminator En masse the public has reacted with equanimity or appreciation to genetically engineered pharmaceuticals beginning with insulin but transgenics in food and agriculture have raised a globally contentious politics This book begins with the needs of the poor for income nutrition environmental integrity and evaluates the theory and evidence for contributions from transgenic crops Social scientists with expertise in regional studies economics sociology agriculture and political science join biologists to bring specialized knowledge on genuinely new questions created by the genomics revolution questions of ecological integrity biodiversity international trade the costs and effectiveness of biosafety protocols The authors collectively conclude that predictions of disaster for the poor from transgenic technology are uninformed by empirical results rest on misunderstandings of biotechnology or the poor or both or get the science wrong Yet the triumphalism of pro transgenic forces however must be tempered by serious unanswered questions much is unknown but the transgenic genie is out of the bottle In this much needed book an emergent empirical literature allows scholars in disciplines ranging from micro biology to economics and political science to assess the potential effects of transgenic organisms on poverty through multiple dynamics of property yields prices biodiversity environmental integrity and nutrition

Special Issue Transgenics and the Poor Ronald J. Herring, 2007 Transgenics and the Poor Ronald J.

Herring, 2013-09-13 Genetic engineering is changing the terrain of development studies Technologies with unprecedented potential the capacity to move genes across species have created widely politicized phenomena Frankenfoods GMOs and The Terminator En masse the public has reacted with equanimity or appreciation to genetically engineered pharmaceuticals beginning with insulin but transgenics in food and agriculture have raised a globally contentious politics This book begins with the needs of the poor for income nutrition environmental integrity and evaluates the theory and evidence for contributions from transgenic crops Social scientists with expertise in regional studies economics sociology agriculture and political science join biologists to bring specialized knowledge on genuinely new questions created by the genomics revolution questions of ecological integrity biodiversity international trade the costs and effectiveness of biosafety protocols The authors collectively conclude that predictions of disaster for the poor from transgenic technology are uninformed by empirical results rest on misunderstandings of biotechnology or the poor or both or get the science wrong Yet the triumphalism of pro transgenic forces however must be tempered by serious unanswered questions much is unknown but the transgenic genie is out of the bottle In this much needed book an emergent empirical literature allows scholars in disciplines ranging from micro biology to economics and political science to assess the potential effects of transgenic organisms on poverty through multiple dynamics of property yields prices biodiversity environmental integrity and nutrition

International Governance of Biotechnology Catherine Rhodes, 2010-11-30 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com The significant media coverage recently given to issues such as the international impacts of biofuel production policies advances in synthetic biology and the ethical implications of research involving embryonic stem cells is indicative of the high level of interest among policy makers academics and the public in the biotechnology revolution its applications impacts and control There is also significant interest in international regulatory processes as a form of governance and international regulation is a vital part of efforts to manage the impacts of the biotechnology revolution since many of these are global in their nature The book establishes the need for international regulation of biotechnology identifying the roles it needs to play and the issues it needs to cover Having outlined the importance of coherence to the effective functioning of international regulatory sets a model of coherent international regulation is established against which the biotechnology regulations can be assessed This book approaches the subject from an international relations perspective but also draws from and will contribute to literature in the fields of international law global governance technological governance and science society relations Politics of Intellectual Property European Consortium for Political Research. Joint Sessions of Workshops, 2009 We know much more about the global politics of intellectual property than we do about national political contests over the ownership of knowledge Haunss and Shadlen have identified this gap in the literature and have done a fine job of bringing together a set of essays that helps to fill this gap in our understanding of the multi layered nature of intellectual property politics Peter Drahos The Australian National University Canberra This thought provoking volume provides invaluable new insights and is a major contribution to the debate on the politics of intellectual property rights Duncan Matthews Queen Mary University of London UK This book offers empirical analyses of conflicts over the ownership control and use of knowledge and information in developed and developing countries Sebastian Haunss and Kenneth C Shadlen along with a collection of eminent contributors focus on how business organizations farmers social movements legal communities state officials transnational enterprises and international organizations shape IP policies in areas such as health information communication technologies indigenous knowledge genetic resources and many others The innovative and original chapters examine conflicts over the rules governing various dimensions of IP including patents copyrights traditional knowledge and biosafety regulations Written from a political perspective this book is a must read for political scientists sociologists and anthropologists who study IP and conflicts over property It is also an essential read for stakeholders in institutions NGOs and industry interested in knowledge governance and IP politics *Genetically Modified Democracy* Aniket Aga, 2021-11-23 How the debate over genetically modified crops in India is transforming science and politics Genetically modified or transgenic crops are controversial across the world Advocates see such crops as crucial to feeding the world's growing population critics oppose them for pushing farmers deeper into ecological and economic distress and for shoring up the power of agribusinesses India leads the world in terms of

the intensity of democratic engagement with transgenic crops Anthropologist Aniket Aga excavates the genealogy of conflicts of interest and disputes over truth that animate the ongoing debate in India around the commercial release of transgenic food crops The debate may well transform agriculture and food irreversibly in a country already witness to widespread agrarian distress and over 300 000 suicides by farmers in the last two decades Aga illustrates how state science and agrarian capitalism interact in novel ways to transform how democracy is lived and understood and sheds light on the dynamics of technological change in populous unequal polities

The Diffusion of Social Movements Rebecca Kolins Givan, Kenneth M. Roberts, Sarah A. Soule, 2010-07-19 It is widely recognized that social movements may spread or diffuse from one site to another Such diffusion however is a complex and multidimensional process that involves different actors networks and mechanisms This complexity has spawned a large body of literature on different aspects of the diffusion process yet a comprehensive framework remains an elusive target This book is a response to that need and its framework focuses on three basic analytical questions First what is being diffused Second how does diffusion occur Finally what is the impact of diffusion on organizational development and shifts in the scale of contentious politics This volume suggests that diffusion is not a simple matter of political contagion or imitation rather it is a creative and strategic process marked by political learning adaptation and innovation

The Oxford Handbook of Food, Politics, and Society Ronald J. Herring, 2015 How is food political market state and knowledge Ronald J Herring Science politics and the framing of modern agricultural technologies John Harriss Drew Stewart Genetically improved crops Martina Newell McGloughlin Agroecological intensification of smallholder farming Rebecca Nelson Robert Coe The hardest case what blocks improvements in agriculture in Africa Robert L Paarlberg The poor malnutrition biofortification and biotechnology Alexander J Stein Biofuels competition for land resources and political subsidies David Pimentel Michael Burgess Alternative paths to food security Norman Uphoff Ethics of food production and consumption Michiel Korthals Food justice and land Saturnino M Borras Jr Jennifer C Franco Food security productivity and gender inequality Bina Agarwal Delivering food subsidy the state and the market Ashok Kotwal Bharat Ramaswami Diets nutrition and poverty lessons from India Raghav Gaiha Raghbendra Jha Vani S Kulkarni Nidhi Kaicker Food price and trade policy biases inefficient inequitable yet not inevitable Kym Andersen Intellectual property rights and the politics of food Krishna Ravi Srinivas Is food the answer to malnutrition David E Sahn Fighting mother nature with biotechnology Alan McHughen Climate change and agriculture countering doomsday scenarios Derrill D Watson II Wild foods Jules Pretty Zareen Bharucha Livestock in the food debate Purvi Mehta Bhatt Paulo Ficarelli The social vision of the alternative food movement Siddhartha Shome Food values beyond nutrition Ann Grodzins Gold Cultural politics of food safety genetically modified food in Japan France and the United States Kyoko Sato Food safety Bruce M Chassy The politics of food labeling and certification Emily Clough The politics of grocery shopping eating voting and possibly transforming the food system Jos e Johnston Norah MacKendrick The political economy of regulation of biotechnology in agriculture Gregory D

Graff Gal Hochman David Zilberman Coexistence in the fields GM organic and conventional food crops Janice Thies Global movements for food justice M Jahi Chappell The rise of the organic foods movement as a transnational phenomenon Tomas Larsson The dialectic of pro poor papaya Sarah Davidson Evanega Mark Lynas Thinking the African food crisis the Sahel forty years on Michael J Watts Transformation of the agrifood industry in developing countries Thomas Reardon C Peter Timmer The twenty first century agricultural land rush Gregory Thaler Agricultural futures the politics of knowledge Ian Scoones *India's Tryst With BT Cotton Learning from the First Decade* N. Lalitha,P.K. Viswanathan,2015-01-01 This volume is quite unique and timely in terms of consolidating some of the most recent theoretical R D as well as empirical analyses of the performance outcomes and farm level responses It is also timely as it unfolds the debate on the wider adoption of Bt technology which addresses some of the apprehensions that prevail over the GM crop varieties The volume provides a holistic perspective on the state of Bt cotton technology in India in terms of presenting the institutional R D policy regimes and regulatory environments that are seemingly inadequate to address the veracity of challenges facing the technology and its legitimacy and social relevance in rendering future of cotton farming more sustainable and inclusive To the best of our understanding this volume is perhaps the first of its kind that engages with the critical aspects of Bt cotton adoption in India since its introduction in 2003 Functional Foods and Nutraceuticals in Metabolic and Non-communicable Diseases Ram B. Singh,2021-11-30 Functional Foods and Nutraceuticals in Metabolic and Non communicable Diseases presents strategies for the prevention of non communicable diseases and undernutrition through the use of functional foods and nutraceuticals Research has shown that the use of certain functional foods and nutraceuticals including spices herbs and millets animal foods and plant foods can play a role in the treatment and prevention of various diseases and in health promotion Finally the book explores epigenetic modulation as a new method for the development of functional foods and functional farming Intended for nutritionists food scientists and those working in related health science professions this book contributes to the discussions focused on nutritional transition globalization how to administer foods in the treatment of metabolic syndrome hypertension diabetes heart attacks neuropsychiatric disorders bone and joint diseases and carcinogenesis Places emphasis on food diversity to provide perfect combinations of nutritional ingredients Presents the utility and necessity of functional food production for health promotion Offers suggestions to increase functional food production while simultaneously decreasing production costs
