Apostolia-Maria Tsimberidou, Razelle Kurzrock, Kenneth C. Anderson, 2015-10-08 Targeted Therapy in Translational Cancer Research for the Translational Oncology series provides a comprehensive overview of recent developments in our understanding of tumor biology elucidates the roles of targets and pathways involved in carcinogenesis and describes current state of the art anticancer therapy as well as the most promising areas of translational research and targeted therapy Introduces cutting edge bench to bedside and back breakthroughs which have transformed the diagnosis prognosis and treatment of cancer Covers basic principles of targeted therapy including immunotherapy and the roles of cancer stem cells the microenvironment angiogenesis epigenetics microRNAs and functional imaging in precision medicine Summarises major advances in therapeutic management of hematologic malignancies and solid tumors using conventional therapy targeted therapy immunotherapy or novel treatment modalities **Design, Fabrication, Properties and Applications of Smart and Advanced Materials** Xu Hou, 2016-06-22 This book introduces various advanced smart materials and the strategies for the design and preparation for novel uses from macro to micro or from biological inorganic organic to composite materials Selecting the best material is a challenging task requiring tradeoffs between material properties and designing functional smart materials The de **Glioblastoma - New Solutions for Brain Cancerogenesis**, 2025-10-22 Glioblastoma

multiforme the most malignant type of brain tumour with an incidence of 4 8 cases per 100 000 people typically results in a fatal outcome with an average survival time of about one year The pathogenesis involves tumour development through various genetic pathways and the abnormal deregulation of growth factors particularly IGF I eGFR and PDGF Current therapeutic strategies including surgery radiation and chemotherapy can extend survival to around 14 months occasionally up to 18 months More recent advancements in therapy especially cancer gene therapy e g anti IGF I approaches and immunotherapy e g CAR T and checkpoint inhibitor therapies have further increased survival times to approximately two years Despite these promising developments the fight against glioblastoma is ongoing and continues to require extensive research in both diagnostics and treatment Examples of these efforts are highlighted throughout this book The chapters emphasize the critical role of microsurgery in maintaining patient safety In terms of innovative diagnostics early tumour

detection and precise monitoring are increasingly supported by the use of Raman spectroscopy combined with liquid biopsy. Advances in immunotherapy are also explored including explanations of their mechanisms and the development of new vaccines particularly those prepared using dendritic cells. Finally considering the ongoing relevance of the COVID 19 pandemic the book includes an important discussion on managing glioblastoma during this global health crisis. **Handbook of Animal Models and its Uses in Cancer Research** Surajit Pathak, Antara Banerjee, Atil Bisgin, 2023-01-31. This reference book compiles together different animal models in cancer research. It provides knowledge and a better understanding of the advancement of the molecular and cellular mechanisms associated with the progression formation and clinical results of various types of cancer from the evidence collected from animal models utilized for cancer research. It discusses animal models for screening anti cancer drugs and exploration of gene therapy. It presents different methods used to construct cancer animal models and the progress of each animal model in tumor research. The book also highlights the applications of genetic engineering including CRISPR Cas9 in designing and developing animal models for cancer research. Further it discusses strategies for modeling animals for investigating growth metastasis tumor associated inflammation and microenvironment cancer stem cells tumor heterogeneity and therapeutic resistance. This book is a valuable resource for basic and translational cancer researchers clinicians and health care.
