Travellers In Space And Time:

Travellers in Space and Time Patrick Moore, 1984 What if it were possible to go on a journey through the Universe Imagine we are able to transfer ourselves to a planet inside the Andromeda Spiral a system so remote in space that it looks like nothing more than a dim glow from Earth what would we and an Andromedan see What better way to find out than to make a journey through space with the author fastening ourselves to a light beam *Places: a Volume of Travel in Space and Time* Geoffrey Grigson, Charles Harvard Gibbs-Smith, 1956 *Philosophy of Time* Sean Enda Power, 2021-05-26 As a growing area of research the philosophy of time is increasingly relevant to different areas of philosophy and even other disciplines This book describes and evaluates the most important debates in philosophy of time under several subject areas metaphysics epistemology physics philosophy of language philosophy of mind cognitive science rationality and art Questions this book investigates include the following Can we know what time really is Is time possible especially given modern physics Must there be time because we cannot think without it What do we experience of time How might philosophy of time be relevant to understanding the mind body relationship or evidence in cognitive science Can the philosophy of time help us understand biases toward the future and the fear of death How is time relevant to art and is art relevant to philosophical debates about time Finally what exactly could time travel be And could time travel satisfy emotions such as nostalgia and regret Through asking such questions and showing how they might be best answered the book demonstrates the importance philosophy of time has in contemporary thought Each of the book's ten chapters begins with a helpful introduction and ends with study questions and an annotated list of further reading This and a comprehensive bibliography at the end of the book prepare the reader to go further in their study of the philosophy of time *Space and Time* Vincenzo Fano, Francesco Orilia, Giovanni Macchia, 2014-05-21 This collection focuses on the ontology of space and time It is centred on the idea that the issues typically encountered in this area must be tackled from a multifarious perspective paying attention to both a priori and a posteriori considerations Several experts in this area contribute to this volume G Landini discusses how Russell's conception of time features in his general philosophical perspective D Dieks proposes a middle course between substantivalist and relationist accounts of space time P Graziani argues that it is necessary to provide an account of the synthetic procedures implicit in the recourse to diagrams in Euclid's Elements while E Mares comes to the conclusion that in Euclid's Elements we should treat the parallel postulate as empirical and the postulate that space is continuous as a priori M Arsenijevic M Adami present an important formal result concerning two theories of the infinite two dimensional continua which sheds new light on the current dispute between gunkologists and pointilists F Orilia discusses two problems for presentism one regarding the duration of the present and the other related to Zeno's paradoxes A Iacona delves deep into logical matters by focusing on the so called T W modal frames in order to deal with the determinism indeterminism controversy D Mancuso outlines a non standard temporal model compatible with time travel and V Fano G Macchia discuss time travels in the light of

an important foundational principle of modern cosmology Weyl's Principle

Space and Time Emile Borel, 1926

Time and Space Barry Dainton, 2016-04-15 The first edition 2001 of this title quickly established itself on courses on the philosophy of time and space This fully revised and expanded new edition sees the addition of chapters on Zeno's paradoxes speculative contemporary developments in physics and dynamic time making the second edition once again unrivalled in its breadth of coverage Surveying both historical debates and the ideas of modern physics Barry Dainton evaluates the central arguments in a clear and unintimidating way and is careful to keep the conceptual issues throughout comprehensible to students with little scientific or mathematical training The book makes the philosophy of space and time accessible for anyone trying to come to grips with the complexities of this challenging subject With over 100 original line illustrations and a full glossary of terms the book has the requirements of students firmly in sight and will continue to serve as an essential textbook for philosophy of time and space courses

A Companion to Transport, Space and Equity Robin Hickman, Beatriz Mella Lira, Moshe Givoni, Karst Geurs, 2019 With social inequity in urban spaces becoming an increasing concern in our modern world The Elgar Companion to Transport Space and Equity explores the relationships between transport and social equity Transport systems and infrastructure investment can lead to inequitable travel behaviours with certain socio demographic groups using particular parts of the transport system and accessing particular activities and opportunities

Time and Temporalities in European Travel Writing Paula Henrikson, Christina Kullberg, 2020-12-10 This book is a collective effort to investigate and problematise notions of time and temporality in European travel writing from the late medieval period up to the late nineteenth century It brings together nine researchers in European travel writing and covers a wide range of areas travel genres and languages coherently integrated around the central theme of time and temporalities Taken together the contributions consider how temporal aspects evolve and change in regard to spatial historical and literary contexts In a chapter by chapter account this volume thus offers various case studies that address the issue of temporality by showing for example how time is inscribed in landscape how travellers encounters with other temporalities informed other disciplines it interrogates the idea of cultural temporalities in regard to a tension between past and future passivity and progression and focuses on how time is entangled in identity construction proper to travelogues

Urban Rhythms and Travel Behaviour Stefan Schönfelder, Kay W. Axhausen, 2016-02-11 The recent availability of longitudinal data on individual trip making and activity behaviour has provided analysts with new insights into the structures and motives of daily life travel Multi week travel diary data sets and GPS observations are exciting sources of information for

the description and modelling of the variability of individual travel patterns Through an analysis of these strong new data sets this book questions what are the most suitable methodological tools to represent the structures of long term travel behaviour It also examines what the data tells us about the travellers motives and looks at how planning should translate the findings into forecasting tools and transport strategies In doing so the multifaceted and ambiguous character of daily life travel is revealed illustrating how while sound routines in time and space seem to dominate daily life individuals show a considerable amount of variability and flexibility in travel and activity behaviour
